

Schedule

May 25 Why Programming is a Good Medium for Expressing Poorly Understood and Sloppily Formulated Ideas
MC 2066, 5:00 PM—Public Lecture.

May 26 The Art of the Propagator
MC 5136, 3:30 PM—Public Reception. Food and refreshments provided.
MC 5158, 5:00 PM—Public Lecture.

Gerald Jay Sussman is a professor of Electrical Engineering at MIT. His research includes artificial intelligence, computer languages and VLSI circuit design.

Scheme—a language of his creation—is used extensively in the first year computer science and software engineering curricula at UW.

UW Computer Science Club presents

Gerald Jay Sussman
