ABSTRACT

This teaching grammar is designed to be used with adult students. Although primarily conceived for classroom use, it could be used by students learning on their own. A section on reading and writing Mohawk precedes the twenty lessons, each of which has basically the same format: (1) conversation, (2) introduction to the systematic variations of the new material, (3) conversation, (4) phrases to be used in class, (5) vocabulary, (6) exercises, and (7) notes to the student, including grammatical and cultural information to be used for reference purposes. Every fifth lesson is a review of the preceding four, and tapes accompany the lessons for practice in usage and pronunciation. (CLK)

## ACKNOWLEDGEMENTS

We wish to thank Laurie Delaronde who helped with the early stages of this text, Jake Thomas who gave us some valuable information and Mrs. Annie McComber who sings the songs at the end of Lesson 20. In particular, we would like to thank Ernest Benedict who was always willing to help us and who provided some of the materials for the text. Furthermore, we wish to thank the many typists who have worked on this text, and especially Mrs. Marielle Giguère who typed the final copy. Finally, we want to thank Ross Montour and Rita Phillips for their imaginative artwork.

This work was supported by Manitou Community College, La Macaza, P.Q. and by a 1974 grant from the Secretary of State, Ottawa.

## INTRODUCTION

The present teaching grammar of Mohawk was developed at Manitou Community College over a period of two years. It is aimed at teaching Mohawk to adult students. The Mohawk dialect on which this grammar is based is that of Caughnawaga, but it is felt that with minimal adjustments made by the teacher, the text can be used in other communities as well.

Though the text was primarily conceived for classroom use, it could also be helpful to somebody who is learning on his own. However, in such a case the tapes are essential to provide the correct pronunciation and to correct the exercises.

This first version of the Teaching Grammar is a preliminary one that should be revised once it has been tried out in a number of classes. So far, only the first eleven lessons have been tested in the classroom. However, experience has shown that many flaws only show up once the text is put to use. Furthermore, some semantic as well as some grammatical areas have not been covered as extensively as they should be, and some material should probably be rearranged. We would therefore be grateful to any teacher who uses the text if he or she will inform us of weaknesses found in the text.

## HOW TO USE THE TEACHING GRAMMAR

The outline above is aimed at helping the teacher to understand the composition of the text and the function of the individual parts. The teacher should, however, realize that it is extremely important that students make the transition from the book to the spoken language and that they learn to use Mohawk creatively. This can be achieved by having free conversations from the first day of classes on, even if the students can only say a few sentences. The more often a sentence is repeated, the better it is remembered. Conversations should obviously be based on the materials learned, but the teacher should not hesitate to make up new sentences with the words and structures learned so far and students should also be encouraged to do so. For instance, if the students have learned the sentence ka' wa:re'? and the noun phrase thi ron:kwe in two different places, they should nevertheless be able to understand and to make up themselves the new sentence ka' wa:re' thi ron:kwe?

However, a small word of warning is necessary. Some students might want to advance too fast and try to make up sentence types that they have not yet learned. This is usually done by translating directly from English. Given that the structures of Mohawk and English are very different, this kind of attempt will usually be unsuccessful and should therefore be discouraged especially in the earlier lessons.

HOW TO USE THE TEACHING GRAMMAR1. Reading and Writing Mohawk

The writing system used in the text is the one that has been developed over the last years by a group of Mohawk teachers from Caughnawa and Oka. It is essentially an elaboration of the older system that was used in St. Regis, Caughnawaga and Oka. The distinctions that were added to the older system are: vowel length, indicated by :, the glottal stop, indicated by ', and stress, indicated by ˈ. Furthermore, the h sound which was only written sporadically, is now indicated wherever it occurs.

The section on reading and writing Mohawk is meant as a help to the students so that they can overcome difficulties whenever they come up.

Even though the section on reading and writing Mohawk is placed before the lessons, this does not imply that this section has to be mastered before the first lesson can be tackled. Rather, it is meant to help the students if they encounter difficulties while learning the language. The students can either work with the teacher or use the tapes to learn the correct pronunciation of a given sound. The tapes can also be used as a dictating device.

## 2. The Lessons

The text contains twenty lessons of which every fifth lesson is a review of the four preceding lessons. All lessons are arranged in such a way that when a page is folded down the middle, only the Mohawk or the English shows. This is especially useful for reviewing or when working with the tapes. All lessons (except the review lessons) are arranged in the following way:

- (1) A Conversation C-1: C-1 introduces the new material in dialogue form.
- (2) M-Variants: They introduce systematic variations of the new materials.
- (3) A Conversation C-2: C-2 is rather more complex than C-1 and uses material learned in the M-variants.
- (4) Phrases to Use in Class: A small section that contains phrases teacher and students need to operate in Mohawk in the classroom.
- (5) A Vocabulary Section: It contains lists of some of the semantic areas that have been touched on in the lesson.
- (6) Exercises: They reinforce the patterns the student is acquiring in a given lesson.
- (7) Notes to the Student: They provide the student with a minimum of grammatical and some cultural information and should also be used for reference.

HOW TO USE THE LESSON

(1) The Conversation: C-1

The conversations, especially C-1, introduce new material in dialogue form so that sentences are not learned out of context. The conversation can be taught in the following way:

After having written the English text of C-1 on the board, the teacher introduces the first sentence in Mohawk, pointing at the same time at the corresponding English sentence. The students repeat the sentence till they know it, but not more than three times to avoid boredom. The second sentence is taught like the first one, and then both sentences are said together. Then the teacher goes on to the next set of sentences, until the students know the whole conversation.

This looping technique can be schematisized in the following way:

The numbers show the order in which the individual sentence pairs are taught and then recombined into larger units. Once the students know the conversation fairly well, the group should be split up into smaller groups that can take different roles in the conversation.

Each student should learn to handle all of the roles in the conversation by himself. It is important that the students keep their books closed while learning the conversations and the M-variants.

(2) M-Variants:

M stands for mimic, memorize and manipulate. The main purpose of this section is to reinforce the new material learned in C-1 and to teach the students the systematic patterns of the language. The juxtaposition of related structures allows the student to deduce the patterns that make up the system of the language.

Each M-variant usually contains four lines that are systematically related. In order to avoid that sentences are taught in isolation, the M-variants are always grouped in such a way that two or more of them form mini-conversations. These conversations should be taught together. For instance, in lesson 1, person A in M-1 says: Kwekwe. Skennenko:wa ken? and person B in M-2 answers: Skennenko:wa. In order to teach the M-variants, the teacher can use the same method that is used for the conversations.

(3) The Conversation: C-2

C-2 is taught after the M-variants and the students should learn it easily, since it is based on material already known. C-2 is usually more complex than C-1 and may introduce some additional variations.

(4) Phrases to Use in Class:

These sentences will be useful for both teacher and students to avoid as much as possible the use of spoken English in class. This is also the place where the teacher can teach additional phrases that the students might want to learn.

(5) Vocabulary Section:

This section should be used for reference purposes and not for memorizing individual words. Sometimes vocabulary from this section occurs in the exercises. The students can also use some of the vocabulary when writing their own conversations.

(6) Exercises:

While the conversations and the M-variants should be taught in class, the exercises can be either assigned as homework or done together with the teacher. In these exercises, the student will learn how to manipulate the patterns that he learned in the M-variants. Often, an exercise will be tied in with a Note to the Student, which will provide the grammatical information needed to do the exercise. Similar to the M-variants most exercises are structured like two-sentence conversations, usually in the form of questions and answers. Most exercises are programmed in that they provide a pattern along with any new information that the

students may need to complete the exercise. Each lesson also has an exercise that requires the student to write a conversation of his own. Once the teacher has corrected these conversations, the best ones can be used as additional material in class, especially in the review lessons.

(7) Notes to the Student:

These Notes contain information on grammatical and cultural points that have been covered in a given lesson. However, each lesson will contain some grammatical structures that are not discussed in the Notes of that lesson, mostly because they are too complex for the stage the student is at. The Notes are meant to be used in connection with the exercises and also for reference. Usually a number of examples are given to illustrate the grammatical point under discussion. Taken together, the Notes of the twenty lessons cover the most important areas of Mohawk grammar, but they are by no means complete. Furthermore, as the Notes were written for linguistically unsophisticated students, they do not always mention all of the linguistic ramifications involved.

(8) Review Lessons:

Every fifth lesson is a review lesson that is based on the material learned in the four preceding lessons. Review lessons contain mostly conversations, and as there is no new material introduced, they do

not contain any M-variants. Besides the conversations, there are a few exercises in review lessons. These lessons give the students the opportunity to reinforce the structures that they learned in the preceding lessons.

(9) Tapes:

All twenty lessons are available on cassette tapes. The tapes contain the conversations, the M-variants, the Phrases to Use in Class and most of the exercises.

While the students work with the tape, the Mohawk versions should be covered up to avoid that the students simply read off. The teacher can be there to help if problems arise and to check on the students' progress.

While working with the tapes, the students should not only repeat what they hear, but also anticipate what the voice on the tape will say and then use the tape as a checking device. For example, the students work with C-1 of Lesson 1. In front of them is the English version of C-1 with 'Hello. How are you?' as the first utterance. The students try to say it in Mohawk, then check on the tape whether they used the correct sentence structure and pronunciation. In the exercises, which often consists of questions and answers, the students should anticipate the taped answer with their own, and then use the tape for verification. It was decided to include, where possible, the answers to the exercises on the tapes. This will allow students to correct their work themselves and to use the exercises as mini-conversations.

## READING AND WRITING MOHAWK

The lessons in this book are designed to teach you how to speak Mohawk. However, as the material is in written form and as you are expected to produce some written material, you will also be learning to some extent how to read and write the language. The writing system used in the present text was worked out by a group of Mohawk teachers under the guidance of Marian Williams during 1973 and 1974. The system is based on the writing system that had been introduced by Jesuit missionaries towards the end of the seventeenth century. The present system differs from the old one in that it recognizes that stress, length and the glottal stop are distinctive in Mohawk. It also does away with the use of dashes between syllables, which makes some of the older Mohawk texts so difficult to read, especially for somebody who is not fluent in the language.

The present writing system consists of nineteen symbols representing sounds plus a symbol for length and a symbol for stress. In the following, each symbol is discussed. The examples and the exercises (E) that are attached to each section will help the student to distinguish, pronounce and write the different sounds of Mohawk.

### A. The Vowels

All Mohawk vowels can either be short or long. Length is expressed by a colon, i.e. :. English vowels, e.g. the a in father (see 1. below) only approximate the Mohawk vowels. Nevertheless, the comparison will provide some indication about the quality of the Mohawk vowels.

#### 1. a as in father

the short vowel a :

<u>á</u> hta	'shoe'
w <u>á</u> hta	'sugar maple'
sk <u>á</u> tne	'together'
só:ra <u>á</u>	'duck'

the long vowel a :

ká:ti'

oká:ra'

kaná:ta'

'then', 'therefore'

'story', 'tale'

'town', 'settlement'

2. i as in beat

the short vowel i :

ísi'

istá

kaié:ri

wisk

'there'

'mother'

'four'

'five'

the long vowel i :

í:se'

í:'i

kí:ken

'you'

'I'

'this one'

3. e as in bet

the short vowel e :

éhsa

óhonte'

kenákere'

tékeni

'black ash'

'green', 'grass'

'I live', 'I reside'

'two'

the long vowel e :

é:so'

kaié:ri

é:rhar

'much'

'four'

'dog'

4. o as in book

the short vowel o :

oká:ra'

roió'te'

ohté:ra'

'story'

'he works'

'root'

the long vowel o :

takó:s

nahó:ten

ó:nen

'cat'

'what'

'good-bye'

5. en is a nasal vowel that resembles the nasal in long  
the short vowel en :

<u>é</u> nska	'one'
k <u>é</u> n' <u>en</u>	'here'
ató:k <u>en</u> '	'axe'
ó:n <u>en</u> ste'	'corn'

the long vowel en: :

k <u>é</u> n:tho	'here'
on <u>é</u> n:ia'	'stone'
sk <u>é</u> n:nen'	'peace', 'hello'

6. on is a nasal vowel which has no English counterpart  
the short vowel on :

<u>ó</u> nhka	'who'
káton <u>on</u>	'or'
onkwehón:we	'Indian'
onon' <u>ón</u> sera'	'squash'

the long vowel on: :

on <u>ón</u> :ta'	'hill'
on <u>ón</u> :tsi	'head'
ka'n <u>ón</u> :we	'where'

If you look again at the examples above, you will notice that in each word one of the vowels has a check mark like ✓ over it. This mark indicates which vowel in a word is emphasized or stressed. In English stress is usually not marked, but we could do it, for instance to indicate the difference between cónvict and to convict or éxport and to export. In Mohawk it is essential to know which vowel is stressed to arrive at a correct pronunciation. Usually the syllable before the last is stressed, i.e. penultimate stress, but there are quite a few exceptions. Long vowels are always stressed.

## 1. Words stressed on the penultimate syllable:

kaná:ta	'town'
kanónhses	'Longhouse'
skátne	'all', 'together'
entáкта	'Saturday'
éntie	'south'
kanonhsí:ios	'nice houses'
aní:tas	'skunk'
atatitén:ron	'pity'
tekatsiserá:ton	'window'
ratironhia'kehró:non	'angels', 'residence of the blue'

## 2. Words stressed on other than the penultimate syllable:

árekho'	'not yet'
ká:iare'	'bag'
ó:nenste'	'corn'
áhsire'	'blanket'
enhnísera	'day'
kaná:takon	'in, to town'
rata'én:neras	'male witch'
atenró:sera	'friendship'
ka'nón:	'where?' (shortened form)
akwé:	'everybody' (shortened form)

Exercises

In the exercises below each word is repeated twice. Listen to the words and repeat them looking at your book at the same time. Then close the book and write out the words as you hear them. Don't forget length, i.e. :, and stress, i.e. '. They are as important to the words as the individual sounds. Once you finished a section, open the book and check whether you made mistakes. Go back to practicing those words which you could not write correctly.

E-1

This exercise will teach you to recognize and produce the various vowels that exist in Mohawk. First listen and repeat. Then write out the words with your book closed. Do not worry about the spelling of the consonants.

1. ákta	'near' , 'next to'
2. áhta	'shoe'
3. káhi	'fruit'
4. kátshe	'bottle'
5. athéhsa	'brown'
6. atókwa'	'spoon'
7. éhsa'	'black ash'
8. skátne	'all' , 'together'
9. énska	'one'
10. énskak	'one' (one only)
11. entákta	'Saturday'
12. kentórha	'I am lazy'
13. oháha	'road' , 'trail'
14. Wíshe	'Michael'
15. kahétken	'she is ugly'
16. óhsa'	'lip'
17. tawístawis	'snipe'
18. ohóntsa'	'earth' , 'world'
19. ótkon	'spirit' , 'devil'
20. ohwísta	'metal' , 'money'
21. otáhson	'tail'
22. kéntson	'fish'
23. nektsi	'but'
24. kwéskwes	'pig'
25. kítkit	'chicken'

## E-2

This exercise will teach you to recognize and produce the long vowels of Mohawk. Use the same procedure as in E-1.

1. á:ré'	'again'
2. ká:ts	'come here!'
3. atená:ti'	'elk'
4. akwá:wen'	'it's mine'
5. ohné:ka'	'water', 'liquid'.
6. kawéhno:ke'	'island'
7. aké:ra'	'plate'
8. oié:ri'	'ten'
9. í:non	'far'
10. í:ken	'indeed'
11. karí:wes	'long time'
12. orí:wa'	'matter', 'affair', 'things'
13. oién:kwa'	'tobacco'
14. oskén:rha'	'rust'
15. kén:reks	'lion'
16. karén:na'	'music'
17. karón:to'	'wooden cabinet'
18. aón:ta'	'pail', 'pot'
19. oskenón:ton	'deer'
20. karónhia:ke	'in the sky'
21. ó:se'	'willow'
22. só:ra	'duck'
23. ostó:kwa'	'beak'
24. takó:s	'cat'
25. tawí:ne	'otter'

## E-3

This exercise will help you to recognize the stress patterns of Mohawk. Proceed as in the other exercises.

1. athéhsa	'brown'
2. á:there'	'basket'
3. athén:no'	'ball'
4. á:share'	'knife'
5. á:re'	'again'
6. ohné:ka'	'water'
7. ohnáwera'	'well'
8. áhsikwe'	'spear'
9. taráktarak	'cricket'
10. óhere'	'cornstalk'
11. aké:ra'	'plate'
12. tékeni	'two'
13. tawístawis	'snipe'
14. otsénha	'fire'
15. otskwá:rhe'	'frog'
16. ówera'	'wind'
17. ohiakwí:ra'	'toe'
18. áhsire'	'blanket'
19. kahwén:kare'	'snowshoe'
20. káhonre'	'rifle'

## E-4

This exercise will help you to recognize those vowels that are the most difficult to learn for a speaker of English.

1. ká:ton	kén:ton
2. kí:ken	káton
3. kón:ne's	kéntho

## E-4 Ccont'd)

4. tóka'	tó:ka'
5. énska	oshérha
6. ka'nón	ká:nen'
7. ká:nhes	kón:ne's
8. ohká:ra'	ohkén:ra'
9. kahén:taien	kahéhtaien
10. kahétken	kaná:tsakon
11. o'nón:na'	o'nó:wa'
12. o'kén:ra'	aké:ra'
13. karón:to'	onón:ta'
14. ná:kon	thí:ken
15. ónhka	énska

## E-5

This exercise will help you to distinguish between short and long vowels.

1. óhere'	ó:kera'
2. á:there'	áhsire'
3. wá:ktate'	waktá:ton
4. ohsóhkwa	ohsó:kwa'
5. tóka'	tó:ka'
6. wá:keke'	waké:kon
7. ówera'	ó:nenste'
8. okénha'	okén:kwara'
9. ató:ken'	atókwa
10. í:se'	ísi'
11. ohné:ka'	ohnéhta'
12. karén:na'	kanén:nawen
13. káton	ká:ton
14. nón:wa'	ohóntsa'
15. tawí:ne	tawístawis

## E-6

This exercise will help you to determine stress, that is that part of the word which is emphasized the most. In the exercise similar words with different stress patterns are contrasted.

1. káton	ka'nón:
2. otská:ra'	ó:kera'
3. á:there'	athén:no'
4. wá:keke'	waké:kon
5. oién:kwa	ó:iente'
6. ó:tsire'	otsísto'
7. ohóntsa'	óhonte'
8. oná:kara'	onawí:ra'
9. kana akon	kanatákta
10. ó:re'	okwíra:ke
11. okwaho	ó:kera'
12. áhsire'	atí:ron
13. á:share'	athéhsa
14. kaié:ri	ká:iare'
15. é:neken	onó:ra'

## B. The Consonants

There are twelve consonants in Mohawk. Below is a list of the symbols or combination of symbols used with an English approximation of their pronunciation and some Mohawk examples. Notice that some of the letters, e.g. the t and the k, have two different pronunciations, depending on the environment in which they occur.

1. t as in tall  
as in doll

This sound is pronounced -d- if it precedes a vowel, e.g.:

<u>t</u> ó:ka	'I don't know'
<u>k</u> áton	'or else'

It is pronounced -t- everywhere else, e.g.:

<u>th</u> i	'that'
<u>kit</u> <u>kit</u>	'chicken'

2. k as in kin  
as in get

This sound is pronounced as a -g- if it occurs before a vowel, e.g.:

<u>k</u> én'en	'here'
<u>t</u> óka'	'maybe'

It is pronounced -k- everywhere else, e.g.:

<u>kh</u> ok	'only'
<u>eks</u> á:'a	'child (f)'

3. s as in set  
as in zipper

This sound is pronounced -z- between vowels and at the beginning of a word before a vowel, e.g.:

í: <u>se</u> '	'you'
<u>só</u> :ra	'duck'

It is pronounced -s- everywhere else, e.g.:

<u>shé</u> :kon	'hello'
ó <u>ksa</u> '	'hurry up'
tó: <u>ske</u> '	'it's true'
takó: <u>s</u>	'cat'

4. ts as in its  
as in red zombie

This sound is pronounced -dz- between vowels and at the beginning of a word before a vowel, e.g.:

<u>otsí</u> : <u>tsa</u> '	'flower'
<u>tsá</u> :ta	'seven'

It is pronounced -ts- everywhere else, e.g.:

<u>tshenorón</u> :khwa	'you love him'
sa <u>htsí</u> :shen	'you have older brothers and sisters'

5. n as in net,  
e.g.:

<u>néktsi</u>	'but'
í: <u>non</u>	'far'

6. h as in hot  
e.g.:

<u>hen</u>	'yes'
ká <u>hi</u>	'fruit'

8. ti as in join  
e.g.:

Wátio  
Tiohtíá:ke  
tióhton  
watió'te'

'Matthew'  
'Montreal'  
'nine'  
'I work'

- thi as in child  
e.g.:

thién:'a  
thio'kéha

'your son'  
'train', 'on the shore'

9. si as in shy  
e.g.:

ohsiahón:ta'  
óhsia'

'stomach'  
'handle'

10. w as in fall  
as in want

The sound is pronounced f before an h, e.g.:

ówhare'

'fur'

o'wháhsa'

'skirt'

It is pronounced w everywhere else, e.g.:

ón:wa

'now'

kwah í:kehre'

'I think'

11. i as in yes  
e.g.:

iah  
kaié:ri

'no', 'not'  
'four'

## 12. ' glottal stop

This sound is produced by an abrupt closure of the air passage in the throat, thus interrupting the air flow, e.g.:

í:'i	'I'
ka'nón:we	'where'
ki'	'though'
íthre's	'he is over there'

Below are some exercises that will help you to recognize, pronounce and spell the consonants that occur in Mohawk. Use the same procedure that you used for the vowels.

## E-1

This exercise will help you to recognize where the letter t is pronounced as in tell and where it is pronounced as in doll.

- |              |                 |

s / š	ohsí:na áhsire'	ohší:na ahšíre'	'leg' 'blanket'

LESSON I

C-: Converse, Communicate

(In the following conversations (C-1 and C-2), you will be learning to communicate in a "real-life" situation. Imitate your teacher very carefully, copying his gestures as well as his way of speaking.)

C-1

Two new students, Wá:ri and Shawátis, are meeting on the first day of classes.

- |                               |                                |
|-------------------------------|--------------------------------|
| A: Shé:kon. Skennenkó:wa ken? | A. Hello. How are you?         |
| B: Skennenkó:wa. Ok ní:se'?   | B: I'm fine. And you?          |
| A: Ianerátie'.                | A: It's going well.            |
| B: Nahó:ten iesá:iats?        | B: What's your name?           |
| A: Wá:ri ióntiats. Ok ní:se'? | A: My name is Mary. And yours? |

B: Shawáti*s* ióntiats.

A: Ok ne raónha?

B: Kó:r ronwá:iats.

A: Ó:nen ki' wáhi.

B: Ó:nen.

B: My name is John.

A: And him?

B: His name is Paul.

A: Good bye then.

B: Good bye.

M-: Mimic, Memorize, Manipulate

(In the M-variants which follow, note that all of the questions asked by A are answered by B. That is, M-1 is answered by M-2 and so forth. In other words, you can make up new dialogues by combining the lines from the M-variants. More important, however, is that you can compare the lines within an M-variant and see how a small change made to an utterance brings about a change in the meaning.)

M-1

A: Kwékwé. Skennenkó:wa ken?

Shé:kon. Skennenkó:wa ken?

Kwe. Ianerátie' ken?

A: Hello. How are you?

Hello. How are you?

Hello. Is it going well?

M-2

B: Skennenkó:wa.

Skennenkó:wa. Ok ní:se'?

Ianerátie'.

B: I'm fine.

I'm fine. And you?

It's going well.

M-3

A: Nahó:ten iesá:iats?

Nahó:ten ronwá:iats?

Nahó:ten iontátiats?

Nahó:ten ronwatí:iats?

A: What's your name?

What's his name?

What's her name?

What's their (p,m) name?

M-4

B: Wá:ri ióntiats.  
 Ko:r ronwá:iats.  
 Arísawe iontátiats.  
 Montóur ronwatí:iats.

B: My name is Mary.  
 His name is Paul.  
 Her name is Elizabeth.  
 Their (p,m) name is  
 Montour.

M-5

A: Ok ní:se' ?  
 Ok ne raónha?  
 Ok nakaónha?  
 Ok ne ronónha?

A: And you?  
 And him?  
 And her?  
 And them (p,m)?

M-6

B: Wíshe ióntiats.  
 Wátio ronwá:iats.  
 Warisó:se iontátiats.  
 Sa:k tánon' Á:nen ronwatí:iats.

B: My name is Michael.  
 His name is Mathew.  
 Her name is Josephine.  
 Their names are Jim  
 and Ann.

M-7

A: Ó:nen ki' wáhi'.  
 B: Ó:nen.

A: Good bye then.  
 B: Good bye.

C-: Converse, Communicate  
 (This conversation  
 is more complex than  
 the first conversation  
 (C-1). It includes  
 material that you  
 will be practising  
 in the exercises of  
 section E.)

A group of new students are standing around.

- |  |                                      |

| A: Kwe. Sa:k ióntiats.                   | A: Hello. My name is Jim.            |
| B: Kwékwé..                              | B: Hello.                            |
| A: Ok ní:se', nahó:ten<br>iesá:iats?     | A: And you, what's your<br>name?     |
| B: Ónhka. I: ken?                        | B: Who? Me?                          |
| A: Iah, iah í:se' te. Akaónhá.           | A: No, not you. Her.                 |
| B: Á:nen iontátiats.                     | B: Her name is Ann.                  |
| A: Ok ne ronónhá?                        | A: And them?                         |
| B: Shawátis tánon' Ko:r<br>ronwatí:iats. | B: Their names are John<br>and Paul. |

### Phrases to use in Class

(These are phrases that you've heard your teacher use and that you will be needing in order to begin communicating. Start using them now!)

- |                     |                     |
|---------------------|---------------------|
| Tontasathna'néta.   | Repeat, please.     |
| Tontatsathna'néta.  | Repeat, you two.    |
| Tontasewathna'néta. | Repeat, all of you. |
| Satahón'satat.      | Listen.             |
| Tsatahón'satat.     | Listen, you two.    |
| Sewatahón'satat.    | Listen, all of you. |
| Tsí:ron...          | Say...              |
| Nahó:ten sá:ton?    | What did you say?   |

### Vocabulary

(Each lesson will contain a vocabulary section which is meant for reference. You are not expected to memorize all of the words.)

Personal Names

The list below contains names that were adapted by the Mohawks. Most of them have a French origin. "Real" Mohawk names would be too difficult to learn at this stage because they contain whole phrases, e.g. Tekaweiá:ien "Resting Wings" or Kanónhsase "New House".

A: Names for Men:

Shawátis	'John'
Sa:k	'Jim'
Wíshc	'Michael'
Tá:wit	'David'
Tie:r	'Peter'
Wátio	'Mathew'
Enthré	'Andrew'
Só:se	'Joseph', 'Joe'
Sáro	'Charles'
Atón:wa	'Thomas'
Rorén	'Lawrence'
Aprám	'Abraham'

B: Names for Women:

Á:nen	'Ann'
Warisó:se	'Josephine'
Arísawe	'Elizabeth'
Konwákeri	'Margret'
Wá:ri	'Marv'
Ákat	'Ida/Harriet'
Teré:s	'Theresa'
Wariá:nen	'Maryann'
Sosá:n	'Susan'

E-: Exercise, Expand, Extrapolate

(The following exercises should first be done in writing and then practised orally. Continue following the "A" and "B" pattern where A poses the questions and B answers.

E-1

Before doing this exercise, read Notes to the Student(1). Then study the example in No.1 below, and fill in the blanks in the other sentences following the same pattern.

- |  |   |
|--|---|
| 1. Ko:r ken ronwá:iats?<br>Hen, Ko:r ronwá:iats. | A: Is his name Paul?<br>B: Yes, his name is Paul.           |
| 2. Wa:ri iontátiats?<br>Hen,                     | A: Is her name Mary?<br>B: Yes, her name is Mary.           |
| 3. Montóur ken ?<br>, Montóur                    | A: Is their name Montour?<br>B: Yes, their name is Montour. |
| 4. Wíshe ?<br>Iah, Sa:k                          | A: Is his name Michael?<br>B: No, his name is Jim.          |
| 5. Sosá:n iesá:iats?<br>Iah, Á:nen               | A: Is your name Susan?<br>B: No, my name is Ann.            |

E-2

Carefully study the following questions and fill in the blanks. Be prepared to do them orally. That is, when presented with any question "A", you should be able to give the correct response "B". Read the Notes to the Student (2), (3), (4), (5).

- |                              |                        |

| 2. Raónha ken?               | A: <u>Him?</u>         |
| <u>Hen, .</u>                | B: <u>Yes, him.</u>    |
| 3.                      ken? | A: <u>Her (indef)?</u> |
| <u>. . . . .</u>             | B: <u>Yes, her.</u>    |
| 4.                      ?    | A: <u>You?</u>         |
| <u>. . . . .</u>             | B: <u>Yes, me.</u>     |
| 5.                      ?    | A: <u>Them (m)?</u>    |
| <u>. . . . .</u>             | B: <u>Yes, them.</u>   |
| 6.                      ?    | A: <u>Paul?</u>        |
| <u>. . . . .</u>             | B: <u>Yes, Paul.</u>   |
| 7.                      ?    | A: <u>Ann?</u>         |
| <u>. . . . .</u>             | B: <u>Yes, Ann.</u>    |
| 8.                      ?    | A: <u>Us?</u>          |
| <u>. . . . .</u>             | B: <u>Yes, you.</u>    |

E-3

Before doing this exercise, read Notes to the Student 5. Then fill in the blanks after first studying the examples in No. 1 and 2 below.

- |                            |                              |
|----------------------------|------------------------------|
| 1. Ónhka? I: ken?          | A: <u>Who? Me?</u>           |
| <u>Iah, iah í:se te.</u>   | B: <u>No, it is not you!</u> |
| 2. Ónhka? Raónha ken?      | A: <u>Who? Him?</u>          |
| <u>Iah, iah raónha te.</u> | B: <u>No, not him.</u>       |

3. \_\_\_\_\_ ? A: Who? Her (indef)?  
 \_\_\_\_\_ , iah akaónha . B: No, not her.
4. \_\_\_\_\_ ? A: Who? You?  
 \_\_\_\_\_ te. B: No, not me. Peter.
5. \_\_\_\_\_ ? A: Who? Them (male)?  
 \_\_\_\_\_ . B: No, not them. Michael
6. \_\_\_\_\_ ? A: Who? Us?  
 \_\_\_\_\_ . B: No, not you. Mary.
7. \_\_\_\_\_ ? A: Who? Ann?  
 \_\_\_\_\_ . B: No, not Ann. Her.
8. \_\_\_\_\_ ? A: Who? Jim?  
 \_\_\_\_\_ . B: No, not Jim. You.

E-4

Answer the following questions as completely as possible.  
 Be also prepared to answer these questions in class.

1. Skennenkó:wa ken? \_\_\_\_\_
2. Nahó:ten iesá:iats? \_\_\_\_\_
3. Ok ne raónha, nahó:ten ne ronwá:iats? \_\_\_\_\_
4. Ok ní:se', nahó:ten ní:se' iesá:iats? \_\_\_\_\_
5. Nahó:ten ronwatí:iats ne ronónha? \_\_\_\_\_

E-5

Now you can write a conversation in Mohawk. Working with the M-phase, combine the sentences as was done in C-1 and C-2 to make a new conversation of at least ten lines. Make sure that the conversation makes sense and is one that you would really use. Be ready to act out your conversation with a fellow student. Save your conversation and others to come for the review lessons.

In order to help you follow the correct format, write your conversation on a page organized as the one which follows marked "Student Conversation". All of your conversations should be presented in this format.

At the beginning of the conversation, name the persons involved and say where the conversation takes place.

### Notes to the Student

(The purpose of this section is to give you grammatical information about the Mohawk language. Every note is linked with one or several exercises, and you have to read the note before you can do the exercise. The Notes to the Student is your key to understanding how the language works. The C's, M's, Phrases and E's are your keys to making the language work for you --- speaking it, reading it, writing it, and being creative in it.)

- (1) All languages have two kinds of questions, information questions as in example 1. below, and yes-no questions as in 2. below.

1. question: Who's that?            answer: Jim. \_\_\_\_\_  
 2. question: Is that Jim?        answer: No.

Information questions like 1. request that a specific information is given in the answer. Questions like in 2., on the other hand, always require a yes or a no in the answer. Information questions in Mohawk are very similar to English information questions using question words like ónhka "who", nahó:ten "what", ka'nón:we "where", and kátke "when". For examples see M-3 and E-3. However, yes-no questions as in 2. above are formed in a different way, namely by placing the word to be questioned at the beginning of the sentence, and then adding the particle ken. ken simply means "question" and cannot be translated into English.

For instance:

3. Á:nen ken iontátiats?  
 Ann question they-call-her?  
 Is her name Ann?

Notes to the Student (cont'd)4. Ko:r ken thi?

Paul question that?

Is that Paul?

Mohawks do not raise their voice at the end of a question like speakers of English do. Listen to questions on the tapes and imitate their intonation carefully. A good way to practice intonation is by humming the melody of a sentence.

- (2) Mohawk has two sets of pronouns: "free pronouns" and "bound pronouns". The free pronouns are a word in themselves, they can stand alone and are not part of a verb. ~~See for instance E-2 and E-3 above.~~ The free pronoun is used for emphasis or clarification. Below is a list of the free pronouns that exist in Mohawk.

í'i	I/me, we/us
í:se'	you/you (singular and plural)
raónha	he/him
akaónha	she/her/one (indefinite)
aónha	she/her/it (neuter)
ronónha	they/them (males, and mixed group)
onónha	they/them (females, indefinite, neuter)

Bound pronouns are "bound" to the verb, they are part of it. Take, for instance, M-3 above. ronwá:iats means literally "they-him-name" and iontátiats means "they-her-name".

Notes to the Student (cont'd)

- (3) You notice that the above list of free pronouns contains two forms for "she/her", i.e. akaónha "she/her/one" (f) and aónha "she/her/it" (neuter). akaónha is used if you are referring to a person you like and respect, a girl, a gentle person, your mother, or a female whose identity you do not know. aonha is used to refer to females you do not particularly care for, or who you consider foolish and pushy. For instance, talking about your sister, you would usually use akaónha. However, if you should get mad at her, you might switch to aónha. aónha is also used to refer to animals and inanimate things.
- (4) Besides the two "she" forms there are also two "they/them" listed in Note (2) above. The information in the brackets behind each form tells you their meanings. The distinction between the two "she" and the two "they" forms is not only made in the free pronouns but also in the bound ones. For example, in M-1 we had nahó:ten iontátiats for "what's her name?". Iontátiats is the female indefinite form corresponding to akaónha. The form that corresponds to the aónha pronoun is nahó:ten konwá:iats "what's her (neuter) name?". The same is true for the "they" forms. Compare nahó:ten ronwatí:iats "what's their (male or mixed) name?" with nahó:ten konwatí:iats "what's their (female) name?". In the early lessons, we will concentrate on the "she/her (indefinite)" and on the "they/them (males and mixed)" forms. The other forms will be learned later. The they forms referring to three or more males or males and females are marked "they(p,m)", where p stands for plural and m stands for masculine or mixed.

## Notes to the Student (cont'd)

- (5) "No" or "not" is expressed in Mohawk by "iah", and the particle te. If you have an English sentence like "no, it's not John", the corresponding Mohawk sentence will contain two iah.

Iah, iah Shawátiis te.

No, it's not John.

However, if you simply want to say "it is not John", only one iah shows up.

Iah Shawátiis te.

It's not John.

LESSON 2

C-: Converse, Communicate

C-1

Two guys are standing next to each other. A third one is walking up to them.

E-7

Last time, you yourself made up a conversation in Mohawk. This, you will recall, was based on the materials you previously learned. Now you can do the same with this lesson. However, you have more than this lesson's material to work with. You have that of the previous lesson, too. This means that you can now write a longer and more complete conversation than before. Try your hand at this and be ready to perform your new conversation in class. Your conversation should be at least eight lines long. Please note, by the way, how your ability to function in Mohawk rapidly increases with each new lesson. Already, in Lesson 2, you can use material from Lesson 1 and 2 in writing and performing a new conversation. Think of how this potential will increase when you reach Lesson 5 or 10 or 20. Remember to save your conversations for the review lesson.

Notes to the Student

(1) In M-2 you learned that there are two words for "my friend", ontiatén:ro' if a male talks about another male and ontia'tshi if a female talks about another female. A male cannot refer to a female as a friend unless he is talking about his girl friend. The word for girl friend is ákskare'. The same word is used if a woman or girl talks about her boyfriend.

(2) In M-5 you get sentences like

Tánon' ónhka ne:ne ronónha?

And who they?

And who are they?

Ne: is an abbreviation of né:'e 'that one' which can act as the third person emphatic pronoun similar to í:'i 'I' and í:se' 'you'.

The particle ne is a definitizer which is sometimes translated as 'the' or 'who', but often has no equivalent in English. Ne often merges with the following word, e.g.:

ne plus í:'i merges to ní:'i

ne plus í:se' merges to ní:se'

ne plus ontia'tshi merges to nontia'tshi.

(3) In L-1 you learned about free pronouns, that is pronouns that can stand alone like í:se' "you" or raónha "he". Besides free pronouns Mohawk has also bound pronouns, which are attached to the verb root. That is, bound pronouns can never stand alone. You already learned a number of these bound pronouns in this lesson, namely in M-3 and in M-6. Below the forms of "to be a student" are listed again. The bound pronouns are separated from the verb root by a dash. Notice, that in no. 4 and no. 5

Notes to the Student (cont'd)

below the a of -aterihwaiénstha is dropped.

- |         |                 |                          |
|---------|-----------------|--------------------------|
| 1. k-   | aterihwaiénstha | I am a student.          |
| 2. s-   | aterihwaiénstha | You are a student.       |
| 3. r-   | aterihwaiénstha | He is a student.         |
| 4. ion- | terihwaiénstha  | She/one is a student.    |
| 5. ron- | terihwaiénstha  | They (p,m) are students. |

Below is a list of those personal pronouns that you have learned so far. Variations within individual pronouns can be predicted on the basis of the verb stem. For example, the "he" pronoun can be in Mohawk either a r- or a ra-. It is ra- if the first sound of the stem is a consonant as in -hni:nons "to buy", resulting in rahni:nons "he buys". It is r- if the first sound of the verb stem is a vowel as in -aterihwaiénstha "to be a student", resulting in raterihwaiénstha "he is a student".

Mohawk verbs fall into five major classes, which sometimes are further subdivided or which can also merge. The five classes are:

1. verbs that begin with a consonant -consonant-stem class
2. verbs that begin with an i sound -i-stem class
3. verbs that begin with an a sound -a-stem class
4. verbs that begin with an e or en sound -e,en-stem class
5. verbs that begin with an o or on sound -o,on-stem class

In the list below and in other lists in future lessons, you will see entries like this:

he

1. consonant-stem: ra-  
e.g. ra-hni:nons "he buys"

This is to be read as: "he" in Mohawk is expressed by ra- before stems that begin with a consonant.

Notes to the Student (cont'd)

The list below is rather complex. However, it is not necessary that you learn at once all of the distinctions listed. Try to remember the major ones and use the list for reference. You can always come back to it if you are not sure about a specific pronominal forms.

6. Raterihwaiénstha ken ne iahtsí.'a? \_\_\_\_\_
7. Ok nontiatén:ro, raterihwaiénstha ní:ken né'e? \_\_\_\_\_

## E-8

Using the material that you have covered in the last three lessons, write a real-life conversation. To make it as real as possible, describe in English where and when your conversation takes place. State who's there and what the people are doing. This will provide the setting for your conversation. Try to include in your conversation some of the sentences you have learned in the exercises. Be creative!

Notes to the Student

1. Mohawk kin terms reflect the relationships that existed traditionally in Mohawk families. All kin terms are verbs, and the bound pronoun that is chosen reflects the speaker's attitude towards his kin. Relative age of the persons involved is of utmost importance; i.e. an attitude of deference is shown towards members of an older generation (grand-parents, parents, etc.) or older members of the same generation (older sister, older brother). The older person will usually be the agent in a relationship.

The list below gives an idea of the distinctions involved.

akhsó'tha	"my grandmother"	lit: "She to me is grandmother"
rake'níha	"my father"	lit: "He to me is father"
rién:'a	"my son"	lit: "I have him for son"
kheién:'a	"my daughter"	lit: "I have her for daughter"
rakhtsí:'a	"my older brother"	lit: "He has me for brother"
ri'kén:'a	"my younger brother"	lit: "I have him for brother"

In some relationships the people involved are considered to be of equal status, for example:

ontiararasé:'a	"my cousin"	lit: "We(d) are cousins"
ontiatén:ro'	"my friend(m)"	lit: "We(d) are friends"
sewatén:ro'	"your friends(m)"	lit: "You(p)are friends"

2. In the list of kinship terms you find that the word for "my aunt" is matént, which is a borrowing from French "ma tante". The reason is that in traditional Mohawk society the notion of "aunt" did not exist. All persons that we would call "aunt" in the English kinship system were called "mother" in the Mohawk system. For instance, if you talked about your biological mother, you would say: istén:'a "my mother", while if you talked about your mother's sister you would say istén:'a plus her name, i.s.

Notes to the Student (cont'd)

istén:'a Á:nen "mother Ann". When addressing any of your mothers you would always say istá: "mother". This system is still used by some of the older speakers of Mohawk.

3. In the Notes to the Student of Lesson 1, you learned that Mohawk has two "she" forms, she/one (indefinite) and she/it (neuter). It is the she/one form that we are using in the early lessons. However, in the list of kinship terms, the "her" forms are in the neuter form, because speakers of Mohawk generally prefer to use the she/it (neuter) form when talking about relatives. Only when talking about children are both forms commonly used. Thus you will hear all four of the forms listed below.

ronwatiien'okón:'a	"her (indef) children"
akoien'okón:'a	"her (neuter) children"
ronwanatere'okón:'a	"her (indef) grandchildren"
akotere'okón:'a	"her (neuter) grandchildren"

4. In M-3 you have learned that Mohawk has three different forms for the English "sit down!" or "you sit down!". The form used by the speaker depends on whether he is talking to one person, to two persons, or to three or more persons. If he is talking to two persons, the forms are marked in English with a (d), which stands for "dual". Dual means "two" in Latin. If the speaker is talking to three or more persons, the forms are marked (p), which stands for "plural". If only one person is addressed, the "you" forms remain unmarked. The "you" singular forms are discussed in Lesson 2, Notes to the Student, 3. The forms used to express "you(d)" and "you(p)", are listed below.

you (d)

1. consonant stems:

e.g.: seni-hní:nons  
seni-natá:res

"you (d) buy"

"you (d) make visits"

seni-

2. i, e, en, o, on stems:

e.g.: sen-entórha  
sen-ón:nis

sew-

3. i stems (loss of i):

e.g.: sewén:-teron  
sewén:-tenhre'

"you (p) stay, live"

"you (p) have pity"

sewen-

4. on, o stems:

e.g.: ts-ó'kwats  
ts-ón:nis

"you (p) dig"

"you (p) make it"

ts-

Notes to the Student (cont'd)

5. In this lesson, you learned some commands in Mohawk like sátien "sit down!" and tsatíta "you (d) get in!" Command forms are the simplest verb forms in Mohawk. Below is a list of the most common ones. All command forms are in the "you" form, that is in Mohawk you have to say "you drink!" instead of simply saying "drink!". In the list below, the pronouns are separated from the verb by a dash. This gives you another chance to study the forms of the three different "you" pronouns. (see L-17, Note 7).

1.	s -hnekí:ra	"drink!"
	seni-hnekí:ra	"drink(d)!"
	sewa-hnekí:ra	"drink(p)!"
2.	s -kóha	"go get it!"
	seni-kóha	"go(d) get it!"
	sewa-kóha	"go(p) get it!"
3.	ken nontá:-s -e	"come here!"
	ken nontá -sen-e	"come here (d)!"
	ken nontá -sew-e	"come here (p)!"
4.	wa:-s	"go!"
	wá:-sen-e	"go (d)!"
	wá:-sew-e	"go (p)!"
5.	te-s -tán	"stand up!"
	te-sení:-tan	"stand(d) up!"
	te-sewá:-tan	"stand(p) up!"
6.	ka:t-s	"come here!"
	ká- sene	"come(d) here!"
	ká- sewe	"come(p) here!"
7.	s -atíta	"get in!" (a vehicle)
	ts -atíta	"get in(d)!"
	sew-atíta	"get in(p)!"

## E-11

Use the material you have covered in the last four lessons to write a conversation. This time assume that the conversation involves three people. Try and make up some new sentences by using the techniques which you learned in the exercises, that is, by replacing the words in an already known sentence with new ones. For example, you learned the sentence ontiátshi tié:teron "my friend(f) is at home". Now you want to say "my aunt is at home". So you look up "my aunt" in the vocabulary list in Lesson 3, you find matént, and you put it in the sentence, getting matént tié:teron. This way you can make up a lot of new sentences. Be creative!

Notes to the Student

1. In this lesson, you learned some of the ways Mohawk speakers use to negate a sentence. Mohawk negation involves two elements, iah and te-. While iah is always placed at the beginning of the sentence, the position of te- can vary depending on what you negate and on what you want to say.

a. negation of verbs:

If a verbal form like "I hunt" is negated, the te- is prefixed to the verbal form, e.g.

kató:rats	"I hunt"
<u>iah</u> <u>te</u> kató:rats	"I don't hunt"
katétsen'ts	"I'm a doctor"
<u>iah</u> <u>te</u> katétsen'ts	"I'm not a doctor"

b. negation of nouns (excluding persons):

If a noun like "purse" is negated, the te follows the noun. In this case te can also take the longer form te:ken, e.g.

kahná:ta'	"(It's) a purse"
<u>iah</u> kahná:ta' <u>te</u>	"it's not a purse"
<u>iah</u> kahná:ta' <u>té:ken</u>	"it's not a purse"
atiá:tawi'	"(It's) a dress"
<u>iah</u> atiá:tawi' <u>te</u>	"it's not a dress"
<u>iah</u> atiá:tawi' <u>té:ken</u>	"it's not a dress"

c. negation of nouns representing persons:

If a noun like raksá:'a "child(m)", "boy" is negated, a speaker of Mohawk has two choices depending on what he wants to express. If the te- is prefixed to the word, the speaker is negating that the person talked about is a child, an old man etc.. If, on the other hand, the

Notes to the Student (cont'd)

speaker wants to say that "it is not X", then the te follows. Below are some examples that will help you to distinguish between the two meanings.

<u>iah</u> <u>tehaksá:</u> 'a	"he's not a child(m)"
<u>iah</u> <u>raksá:</u> 'a <u>te</u> ( <u>té:ken</u> )	"it's not the child(m)"

<u>iah</u> <u>tehokstén:</u> 'a	"he's not an old man"
<u>iah</u> <u>rokstén:</u> 'a <u>te</u> ( <u>té:ken</u> )	"it's not the old man"

<u>iah</u> <u>teiontiatén:</u> ro'	"we(d) aren't friends"
<u>iah</u> <u>ontiatén:</u> ro <u>te</u>	"it's not my friend"

Notice that the initial r of raksá:'a and of rokstén:'a becomes an h when te- is prefixed.

d. negation of personal pronouns:

The negation of personal pronouns varies slightly from the negation of personal nouns discussed under c. above. If you want to say "not me, you, etc." the te is dropped and a ne shows up in its place.

<u>iah</u> <u>ní:se'</u>	"not you"
<u>iah</u> <u>í:se'</u> <u>te</u> (:ken)	"it's not you"
<u>iah</u> <u>ní:'i</u>	"not me"
<u>iah</u> <u>í:'i</u> <u>te</u> (:ken)	"it's not me"

Both sentences iah ní:'i and iah í:'i te are reductions of longer sentences. Let's look at some questions and their answers. A question like:

Sató:rats ní'ken ní:se'? "Are you a hunter, too?" can have a long answer like a. below or a reduced answer like b.

Notes to the Student (cont'd)

a. Iah, iah ní:'i teka- "No, I'm not a hunter"  
to:rats.

b. Iah, iah ní:'i. "No, I'm not"  
"No, not me"

Similarly, a question like:

Í:se' ken sató:rats? "Are you the hunter?"

can have a long or complete answer, as in a. below  
or a reduced answer as in b. below.

a. Iah, iah i:' tekató:- "No, I'm not the hunter"  
rats. No, it's not me who is the  
hunter.

b. Iah, iah i:' te(:ken). "No, I'm not the one"  
No, it's not me.

Ne: ne shows up in an answer that involves a third  
person like he, she, and they, e.g.:

Rató:rats ken? "Is he a hunter?"

a. Iah, iah ne ne raónha "No, he's not a hunter"  
teható:rats.

b. Iah, iah ne ne raónha. "No, he's not."  
No, not him.

2. You will have realized by now, that the order in which the words occur in a Mohawk sentence is different from the order in an English sentence. In order to speak good Mohawk, it is very important that you use the correct Mohawk word order. A general rule is, that in Mohawk the most important element of the sentence is placed first. For example, when you ask for a person's name, the person answering will place the name at the beginning of the sentence, e.g.

Notes to the Student (cont'd)

- |                                |                         |
|--------------------------------|-------------------------|
| 1. <u>Nahó:ten ronwá:iats?</u> | <u>Ko:r ronwá:iats.</u> |
| lit: What they-him-call?       | Paul they-him-call.     |
| What's his name?               | His name is Paul.       |

Thus, in an answer, the information asked for always comes first in Mohawk but not necessarily in English. Below is another example.

- |                              |                                 |
|------------------------------|---------------------------------|
| 2. <u>Ka' ne ia'niha?</u>    | <u>Thén:teron ne raké'niha.</u> |
| lit: Where (is) your father? | lit: At home my father.         |
| Where's your father?         | My father is at home.           |

The same thing happens in yes-no questions. Whoever or whatever you ask information about is placed first. For example, an English question like 3. below can be translated in two ways.

3. Is my mother at home?

Let's say you want to find out whether your mother is at home or some place else. In that case you question the at-home part of the sentence as in 4.

4. Tié:teron ken nistén:ha?  
 lit: She-at-home question my mother?  
 Is it at home, that my mother is?  
 Is my mother at home?

However, if you want to ask whether it's your mother or somebody else who is at home, you question isténha as in 5.

5. Isténha ken tié:teron?  
 lit: My mother question she-at-home?  
 Is it my mother who is at home?  
 Is my mother at home?

4. and 5. above also differ in the answers that are appropriate for them. In 4. you asked information about the being-at-home, so that part will come first in your answer, whether it is a positive one as in 6. or a negative one as in 7.

Notes to the Student (cont'd)

6. Hen, tié:teron nistén:'a.

lit: Yes, she-at-home my mother.

Yes, it is at home that my mother is.

Yes, my mother is at home.

7. Iah, iah tetié:teron nistén:'a.

lit: No, not she-at-home my mother.

No, it is not at home that my mother is.

No, my mother is not at home.

Question 5., on the other hand, can be answered in the following two ways.

8. Hen, sa'nisténha tié:teron.

lit: Yes, your mother she-at-home.

Yes, it is your mother who is at home.

Yes, your mother is at home.

9. Iah, iah sa'nisténha tetié:teron.

lit: No, not your mother she-at-home.

No, it's not your mother who's at home.

No, your mother is not at home.

3. The English -ty ending in counting, (e.g. twenty) is expressed by niwáhsen in Mohawk. You can now make up all the numbers from one to one hundred.

tékeni tewáhsen	twenty
tewáhsen áhsen	twenty three
áhsen niwáhsen	thirty
áhsen niwáhsen wisk	thirty five
énska tewen'niáwe'	one hundred
tékeni tewen'niáwe'	two hundred
áhsen tewen'niáwe' tánon'	three hundred and thirty five
áhsen niwáhsen wisk

E-4

Free conversation:

Close your books and converse with your teacher on subjects that we have covered so far. Make use of the vocabulary that you know and do not slip into English. In order to get the conversation going, make believe one of the following situations or any other situation you can think of.

1. You just arrived at a party and strike up a conversation with the person standing next to you.
2. You and your friend are watching a group of people. You'd like to know more about them.

E-5

Repeat E-4, but this time with a student.

E-6

Using the folded-paper technique (fold your pages down the center so that the English is on one side and the Mohawk on the other) review the C's, the M's, and the F's of lessons 1 through 4. Do this review rapidly. If you hesitate with some part of the lesson, mark that part with an "x" in pencil. After classes practice in the lab those parts marked with x's. As you learn them, erase the x's. Be sure that you know the first five lessons really well before you start on Lesson 6. This is your last chance to do any "catching up", as we will not return to the first five lessons.

E-7

Pick the best, that is the most realistic and the most complex of the four conversations you have written so far and hand it in. The teacher will choose the best four or five of these conversations and add them to this lesson for review. These conversations must be learned and performed by the class as were C-1 through C-4 of this review.

E-: Exercise, Expand, Extrapolate

E-1

Before you do this exercise, read and understand Notes to the Student, 1. Then fill in the blanks below. In the questions you have to complete the words by prefixing the personal pronoun "you" "you(d)" or "you(p)".

- |   |   |
|---|---|
| 1. <u>Tsató:rats ken?</u><br>Hen, iatiató:rats.   | A: <u>Do you (d) hunt?</u><br>B: _____          |
| 2. <u>          atshó:kwas ken?</u><br>Hen,       | A: <u>Do you (p) smoke?</u><br>B: _____         |
| 3. <u>          atá:wens ken?</u><br>Hen,         | A: <u>Do you (d) swim?</u><br>B: _____          |
| 4. <u>          atké:rons           ?</u><br>Yah, | A: <u>Do you peddle (things)?</u><br>B: _____   |
| 5. <u>          atenhní:nons       ?</u><br>Hen,  | A: <u>Do you (p) sell (things)?</u><br>B: _____ |
| 6. <u>          atonkária'ks       ?</u><br>Hen,  | A: <u>Are you (d) hungry?</u><br>B: _____       |
| 7. <u>          atkáthos           ?</u><br>Iah,  | A: <u>Do you (p) see it?</u><br>B: _____        |
| 8. <u>          hní:nons           ?</u><br>Iah,  | A: <u>Do you (d) buy?</u><br>B: _____           |

E-2.

Fill in the blanks. The occupations are listed in the vocabulary.

- |  |   |
|--|---|
| 1. <u>Satétsen'ts ní'ken ní:se'?</u><br>Hen, katétsen'ts ni ní:'i. | A: <u>Are you a doctor, too?</u><br>B: <u>Yes, I'm a doctor, too.</u>               |
| 2. <u>Satenhní:nons               ?</u><br>Hen, _____.             | A: <u>Are you a salesman, too?</u><br>B: <u>Yes, I'm a salesman, too.</u>           |
| 3. <u>          ní'ken ní:se'?</u><br>Hen, _____                   | A: <u>Are you (d) doctors, too?</u><br>B: <u>Yes, we (d,excl) are doctors, too.</u> |

4. \_\_\_\_\_ ? A: Are you (p) steelworkers, too?  
 B: Yes, we (p,excl) are steelworkers, too.
5. \_\_\_\_\_ ? A: Are you (p) salesmen, too?  
 B: Yes, we (p,excl) are salesmen too.

E-3

Fill in the blanks. If you do not know the exact pronominal form for a given stem, go back to those lessons in which these forms are discussed. For instance, for "she" or "they(p,m)" forms go back to Lesson 2, Notes to the Student, 3.

1. Ratétsen'ts ní'ken né:'e? A: Is he a doctor, too?  
 Hen, ratétsen'ts ni' né:'e. B: Yes, he's a doctor, too.
2. Iakotkén:se' ? A: Is she a fortuneteller, too?  
 \_\_\_\_\_ B: Yes, she's a fortune-teller, too.
3. \_\_\_\_\_ A: Is he a cook, too?  
 \_\_\_\_\_ B: Yes, he's a cook, too.
4. \_\_\_\_\_ A: Are they (p,m) hunters, too?  
 \_\_\_\_\_ B: Yes, they (p,m) are hunters, too.
5. Ratiién'thos A: Are they (p,m) farmers, too?  
 \_\_\_\_\_ B: Yes, they (p,m) are farmers, too.
6. \_\_\_\_\_ A: Is she a peddler, too?  
 \_\_\_\_\_ B: Yes, she's a peddler, too.

E-4

After having done E-2 and E-3, can you explain, when to use ni', ní:'i, ni' ní:se' or ni' né:'e? It's simple. For the first person, i.e. "I", "we (d)" and "we (p)" ni' ní:'i is used because í:'i stands for "I" or "we". For the second person, "you", "you (d)" and "you (p)" it's ni' ní:se' and for all third persons i.e. "he", "she/one", "she/it", "they", it's ni' né:'e.

- |   |   |
|---|---|
| 1. Saterihwaiénstha ní'ken<br><u>ní:se'</u><br>Hen, | A: Are you a student, too?<br>B: <u>Yes, I'm a student, too.</u>                                    |
| 2. _____  | A: Is he a hunter, too?<br>B: <u>Yes, he's a hunter, too.</u>                                       |
| 3. _____  | A: Are you (p) steelworkers,<br>too?<br>B: <u>Yes, we (p,excl) are<br/>steelworkers, too.</u>       |
| 4. Iekhón:nis                    ?<br>_____         | A: Is she a cook, too?<br>B: <u>Yes, she's a cook, too.</u>   |
| 5. _____  | A: Are they (p,m) electrici-<br>cians, too?<br>B: <u>Yes, they (p,m) are<br/>electricians, too.</u> |

E-5

Before doing this exercise, read Notes to the Student, 2, then fill in the blanks.

- |   |   |
|---|---|
| 1. Ratétsen'ts ken?<br><u>Iah, iah tehatétsen'ts.</u> | A: Is he a doctor?<br>B: <u>No, he's not a doctor.</u>                        |
| 2. _____                    126<br><u>Iah,</u>        | A: Are they (p,m) salesmen?<br>B: <u>No, they (p,m) are not<br/>salesmen.</u> |

- |    |  |   |
|----|--|---|
| 3. |  | A: Is Jim a carpenter?<br>B: <u>No, he's not a carpenter.</u>             |

| 7. |  | A: Are they (p,m) students?<br>B: <u>No, they (p,m) are not students.</u> |

E-6

Before doing this exercise, read Notes to the Student, 3, then fill in the blanks by adding the pronominal prefix and the habitual suffix. Use 1. below as an example.

- |    |                 |                                 |   |

E-10

Write a conversation or a story, in which you make use as much as possible of the different "you" and "we" forms. Be careful not to mix up the forms. The best way to avoid this is by writing behind each pronoun in the English version what you are talking about. For example, do not just write "we", but "we (d,excl)" or "we (p,excl)" and check whether your conversation makes sense. For example, if you ask a question with a "you (p)" in it, your answer will usually contain a "we (p,excl)".

## Notes to the Student

1. In the <sup>38</sup>previous lessons, you have learned that Mohawk has three "you" forms compared to only one in English. In this lesson, you will have noticed that Mohawk also has several "we" forms. Actually, there are four "we" forms, but you have only learned two of them so far. These two are "we(p,excl)" and "we(d,excl)". You already know that p stands for plural and d for dual, but how about excl? Excl stands for exclusive and it means that the speaker excludes the person he's addressing from his statement. For example you meet three of your friends on the street and one of them says in Mohawk: We just ate. The "we" excludes you, the person addressed. So "we(p,excl)" literally means: "we three or more persons excluding the person addressed" while "we(d,excl)" means: "we two persons excluding the person addressed".

Obviously, a speaker of Mohawk sometimes also wants to include the addressed person into his statement. In that case he'll use a different form which we call inclusive. There are two inclusive "we" forms, namely "we(p,incl)" and "we(d,incl)" depending on the number of persons involved. The inclusive "we" forms will be learned later.

Below is a list that tells you which prefix is used with a given stem.

we (d, excl)

1. consonant stems:

iakeni-

- e.g.: iakeni-kowá:nen "we(d,excl) are big"  
iakeni-ién'thos "we(d,excl) farm"  
iakení:-kens "we(d,excl) see her"

Notes to the Student (cont.'d)2. i, e, en, o, on stems:

iaken-

- e.g.: iaken-ón:nis "we(d,excl) make it"  
iaken-éhre' "we(d,excl) think, want"  
iaken-í:teron "we(d,excl) live, stay"

3. a stems:

iati-

- e.g.: iati-ató:rats "we(d,excl) are hunters"  
iati-aterihwaiénstha "we(d,excl) are students"

we (p, excl)

1. consonant stems:

iakwa-

- e.g.: iakwa-kowá:nen "we(p,excl) are big"  
iakwa-ién'thos "we(p,excl) farm"  
iakwá:-kens "we(p,excl) see her"

2. i, a, e, en stems:

iakw-

- e.g.: iakw-én:teron "we(p,excl) live, stay"  
iakw-éhre' "we(p,excl) think, want"  
iakw-ató:rats "we(p,excl) are hunters"

3. on, o stems:

iati-

- e.g.: iati-ón:nis "we(p,excl) make it"

2. You have learned that in Mohawk the third person masculine singular and plural pronouns usually start with a r-, e.g. r-, ra- "he" and ron-, rati- "they(p,m)". However, this r- changes to an h- if the pronoun is not at the beginning of a word, that is if a prefix occurs like the negative prefix te-, the cislocative prefix t-, or the translocative prefix i-/ie-.

Notes to the Student (cont'd)

| 6. a) ratikhón:nis    | "they are cooks"                            |
| b) iah tehatikhón:nis | "they are not cooks"                        |

3. You will have noticed in this lesson (e.g. M-2, M-4, and M-5) that the verbs indicating a profession usually end in an -s suffix. This suffix indicates that the subject of the verb is doing something habitually like "being a hunter" or "being a doctor". For example, if you know the verb root for "to plant" which is -ien'tho-, you can make up the form "he is a farmer" by adding the prefix for "he" and the suffix for the habitual aspect, forming ra-iéntho-s "he's a farmer", "he plants".

Sometimes the -s suffix takes the form of -as as in rate:kwás 'he runs away habitually' and katsho'kwás 'I smoke'.

(see also L-19, Note 8)

- \* The change r → h does not take place in some of the verbs that belong to the en-/on- class, e.g.: iah tehrento:re' 'he's not difficult', iah tehrentorha 'he's not lazy', iah tehronk-wehti:io 'he's not good-looking', iah tehronhe:wa's 'he doesn't sweep'.

## E-13

A fortuneteller is telling you about your past and present life. You answer him by starting with Kwa iah káneka tetisaierí:ton "you didn't get anything right", and then continue from there. You correct the fortuneteller's statements and tell your "true" story using the "I" form.

Shakothkén:se': "Ko:r iesá:iats, wáhi. Wátio ronwá:iats ne ia'níha, tánon' Warisó:se iontátiats ne sa'nistéha. Kaié:ri nisatatekén:shen, wáhi. Rontenhní:nons. Ó:ia' tkaaná:taien tsi nón tehsí:teron. Í:se' : "Kwa iah káneka tetisaierí:ton .....

Vocabulary

ón'te	Cannot be translated into English. It is used with certain sentences that express uncertainty, e.g. the sentences that start with <u>kwah í:kehre'</u> "I think that...".
tsi nón:	the place where...
Aterónto	Toronto
nón:wa'	now

Notes to the Student

1. Mohawk has several suffixes that indicate locations. One of them is the -ne/-ke suffix which you learned in M-3. Depending on the context -ne/-ke can be translated as "at", "in", "on" or "to" in English. In the vocabulary list you find many examples. -ne/-ke is usually appended to the end of the word, with the exception of kinship terms. Compare Kó:rne "at Paul's place" with rakhtsinéha "at my older brother's place". In rakhtsinéha -ne is placed before the final syllable (h)a, while in Kó:rne -ne is placed at the end. All kinship terms, that is all words for relatives, follow the pattern of rakhtsinéha, all personal names and other nouns follow the pattern of Kó:rne. If you look at the vocabulary list of this lesson (locations), you will also notice that in some cases the -ne is replaced by a -ke, for example in ontiatenró:ke "at my friend's (m)" or in kheken'kéha "at my younger sister's place". When to use the -ne and when the -ke suffix is difficult for you to predict, you will simply have to learn the forms. The -ne/-ke suffix is also used for expressions involving time similar to the English use of "in" and "at" in "at night" or "in the morning". Below are some Mohawk examples:

akennhá:ke	"in the summer"
ahsonthén:ne	"in the night"

For more examples, see the Vocabulary Section.

2. In Mohawk the expression "at/to/in the place where" is rendered by tsi nón:we or a shortened form tsi nón:. For example,

tsi nón: tható:rats	"at, to, in the place where he goes hunting"
---------------------	--

Notes to the Student (cont'd)

tsi nón: iehakhón:nis "at, to, in the place where he cooks"

tsi nón: tié:teron "at, to, in the place where she lives"

Often tsi nón: is even shortened further to tsi.

tsi tié:teron "at, to, in the place where she lives"

tsi tewatió'te' "at, to, in the place where I work"

More examples are listed in the Vocabulary section.

3. Mohawk has two prefixes, the translocative and the cislocative, which indicate where the action takes place with respect to the speaker.

a. the translocative indicates that the movement is away from the speaker. It is expressed by i-, e.g.:

ién:ke' "I shall go"

ia'satáweia't "go in!"

ia'tsá:ken'n "go on out"

b. the cislocative is expressed by a t-. It has two meanings:

1. motion towards the speaker. This meaning occurs with verbs of motion. Below are a number of examples:

éntke' "I shall come"

tasatáweia't "come in"

ta'tsá:ken'n "come on out"

2. an action takes place 'over there', e.g.:

tható:rats "he is there and he hunts"

thén:teron "he is there where he is staying"

Notes to the Student (cont'd)

The examples below show the difference between the cislocative and meaning 1. of the translocative:

<u>ten</u> haráhtate'	"he'll run"
ten <u>th</u> aráhtate'	"he'll start over there and he'll run towards speaker"
<u>ia</u> 'tenharáhtate'	"he'll start over here and he'll run away from speaker"
<u>tas</u> até:ser	"come crawl over!"
<u>ia</u> 'saté:ser	"go crawl over!"

Another meaning difference that can be expressed by the two prefixes is the following:

<u>ie</u> :rate'	"he is standing over there with his back to the speaker"
<u>íth</u> rate'	"he is standing over there facing the speaker"
<u>ia</u> 'teshakoká:nere'	"he is looking at her"
<u>teteshon</u> waká:nere'	"he is looking at us"

The meaning distinctions between the cislocative and meaning 2. of the translocative are sometimes difficult to capture in English. The cislocative emphasizes that the person talked about is 'over there', while the translocative i-emphasizes the motion away from the speaker. Compare the examples below:

<u>thoió</u> 'tens	"he works over there"
<u>iehoio</u> 'tens	"he works over there" (he came from here)
<u>thoi</u> o'te'	"he is working over there"
<u>iehoio</u> 'te'	"he is working over there" (he came from here)

Notes to the Student (cont'd)

<u>en</u> thoió'ten'	"he'll work over there" (he is there and he'll work)
<u>ien</u> thoió'ten'	"he'll go there and he'll work"
<u>tho</u> io'tén:'en	"he is there and he has worked there"
<u>ieho</u> io'tén:'en	"he had gone there and he worked there and he is back"
<u>tho</u> ió'ten	"let him work there"
<u>ieho</u> ió'ten	"let him go there and work"
ken' í:re's	"he is here"
kaná:takon í <thre< u="">'s</thre<>	"he is in town"
kaná:takon <u>ie</u> :re's	"he is in town" (he came from here)

The two prefixes undergo rather complex changes when affixed to a verb. The arrow stands for 'becomes'.

1. i- → ie- before a consonant, e.g.:

iehaien'thos "he is there farming"

i- → ia'- before the duplicative prefix t- and before the second person pronoun in the imperative, e.g.:

ia'tenhatska:hon "he'll go there and eat"

ia'sato:rat "go and hunt there"

i- → ion- before the iterative prefix s-, e.g.:

ionsasataweia't "go in again"

Notes to the Student (cont'd)

2. t- → ta- before the second person subjective pronoun  
in the imperative:

<u>tasata</u> weiat	"come in"
<u>tasató</u> :rat	"hunt there"

t- → ti- before the second person objective pronoun:

<u>tisai</u> ó'tens	"you work there"
<u>tisatorá</u> :ton	"you have hunted over there"

Both prefixes merge with the definite prefix wa'-, e.g.:

<u>waható</u> :rate'	"he hunted"
<u>taható</u> :rate'	"he hunted there"
<u>iaható</u> :rate'	"he went there to hunt"

Both prefixes combine with other prefixes but their relative order is different. While the translocative always occurs at the beginning of the word, the cislocative t- usually occurs just before the personal pronoun except when the definitive prefix wa'- is present.

4. In M-9 you learned the expression wáhi which corresponds to English tag questions like "isn't it (he, she)" etc.. If a speaker uses wáhi he expects you to confirm whatever he has said. Wáhi can also be used as emphatic morpheme, for example in: Kanó:ron wáhi "Gee it's expensive". The difference between (1) Kanó:ron wáhi "Gee it's expensive" and (2) Kanó:ron, wáhi "It's expensive, isn't it", is expressed by a pause. In (2), you make a pause between kanó:ron and wáhi, in (1) you do not make a pause.

Notes to the Student (cont'd)

5. It was pointed out before (see Notes to the Student, 2, Lesson 4) that Mohawk places the word that is to be emphasized at the beginning of the sentence. For example,

Sa:k ken ne rató:rats? "Is Jim the one who is a hunter?"

Rató:rats ken ne Sa:k? "Is Jim a hunter?"

If one wants to emphasize a pronoun, it is usually the free pronoun that appears at the beginning of the sentence, e.g.:

1. a) I: ken kekhón:nis? a) Am I the one who is the cook?
- b) Hen, í:se' sekhón:nis. b) Yes, you are the one who is the cook.
2. a) Raónha ken rakhón:nis? a) Is he the one who is the cook?
- b) Hen, raónha rakhón:nis. b) Yes, he's the one who is the cook.

Sentence 2. above can, however, also be expressed in the following ways:

3. a) Ne: ken ne rakhón:nis? a) Is he the one that is the cook?
- b) Hen, ne: ne rakhón:nis. b) Yes, he's the one that is the cook.
4. a) Ne: ken thi ne rakhón:- a) Is that the one who is the cook?
- nis? b) Yes, that's the one who is the cook.
- b) Hen, ne: thi ne rakhón:nis.

## E-12

Write up the "lifestory" of a friend. Tell the name, place of origin, where your friend lives now, the name of the parents, or friends, and where they are from and live now. You can also talk about his or her job. You should have all the sentences you need in the lessons you have learned up to now. Be prepared to tell your story in class.

Notes to the Student

1. English adjectives like "nice", "long", "big" etc. are expressed in two ways in Mohawk which are discussed below under I and II.

I. A suffix is attached to the noun which does not undergo any other changes. For instance, -ko:wa "very big" is attached to takó:s "cat" to give tako'skó:wa "tiger". Below is a list of these adjectival endings together with some examples.

1. -ko:wa "very big"

examples:

kaniatara'kó:wa	"ocean", "big water"
kahonre'kó:wa	"canon", "big gun"
kanonhsakó:wa	"parliament", "big house"
a'sharekó:wa	"bread knife", "big knife"
khotkó:wa	"overcoat", "big coat"

2. -on:we "real", "genuine", "true"

examples:

onkwehón:we	"Indian", "the real man"
kana'tarokhón:we	"corn bread", "the real bread"
o'seronnión:we	"French as spoken in France"
tiorhensaka'ón:we	"English by birth"
onononseraón:we	"pumpkin"

3. -kenha "ancient", "former", "late", "what was and is no more", "what belonged to a person and does not belong any more", "expression of pity: oh the poor...".

examples:

Tierkénha	"the late Peter"
-----------	------------------

Notes to the Student (cont'd)

ra'kenihkénha	"the father that I lost"
akithsenen'kénha	"my horse that now belongs to somebody else", "my dead horse", "oh my poor horse"
akohsa:tens	
akenonhsakénha	"the house that I had", "it was my house"
kahna'tahkénha	"it was a purse", "oh the poor purse"

4. -ase "fresh", "new"

examples:

ohsé:rase	"the new year"
o'wá:rase	"fresh meat"
á:ia se'	"fresh fruit"
ona'tará:se	"fresh bread"
kaná:tase	"new town, settlement"

5. -aka:ion "old", "former"

examples:

owistaká:ion	"old money that is no longer in circulation"
kanataká:ion	"old village"
onatakaión:ne	"in Old Montreal, Notre Dame"

II. In many cases the English adjective is expressed by a verb in Mohawk. For example, kowá:nen means "it is big" and rakowá:nen means "he is big". If you want to say "it is a big house", you combine "it is big" with the word for "house" into kanonhsowá:nen lit.: "it-house-big". The form the "it" pronoun will take depends on the first sound of the noun stem. If the noun starts with a

Notes to the Student (cont'd)

consonant like in -nonhs- "house", the "it" pronoun is expressed by ka- as in kanonhsowá:nen "it is a big house". If the noun begins with an a- as in á'share! "knife", the "it" pronoun is expressed by a w-, e.g. wa'sharowá:nen "it's a big knife", and if the stem begins with an on- or o- as in onón:ta "mountain", "it" is expressed by a i- glide, e.g. ionón:tes "it's a high mountain".

Below is a list of the most common of the descriptive verbs. You will learn more about the process of combining nouns and verbs in future lessons.

1. -owa:nen "to be big"                      kowá:nen "it is big"

examples:

wa'sharowá:nen	"it is a big knife"
ka'serehtowá:nen	"it is a big car"
kahoniowá:nen	"it is a big boat"

2. -ase'tsi "new" (for objects)                      asé'tsi "it is new"

examples:

kānonhsasé'tsi	"it is a new house"
ka'serehtasé'tsi	"it is a new car"
kahonwasé'tsi	"it is a new boat"
wa'sharasé'tsi	"it is a new knife"

3. -akaion'on "old", "used", "worn"                      iokaión'on "it is old"

examples:

io'serehtakaión'on	"it is an old car"
iononhsakaión'on	"it is an old house"
io'sharakaión'on	"it is an old knife"

Notes to the Student (cont'd)

4. -i:io "nice", "good",  
"good-looking"

examples:

wa'sharí:io

ka'serehtí:io

raksa'tí:io

ieksa'tí:io

ronkwehtí:io

iakonkwehtí:io

ronkwehserí:io

iakonkwehserí:io

5. -aksen "ugly", "bad"

examples:

wa'sharáksen

kawennáksen

kanaskwáksen

ronkwehtáksen

ka'serehtáksen

6. -es "long", "high",  
"deep"

examples:

ka'seréhtes

wa'shá:res

iosheón:wes

ionón:tes

kari:wes

ioiánere "it is good"

"it is a good knife"

"it is a good car"

"he is a nice boy, a good man"

"she is a nice girl, a good woman"

"he is a good-looking man"

"she is a good-looking woman"

"he's a good person"

"she's a good person"

io'táksen "it is bad"

"it is a bad knife"

"it is a bad word"

"it is a bad animal"

"he is a bad person"

"it is a bad car"

í:iens "it is long"

"it is a long car"

"it is a long knife"

"it is a deep hole"

"it is a high mountain"

"it is a long affair"

Notes to the Student (cont'd)

7. ken'ni-----a:'a "small"      ken' niwá:'a "it is small"
- examples:
- |                    |                       |
|--------------------|-----------------------|
| ken' nikahonrá:'a  | "it is a small gun"   |
| ken' nikahonwá:'a  | "it is a small boat"  |
| ken' nikanonhsá:'a | "it is a small house" |
| ken' niwa'shará:'a | "it is a small knife" |
8. ken' ni----esha "short"      ken' niénsa "it is short"

examples:

ken' nikahonwésa	"it is a short boat"
ken' nikahonrésa	"it is a short gun"
ken' niwatia'tawitserésa	"it is a short dress"
ken' niwa'sharésa	"it is a short knife"

2. The negation of adjectival constructions is in general straightforward, that is they act exactly like other verbs, e.g.:

kanonhsí:io	"it is a nice house"
iah tekanonhsí:io	"it is not a nice house"

If the adjectival constructions contain the partitive prefix ni- as in

ken' <u>ni</u> kanonhsá:'a	"it is a small house"
ken' <u>ni</u> kanonhsésa	"it is a short house"

the ni- is dropped in negation, e.g.:

iah ken' tekanonhsá:'a	"it is not a small house"
iah ken' tekanonhsésa	"it is not a short house"

Notes to the Student (cont'd)

3. In this lesson you learned that Mohawk has more than one "they" form. The two forms learned so far are "they(p,m)" and "they(p,f)". The "they(p,m)" form is used for a group of males and for a mixed group of males and females, while the "they(p,f)" form is used for a group of females. Both "they" forms require, as the p for plural indicates, that the group contains three or more persons. Special "they" forms are used for two persons. You'll learn those later.

The bound pronouns expressing "they(p,m)" and "they(p,f)" respectively are the following:

they (p,m)

a. consonant stems:

rati-

e.g.: rati-kowá:nen "they(p,m) are big"

b. i-stems:

rat-

e.g.: rat-í:teron "they(p,m) live/stay"

c. a-stems:

ron-

e.g.: ron-tó:rats "they(p,m) are hunters"

d. e,en,o,on-stems:

ronn-

e.g.: ron:n-ehre' "they(p,m) want to"

ronn-ón:nis "they(p,m) make it"

## Notes to the Student (cont'd)

they (p,f)

### E-13

Write a letter in which you tell about the things your mother (or father, or older sister, etc.) bought. Mention where and when he/she bought it, discuss the price, etc.. You can use E-12 as an example. Make your letter about the same length as E-12.

### E-14

Prepare a short discussion on the weather. For vocabulary, see M-13, M-14, Weather Expressions in the Vocabulary Section, and E-8.

Notes to the Student

1. In M-12 of this lesson you learned how a word changes if you put a number in front of it. Here are two more examples:

(1) kanónhsa	"house"
skanónhsa	"one house"
tekanónhsake	"two houses"
áhsen nikanónhsake	"three houses"
(2) ó:wise	"drinking glass"
ska'wí:sa	"one drinking glass"
teka'wí:sake	"two drinking glasses"
áhsen nika'wí:sake	"three drinking glasses"

You notice that the words for "one" and "house" and "two" and "houses" merge. They could, however, also occur separately, especially in constructions like below.

(3) énska khok kanón'sote	"there's only one house standing there"
tékeni khok tekanón'sote	"there are only two houses standing there"

The same is true for numbers three and up. Instead of saying áhsen nikanónhsake "three houses", you can also say áhsen ní:kón kanónhsá "three (of) houses". Below are some other examples:

(4) kaié:ri nika'wí:sake	"four drinking glasses"
kaié:ri ní:kón ó:wise'	"four (of) drinking glasses"
(5) wisk niwathenno'tserá:ke	"five balls"
wisk ní:kón athén:no'	"five (of) balls"

In order to make up a numbered word in Mohawk, several steps have to be gone through. First, all nouns are divided into two classes, i.e. those that begin with a ka- or an

Notes to the Student (cont'd)

o- are in one class, and those that begin with an a- are in another class. Below are step by step instructions on how to form numbered words in the two noun classes.

1. the number "one"

- a. ka- and o- noun class: e.g. ó:wise' "drinking glass"  
 first step: drop the first syllable, in this case the o-: -wise'  
 second step: prefix ska- : skawí:se'  
 third step: change final e' to a : skawí:sa "one glass"
- b. a- noun class: e.g. á:share' "knife"  
 first step: prefix sew- : sewa'shá:ra  
 second step: change final e' to a : sewa'sha:ra  
 "one knife".

2. the number "two"

- a. ka- and o- noun class: e.g. ó:wise' "drinking glass"  
 first step: drop the first syllable, i.e. the o- : -wise'  
 second step: prefix teka- : tekawí:se'  
 third step: change final e' to a : tekawí:sa  
 fourth step: add non-singular suffix -ke : tekawí:sake "two glasses".
- b. a- noun class: e.g. á:share' "knife"  
 first step: prefix tew- : tewa'share'  
 second step: change final e' to a : tewa'sha:ra  
 third step: add non-singular suffix -ke : tewa'shara:ke "two knives".

Notes to the Student: (cont'd)

3. numbers "three" and up

Nouns that are preceded by the number three or by higher numbers differ only in one aspect from number two formations, i.e. the initial te- is replaced by a ni-. Below are some examples:

a. ka- and o- class:

áhsen nikawí:sake	"three glasses"
áhsen nikahahserá:ke	"three lamps"
áhsen nikanónhsake	"three houses"
kaié:ri nikanáktake	"four beds"
kaié:ri nikaná:tsake	"four pots"

b. a- class:

áhsen niwa'shá:rake	"three knives"
áhsen niwa'thé:rake	"three baskets"
kaié:ri niwaén:nake	"four bows and arrows"
kaié:ri niwahsí:rake	"four blankets"

One of the steps described in 1. and 2. above is that a final e' changes to an a. This is the most common process but not the only one. Some nouns add increments like -sera-, -tshera-, -ta-, or -kwa-. These increments are not translatable. They show up whenever a noun is combined with something else, e.g. with a number construction or with a verb. We cannot predict which increment a certain noun will take, it has to be learned with each noun.

Below are some examples:

ató:ken'	"axe"
sewato'kéns <u>era</u>	"one axe"
tewato'k <u>ensera</u> ke	"two axes"

Notes to the Student (cont'd)

athén: no'	"ball"
sewathénno' <u>'tshera'</u>	"one ball,"
tewathénno' <u>'tsherá:kə</u>	"two balls"
ká: sereh'	"car"
ska' seréhta	"one car"
teka' serehtáke	"two cars"
áhta.	"shoe"
sewahtáhkwa	"one shoe"
tewahtáhkwake	"two shoes"

2. In this lesson, you learned the word khok "only", which can also be shortened to -k as below, where it is suffixed to the word it modifies.

a. skawísta khok	"only one dollar"
skawístak	"only one dollar"
b. tekawístake khok	"only two dollars"
tekawístakek	"only two dollars"
c. áhsen khok nikawístake	"only three dollars"
áhsenk nikawístake	"only three dollars"
d. kaié:ri khok nikawístake	"only four dollars"
kaié:rik nikawístake	"only four dollars"

If a number ends in a sound that makes it difficult to hear a suffixed -k for "only", you would rather use the long form, for example in:

wisk khok nikawístake "only five dollars"  
 but not: wiskk nikawístake

3. In M-4 above, all verbs have the prefix wa'-, e.g. wa'khní:non "I bought it". The wa'- prefix indicates

Notes to the Student (cont'd)

that an event is definitely taking place or has definitely taken place in the past. Wa' is therefore called the "definite mode", it says that the speaker is telling the truth. Usually wa' forms are rendered in English in the past tense. Below are further examples:

wa'kató:rate'	<u>wa'</u> -k-ató:rate'	"I hunted"
wa'katé:ko'	<u>wa'</u> -k-até:ko'	"I ran away"
wahakáriake'	<u>wa</u> -ha-káriake'	"he paid it"
wa'tharáhtate'	<u>wa'</u> -t-ha-ráhtate'	"he ran"

Whenever another consonantal prefix is placed before the wa' prefix, the wa' is reduced to a', for example:

taháhawe'	t- <u>a</u> -há-hawe'	"he brought it"
tahahní:non	t- <u>a</u> -ha-hní:non	"he bought it from"
iahahní:non	i- <u>a</u> -ha-hní:non	"he went there to buy it"
nahakáriake'	n- <u>a</u> -hakáriake'	"he paid it"

Whenever wa' precedes the syllable -se, wa' changes to we-, e.g.

wésewe'	<u>wé</u> -sew-e'	"you(p) are going"
wesewahní:non	<u>wé</u> -sewa-hní:non	"you(p) bought"

4. Today's speakers of Mohawk will hardly ever use the Mohawk expressions for the days of the week that are listed under Vocabulary. Instead, the English equivalents are used even in an all-Mohawk conversation.

Notes to the Student

(1) In L-8 you had learned that there are two forms for "they". In this lesson we introduced two more forms, namely "they (d,f)" and "they (d,m)". The "they (d,f)" form you use for two females, two animals or two things i.e. for everything non-masculine, while "they (d,m)" is used for two males or for a male and a female.

The free pronouns for "they(d)" are the same as for "they(p)", namely ronónha for males and onónha for females. The bound pronouns, however, are different, namely ni- / n- / i- for "they (d,m)" and keni- / ken- / ti- for "they (d,f)".

they (d,m)

- a. before consonant stems: ni-  
 e.g. ni- hní:nons "they (d,m) buy"
- b. before e/i/en- stems: n-  
 e.g. n- í:teron "they (d,m) live"  
n- "they (d,m) are at home"  
n- éhre' "they (d,m) want it"  
n- entórha "they (d,m) are lazy"
- c. before a- stems: i-  
 e.g. i- ató:rats "they (d,m) hunt"

they (d,f)

- a. before consonant stems: keni-  
 e.g. keni- hní:nons "they (d,f) buy"
- b. before e/i/en- stems: ken-  
 e.g. ken- í:teron "they (d,f) live"  
ken- "they (d,f) are at home"  
ken- éhre' "they (d,f) want it"  
ken- entórha' "they (d,f) are lazy"
- c. before a- stems: ti-  
 e.g. ti- ató:rats "they (d,f) hunt"

Notes to the Student (cont'd)

- (2) In L-1 we talked about the two "she" forms in "Notes to the Student, 2, p. 11. The "she" form we have used so far has the free pronoun akaónha "she/one" and the bound pronoun ie- / i- / iak- depending on the verb. This pronoun can also be used to express the meaning of the English indefinite pronoun "one". For instance, ie:teron can mean "she stays" or "one stays". The second "she" form has the free pronoun aónha, which can be translated both as "she" or "it", and which will be referred to as she (neut), where (neut) stands for neuter. Which "she" form to use if you talk about a girl or a woman depends on what you think of the person in question (for more information see Lesson I). However, if you talk about an animal, you will always use the "she/it (neut)" form. The bound forms used to express "she/it (neut)" are ka- / k(en)- / w- / i-.

she/it (neut)

- |                              |                         |
|------------------------------|-------------------------|
| a. before consonant stems:   | <u>ka-</u>              |
| e.g. <u>ka-</u> hni:nons     | "she/it (neut) buys"    |
| b. before i- stems:          | <u>k(en)-</u>           |
| e.g. <u>kén:-</u> teron      | "she/it (neut) stays"   |
| c. before a / e / en- stems: | <u>w-</u>               |
| e.g. <u>w-</u> ató:rats      | "she/it (neut) hunts"   |
| <u>w-</u> éhre'              | "she/it (neut) wants"   |
| <u>w-</u> entórha            | "she/it (neut) is lazy" |
| d. before o / on- stems:     | <u>i-</u>               |
| e.g. <u>i-</u> ohétstha      | "she/it (neut) outdoes" |
| <u>i-</u> ón:nis             | "she/it (neut) makes"   |

The she/it (neut) prefixes are also used in many constructions that are translated into English as "it is" plus adjectival construction because in Mohawk one says "it blacks" rather than "it is black".

ka-nó:ron	"it is expensive"
ka-ríhton	"it is cooked"
ka-ráken	"it is white"
ká:-tens	"it is thick"
ka-ia'tasnó:re'	"it (animate) is fast"
w-á:se'	"it is fresh"
ka-hón:tsi	"it is black"
w-ahétken	"it is ugly, bad"

- (3) In M-6 you learned that in Mohawk you cannot simply say "is that your dog?" but you have to say "is that your-animal the dog?" That is, you first have to mention the general semantic class "animal", and then you specify the exact animal you are talking about. In Mohawk, such classifiers are used for animals, fruits, meats, and trees. The following are the classifier nouns used:

ka'tshé:nen	animal
káhi	fruit
o'wá:ron	meat
ó:kwire'	tree

Below are some examples:

1. Í:se' ken sa'tshé:nen thi é:rhar?  
 You quest. your-animal that dog?  
 Is that your dog?
2. Í:se' ken sáhi ki sewahió:wane'?  
 You quest. your-fruit this apple?  
 Is that your apple?
3. Í:se' ken sa'wá:ron ki kwéskwes o'wá:ron?  
 You quest. your-meat this pork meat?  
 Is this your pork?
4. Í:se' ken sá:kwire' thi wáhta?  
 You quest. your-tree that maple?  
 Is that your maple tree?

Notes to the Student (cont'd)

Noun classifiers only show up if a prefix has to be attached to the noun. For instance, in the examples 1, to 4. above, the possessive prefix s(a)- has to be attached, but because it cannot be attached to any of the special nouns like é:rhar or wáhta, the classifier noun takes over this function. If no prefix has to be added, the noun classifiers are not needed, as in the examples below:

5. Satkáhto ki é:rhar.  
Look at this dog.
6. Satkáhto ki wáhta.  
Look at this maple.
7. Satkáhto ki tako'skó:wa.  
Look at this cat-huge.  
Look at this tiger.
8. Satkáhto ki é:rharjenja.  
Look at this dog-dead.  
Look at this dead dog.

(4) In L-6 you will have noticed that the word for "kitten" is takó:s owí:ra. The word owí:ra, which means "young animal", can modify any animal name to designate the young of a species. If you add the verb root a' "to be small", you get the word owirá:'a, which means "human baby".

(5) In L-9 you learned how to enumerate objects, e.g. tekanónhsake "two houses", áhsen nikanónhsake "three houses" etc. The enumeration of living things, i.e. of people and animals, is somewhat different. For instance, the noun referring to a person or an animal is preceded by a separate numeralized word, like shaiá:ta which means something like "one-male-body". See the examples below in which the numeralized words are underlined:

- |                                     |               |
|-------------------------------------|---------------|
| 1. <u>shaiá:ta</u> rón:kwe          | "one man"     |
| 2. <u>tehniiáhse</u> tehnón:kwe     | "two men"     |
| 3. áhsen <u>nihá:ti</u> ronón:kwe   | "three men"   |
| 4. <u>tseiá:ta</u> iakón:kwe        | "one woman"   |
| 5. <u>tekeniiáhse</u> tekenón:kwe   | "two women"   |
| 6. áhsen <u>nikón:ti</u> konnón:kwe | "three women" |

The numeralized words for "one" and "two" contain the word oiá:ta "body", e.g. shaiá:ta means literally "one-he-body" and tehniiáhse means "two-they(d)-body-together". Nihá:ti and nikón:ti, on the other hand, just mean "that many of them (p,m) and "that many of them (p,f)" respectively.

Another change occurs in the noun that follows the numeralized word. Compare tehnón:kwe in example 2. with ronón:kwe in example 3. These changes involve pronouns and sometimes the pluralizer -okon:'a as in áhsen nihá:ti ratiksaokón:'a "three boys". Numerical constructions that refer to two persons sometimes contain the duplicative prefix te- which means that two persons are involved, e.g. tehniiáhse tehnón:kwe means literally "two-they (d,m)-body-together two-they (d,m)-man". Below is a list of some of the more commonly used human nouns:

a. singular masculine

- |                        |                 |
|------------------------|-----------------|
| shaiá:ta rón:kwe       | "one man"       |
| shaiá:ta ranekén'teron | "one young man" |
| shaiá:ta raksá:'a      | "one boy"       |
| shaiá:ta rokstén:ha    | "one old man"   |

b. singular feminine

- |                     |                    |
|---------------------|--------------------|
| tseiá:ta iakón:kwe  | "one woman"        |
| tseiá:ta ieiá:tase' | "one young girl"   |
| tseiá:ta eksá:'a    | "one girl (child)" |
| tseiá:ta akoksténha | "one old woman"    |

c. dual, masculine

tehniiáhse tehnón:kwe	"two men"
tehniiáhse tehninekén'teron	"two young men"
tehniiáhse tehniksá:'a	"two boys"
tehniiáhse rotikstén:'a	"two old men, "they(d) are old"
tehniiáhse ronatén:ro'	"two friends", "they(d) are friends"
tehniiáhse ronara'sé:'à	"two cousins", "they(d) are cousins"

d. dual, feminine

tekeniiáhse tekenón:kwe	"two women"
tekeniiáhse tekeniiá:tase'	"two young girls"
tekeniiáhse tekeniksá:'a	"two girls (children)"
tekeniiáhse otikstén:ha	"two old women"
tekeniiáhse oná'tsi	"two friends"
tekeniiáhse onara'sé:'a	"two cousins"

e. plural, masculine

áhsen nihá:ti ronón:kwe	"three men"
áhsen nihá:ti ratinekén'teron	"three young men"
áhsen nihá:ti ratiksa'okón:'a	"three boys"
áhsen nihá:ti rontikstenhokón:'a	"three old people"
áhsen nihá:ti ronatenro'shón:'a	"three friends"
áhsen nihá:ti ronarase'okón:'a	"three cousins"

f. plural, feminine

áhsen nikón:ti konnón:kwe	"three women"
áhsen nikón:ti kontiiá:tase'	"three young girls"
áhsen nikón:ti kontiksa'okón:'a	"three girls (children)"
áhsen nikón:ti otikstenhokón:'a	"three old women"
áhsen nikón:ti onatsihokón:'a	"three friends"
áhsen nikón:ti onarase'okón:'a	"three cousins"

You have learned above that the numeralized words contain a pronoun as in s-ha-ia:ta "one-he-body" or te-hni-iahse "two-they (d,m)-body together". The numeralized words can also combine with other pronouns like "you" and "we". This results in the following combinations:

teseniiáhse	"two of you"
teiakeniiáhse	"two of us (excl)"
teteniiáhse	"two of us (incl)"
wisk nítsón	"five of you"
wisk niátion	"five of us (excl)"
wisk nítion	"five of us (incl)"

The enumeration of animals is less complex, because the noun does not change. Usually the feminine forms are used for the numeralized nouns, i.e. skaiá:ta "one-she/it-body", tekeniiáhse and nikón:ti. The masculine form is only used if the animal in question is definitely a male, e.g. in 4. to 6. below.

1. skaiá:ta é:rhar	"one dog"
2. tekeniiáhse é:rhar	"two dogs"
3. áhsen nikón:ti é:rhar	"three dogs"
4. shaiá:ta teró:	"one bull"
5. tehniáhse teró:	"two bulls"
6. áhsen nihá:ti teró:	"three bulls"

E-14

Write a conversation using as much as possible the new material you have learned in this lesson.

Notes to the Student

1. In this lesson, you learned possessive constructions like "my dress", "your dress", etc. You will have noticed that words like "my" and "you" are expressed in Mohawk by prefixes like akwa- and sa- as in akwatha'steren "my pants" and sathá'steren "your pants". The form of these prefixes depends on the word they are attached to or, more specifically, on the first sound of the noun. There are two main classes of nouns. Below is an example of each of these classes. Compare them and see how the prefixes differ. For instance, for "my lunch" the prefix is akwa-, and for "my house" it is ake-.

- a. possessive pronouns for noun-stems that begin with a consonant.

kanónhsa

ake-	nónhsa	"house"
sa-	nónhsa	"my house"
rao-	nónhsa	"your house"
ako-	nónhsa	"his house"
ao-	nónhsa	"her house"
onkeni-	nónhsa	"her/its house"
onkwa-	nónhsa	"our (d) house"
seni-	nónhsa	"our (p) house"
sewa-	nónhsa	"your (d) house"
raoti-	nónhsa	"your (p) house"
aoti-	nónhsa	"their (d,p,m) house"
		"their (d,p,f) house"

oka:ra'

ak-	ká:ra'	"story"
sa-	ká:ra'	"my story"
rao-	ká:ra'	"your story"
ako-	ká:ra'	"his story"
ao-	ká:ra'	"her (indef) story"
		"her (neut)"

Notes to the Student (Cont'd)

onkeni-	ká:ra'	"our (d) story"
onkwa-	ká:ra'	"our (p) story"
seni-	ká:ra'	"your (d) story"
sewa-	ká:ra'	"your (p) story"
raoti-	ká:ra'	"their (m) story"
aoti-	ká:ra'	"their (f) story"

b. Possessive pronouns for noun-stems that begin with an a-.

<u>atenna:tshera'</u>		"food taken along"
akwa-	tenná:tshera'	"my food"
sa-	tenná:tshera'	"your food"
rao-	tenná:tshera'	"his food"
ako-	tenná:tshera'	"her (indef) food"
ao-	tenná:tshera'	"her (neut) food"
ontia-	tenná:tshera'	"our (d) food"
onkwa-	tenná:tshera'	"our (p) food"
tša-	tenná:tshera'	"your (d) food"
sewa-	tenná:tshera'	"your (p) food"
raona-	tenná:tshera'	"their (d,p,m) food"
aona-	tenná:tshera'	"their (d,p,f) food"

2. You know that in Mohawk a verb is always accompanied by a personal pronoun, that is you cannot just say -non:we's "like" but you have to say kenon:we's "I-like", senon:we's "you-like" etc.. However, sometimes, you are talking about another person without knowing whether that person is male or female, for instance in a question like 'Who's coming?' or 'Who bought this?'. In such a case, a speaker of Mohawk will always choose the feminine pronoun, usually the she/one form. So you will say:

Ónhka tá:ien?	Who's coming (f. indef)?
Ónhka:k tá:ien'.	Somebody is coming (f, indef).

Notes to the Students (Cont'd)

Ónhka iakóhson ki  
atiá:tawi?

Who made (f, indef) this  
dress?

The masculine pronoun is only used in a question if you are sure that the person you are asking about is male, e.g.:

Ónhka róhson?

Who made (m) it?

Ónhka tá:re'?

Who's coming (m)?

3. In an earlier lesson, you have learned the word kanó:ron "expensive" and in this lesson you have learned words like ohnakén'sa "leather" and ó:iente' "wood". If you look at M-13 and M-14 above, you notice that words like "expensive" and "leather" can be merged into one word, e.g. in kahnaken'sanó:ron "the leather is expensive". This process is called noun incorporation. It is used a lot in Mohawk. Kahnaken'sanó:ron "the leather is expensive" can be broken down in the following way:

1. ka- hnaken'sa- no:ron "the leather is expensive"  
it- leather- expensive

Below are some other examples:

2. wā- ha- ien'kwa- hni:non "he bought tobacco"  
past- he- tobacco- buy
3. wa'- ke- nakta- hni:non "I bought a bed"  
past- I- bed- buy

In order that a noun can be incorporated, it has to be the object or recipient of an action, e.g. a bed in I bought a bed in example 3. above. Some verbs do not allow incorporation. For instance, in 4. and 5. below, the patient noun á:there' "basket" has to occur separately.

4. wahatkáhto ná:there' "he saw the basket"
5. wahaka'én:ion' ná:there' "he examined the basket"

Notes to the Student (Cont'd)

Furthermore, certain specific nouns cannot be incorporated directly. Instead, a noun that represents the class of a specific noun is incorporated. For instance, you cannot say "I-dog-bought" by incorporating "dog". Instead, you have to say "I-animal-bought dog". The same is true for fruits, trees, meat, liquids and people. The incorporated nouns that can stand for people are oiá:ta' "body" and in a few cases owí:ra' "baby", "young one". In the examples below, the incorporated nouns are underlined.

6. wa'tekheia:tahkwe' n-eksá:'a  
 I- her- body- lift- up the girl  
 "I lifted the girl up"

7. ia'kheia'ténhawe' ne iakón:kwe  
 I- her- body- carry the woman  
 "I carried the woman"

8. wa'katewirará:ko' n-eksá:'a  
 I- refl- baby- take the girl  
 "I adopted the girl"

For all living animals including birds and insects, but excluding kentson "fish", the incorporated nouns that are used are -nahskwa- "animal", and sometimes also oiá:ta' "body", e.g.:

9. wa'kenahskwahní:non ne é:rhar  
 I- animal- buy- dog  
 "I bought the dog"

10. tasheia'ténhawe' ne kítkit  
 you- body- bring chicken  
 "you brought the chicken"

Notes to the Student (Cont'd)

If you look back at examples 1. to 3. you notice that the nouns are shortened when they are incorporated, e.g. ohnakén'sa "leather" becomes -hnaken'sa and kanákta "bed" becomes -nakta. Another change that occurs often is the addition of a so-called increment to the noun when the noun is incorporated. There are at least five of these increments, -sera-, -tshera-, -ta-, -hkwa-, and -a-. They cannot be translated into English and they seem to be unpredictable. That is, you have to learn which increment goes with which noun. Below is an example for each of these increments. The incorporated noun roots are underlined once, the increment twice.

11. wa-ha-token'-sera-hni:non  
past- he- axe- increment- buy  
"he bought an axe"
12. wa-ha-then no'-tshera-hni:non  
past- he- ball- increment- buy  
"he bought a ball"
13. wa-ha-tshe-ta-hni:non  
past- he- bottle- increment- buy  
"he bought a bottle"
14. wa-ha-hta-hkwa-hni:non  
past- he- shoe- increment- buy  
"he bought shoes"
15. wa-ha-wa'r-a-hni:non  
past- he- meat- increment- buy  
"he bought meat"

Notes to the Student (Cont'd)

Whether or not to incorporate a noun into the verbal structure often depends on what you want to say. Below are three Mohawk versions of the English sentence "buy a/the dress!".

16. satia'tawi'tsherahní:non "buy a dress!"  
 17. atia:tawi' shní:non "buy a/the dress!"  
 (rather than something else)  
 18. shní:non natiá:tawi' "do buy a/the dress!"

In 16., where atiá:tawi' "dress" is incorporated, you are telling somebody to buy a dress, i.e. 16. contains the most general statement of the three examples. In 17., where atia:tawi' precedes the verb, the emphasis is on "dress". The command is "buy the dress rather than something else". In 18., on the other hand, it is the verb shní:non "you buy" which stands first and therefore is emphasized, i.e. "do buy the dress".

4. In several of the preceding lessons, we encountered the prefix wa'-, wa-, as for example in wa'khní:non' "I bought it", wa'tkatskahón:ne' "I'm going to eat", and wa'éhsa' "she made it". This wa'-, wa- prefix is usually called the aorist or definite mood. It expresses the idea that a single event definitely took place or is definitely taking place right now. The wa'- prefix always precedes the personal pronoun.

1. wa' - k - ato:rat - e'  
 definite-pronoun-verb -punctual aspect  
 wa'kató:rate' "I hunted"

Notes to the Student (Cont'd)

A verb in the aorist wa'-, wa- mode always has the punctual aspect suffix, which expresses that an action took place, will take place or should take place at some specific point in time. The punctual aspect suffix is represented by the following sound combinations: -e', -a', -' or Ø. Ø stands for zero, which means the absence of a special marker as for example in the English plural for "fish", in which a special plural marker is absent.

Sometimes it is difficult to recognize the presence of wa'-, wa- because it can merge with other prefixes, e.g.:

- |     |             |                                  |
|-----|-------------|----------------------------------|
| 8.  | ta'shni:nɔn | "you bought from someplace else" |
| 9.  | tá:re'      | "he's walking towards us"        |
| 10. | sahahtén:ti | "he went home"                   |
| 11. | onkí:tawe'  | "I slept"                        |

In examples 8. to 10., the w- of wa'-, wa- was deleted.

- |     |                   |   |             |
|-----|-------------------|---|-------------|
| 8a. | t- wa'- shni:nɔn  | → | ta'shni:nɔn |
| 9a. | t- wa'- re'       | → | tá:re'      |
| 10. | s- wa'- hahten:ti | → | sahahtén:ti |

In 11. wa'- merged with the wa- of 'I', i.e. wak-, to onk-.

- |     |                   |   |            |
|-----|-------------------|---|------------|
| 11. | wa'- wak- i:tawe' | → | onkí:tawe' |
|-----|-------------------|---|------------|

5. Comparative and superlative constructions like "my shirt is nicer" and "my shirt is the nicest" are formed in the following way:

Notes to the Student (Cont'd)

a. comparative constructions

A comparison is made by placing the word sénha "more" before the verbal construction, e.g.:

sénha kowá:nen	"it's bigger"
sénha ioiánere'	"it's nicer, better"
sénha teió:ka	"it's faster"
sénha ken' niwá:'a	"it's smaller"
sénha kenón:we's	"I like it better"
sénha kanonhsowá:nen	"it's a bigger house"
sénha kanonhsanó:ron	"it's a more expensive house"

In order to compare two persons or objects as in "I'm bigger than Joe" tsi ní:iot "as, like, than, the way that" is used. For example:

I: sénha kkowá:nen tsi "I'm bigger than Joe"  
ní:iot ne Só:se.

Raónha sénha ron'wé:sen "He is nicer than Michael"  
tsi ní:iot ne Wíshe.

Ne ki é:rhar sénha -teió:- "This dog is faster than  
ka tsi ní:iot ne skaiá:ta. the other one"

b. superlative constructions

These constructions make use of aonhá'a, which can be translated by "most", and the duplicative prefix t-/te-. This prefix occurs in many environments. Its basic meaning is that more than one person, object, state or action is involved. For instance, we encountered this prefix in enumeration with "two", e.g. tekanónhsake "two houses". Below are examples of superlative constructions.

Notes to the Student (Cont'd)

ne aonhá'a tkowá:nen	"it's the biggest"
ne aonhá'a tíoianere'	"it's the best"
raónha aonhá'a thakowá:nen	"he's the biggest"
i: aonhá'a tekkowá:nen	"I'm the biggest"
ronónha aonhá'a thatikowá:nen	"they (p,m) are the biggest"
ne aonhá'a tkanonhsanó:ron	"that's the most expensive house"
ne aonhá'a tkanaktowá:nen	"that's the largest bed"

aonhá'a "the most" can be replaced by nakwá: if the referent is in the third person, that is, if you talk about a 'he', a 'she', an 'it' or a 'they'. Nakwá: cannot be used if the referent is 'I' or 'you'. Below are some examples:

ne nakwá: tkanonhsowá:nen	"the biggest house"
ne nakwá: thakowá:nen	"he's the biggest"
ne nakwá: tiekowá:nen	"she's the biggest"
ne nakwá: tkanaktowá:nen	"the biggest bed"

6. Among the colour terms listed under Vocabulary, the two colours kará:ken "white" and kahón:tsi "black" are quite different from the other colour words. Kará:ken and kahón:tsi are verbs, while the other colour words are not. The difference shows in the following facts:

- a. kahón:tsi and kará:ken have prefixed pronouns while the other colour words do not change.

1. rahón:tsi	"he's black"
2. iehón:tsi	"she/one is black"
3. kahón:tsi	"she/it is black"

Notes to the Student (Cont'd)

but:

4. onekwén'tara' nihaia'tó:ten "he's red"

5. onekwén'tara nihsia'tó:ten "you are red"

b. like other verbs, kañon:tsi and kara:ken can incorporate nouns, other colour words remain unchanged.

1. kanonhsará:ken "the house is white"

2. kanonhsahón:tsi "the house is black"

but:

3. onekwén'tara' nikanonhsó:ten "the house is red"

4. otsí:nekwar nikanonhsó:ten "the house is yellow"

E-13

Write a conversation or a paragraph using the materials of this lesson. Your paragraph should contain around thirty words.

\* Oh ni:io is a reduction of oh.ni:iot that you encountered in this and other lessons. Speakers of Mohawk, like speakers of other languages, tend to shorten certain words in daily speech. Another example of this is akwe:, the shortened form of akwe:kon, 'all'.

Notes to the Student

1. In M-1, you learned that tsi nahe means 'ago' or more specific 'that much time since'. This word occurs together with many time expressions. Below are some other examples:

tohkára niwenhniserá:ke tsi nahe	'a few days ago'
áhsen niwenhniserá:ke tsi nahe	'three days ago'
é:so' wenhniserá:ke tsi nahe	'many days ago'
tóhka niahia'khserá:ke tsi nahe	'several weeks ago'
tóhkara niahia'khserá:ke tsi nahe	'just a few weeks ago'
énska wa'kawistá:'eke' tsi nahe	'an hour ago'

tsi náhe is also used to connect two sentences. In these sentences, tsi náhe corresponds to English 'since', e.g.

Tsi karí:wes tsi nahe tkonhén'he'.	'It has been such a long time since I've seen you'.
Ó:nen karí:wes tsi nahe iewakkwathón:ne' n-Aterónto.	'It has been a long time since I've been in Toronto.'

2. Mohawk, like all other languages, has a number of nouns that are indefinite in that they do not name a specific person or thing, e.g. nouns like someone, something, no one, nothing, etc. There are furthermore some nouns that can substitute for other nouns like 'one' in the sentence 'this dress is nicer than that one'. The list below contains indefinite and substitute nouns and an example for each of them.

Notes to the Student (cont'd)1- indefinite nouns

- a. onhká:k 'somebody'  
Onhká:k tá:ien' 'Somebody is coming.'
- b. iahón'ka 'nobody'  
Iahón'ka thontá:ien' 'Nobody is coming.'
- c. tiohk nahó:ten 'something'  
Tiohk nahó:ten 'He's gone to buy something.'  
rohninón:ron
- d. thé:nen 'anything'  
íah thé:nen 'nothing'  
Nahó:ten wahseke? 'What did you eat?'  
Iah thé:nen. 'Nothing.'  
Thé:nen ken washní:- 'Did you buy anything?'  
non?  
Iah, íah the' 'No, I didn't buy anything.'  
tewakhní:nón.
- e. akwé:kon 'all of them', 'everybody',  
'everything'  
Akwe:kon thone- 'All of them came.'  
nónhne'.  
Akwe:kon wahó:ti. 'He lost everything.'  
sewakwé:kon 'all of you'  
iakwakwé:kon 'all of us (excl)'  
tewakwé:kon 'all of us (incl)'  
kanenhrakwé:kon 'the whole crowd'
- f. shewatié:rens 'sometimes'  
Shewatié:rens rato- 'Sometimes he goes hunting.'  
rá'thes.
- g. thikawenní:io kátke 'anytime'  
Kátke ón'te aontá:- 'When should I come?'  
ke'?

Notes to the Student (cont'd)

- Thikawenni:io kátke. 'Anytime.'
- h. ka'k nón:we 'somewhere'
- ka'k nón:
- Ka' ne é:rhar? 'Where is the dog?'
- Kanónhskon ka'k nón:. 'Somewhere in the house.'
- Ka'k ken nón: wáhse'? 'Are you going somewhere?'
- Hen, kaná:takon wá:ke'. 'Yes, I'm going to town.'
- i. thikawenni:io ka'nón: 'anywhere', 'anyplace'
- ka' néntien ki o'wá:ion 'Where shall I put this meat?'
- Thikawenni:io ka'nón:. 'It doesn't matter where.'
- káneka 'Anyplace.'
- iah káneka 'Any place will do.'
- káneka 'anywhere', 'anyplace'
- iah káneka 'nowhere', 'noplac'
- Káneka ken wáhse? 'Are you going anywhere?'
- Iah, iah káneka thá:ke'. 'No, I'm not going anywhere.'

káneka is less specific than ka'k nón:we in h. above.  
Káneka is usually used in questions.

2- substitute nouns

- a. énska 'the thing', 'that one'  
 (inanimate)
- Ne sénha ki watia'- 'This dress is nice than the  
 tawi'tserí:io tsi other one.'  
 ní:iot n-énska.
- b. skaiá:ta 'that one, the other one,  
 one person' (f, indef)
- Ne sénha ki teiío:'ka 'This one runs faster than the  
 tsi ní:iot ne skaiá:- other one.' (f, indef)  
 ta.

Notes to the Student (cont'd)

- c. tseiá:ta  
Iekowá:nen ki iakón:-  
kwe tsi ní:iot ne  
tseiá:ta.  
'that one, the other one,  
one person' (f, neut)  
'This woman is big just like  
the other one!' (f, neut)
- d. shaiá:ta  
Ne ki rón:kwe sénha  
raio'tenhserí:io tsi  
ní:iot ne shaiá:ta.  
'that one, the other one,

'This man is a better worker  
than the other one.' (m)
- 
- e. oná'tiake'  
Ne sénha ki teiío:'ka  
tsi ní:iot n-oná'tiake'.  
'those, the other ones,  
some of them' (p,f)  
'This one runs faster than  
the other ones.'
- f. roná'tiake'  
Ne ki sénha raticowá:-  
nens tsi ní:iot ne  
roná'tiake'.  
'those, the other ones,  
some of them' (p,m)  
'These are bigger than the  
other ones.' (p,m)
- g. ó'tiake'  
Ó'tiake' ken nonkwá:-  
ti nia'kón:ne'.  
Ó'tiake onekwén'tara'  
niwahsohkó:ten.  
'some, some of them' (animate and  
inanimate)  
'Some of them went this way.' (f)  
'Some of them are red.'
3. In Lesson 12, you learned that Mohawk has a series of  
possessive pronouns like ak-, ake-, akwa- for 'my', sa-  
and s- for 'your' etc. The same pronouns can also occur  
with body parts, e.g.
- ake-nón:tsi 'my head'  
sa -nón:tsi 'your head'  
rao-nón:tsi 'his head'

Notes to the Student (cont'd)

These forms will occur in sentences like those below:

Akenón:tsi raráhsta.	'He's drawing my head.'
Sanón:tsi raráhsta.	'He's drawing your head.'
Raonón:tsi raráhsta.	'He's drawing his head.'

However, the above forms are not used very often. More common are the forms below, in which the possessive pronoun is replaced by the personal pronoun and where the locative suffix -ne/-ke is added. So you are not merely saying 'my head' but 'on/at my head', even though this is not always evident in the English translation.

ke-nontsí:ne	'(on/at) my head'
se-nontsí:ne	'(on/at) your head'
ra-nontsí:ne	'(on/at) his head'

These forms occur in the following sentence types:

Ohní:io ne kenontsí:ne?	'What's the matter with my head?'
Ska'én:ion ne ranontsí:ne.	'Look at his head.'
Se'nikón:rarak ne serontsí:ne.	'Watch your head.'

The change from a possessive pronoun to a personal one not only takes place if -ne/-ke is suffixed to the noun, but whenever a suffix is attached, e.g.

ranontsistákta	'near his head'
ranontsistó:kon	'under his head'

However, the above-discussed change only takes place if body parts are involved. Any other noun will retain the possessive pronoun, even if a suffix is present, e.g.

raononhsá:ke	'on his house'
raonónhskon	'inside his house'

Notes to the Student (cont'd)

4. The Mohawk word ohní:io or ohní:iot can be translated into English as 'what's the matter with' and as 'how is'. In other words, ohní:io asks information about the condition of something or someone. Below are a few examples:

Ohní:io ne kehsnonhsá:ke? 'What's the matter with my hands?'  
Teió'tson. 'They are dirty.'

Ohní:io ne sanitskhwá:ra? 'How is your chair?'  
Ioiánere'. 'It's a good one.'

Ohní:io ne sa'nisté'ha? 'How is your mother?'  
Takota'karí:te'. 'She's well.'

5. If a name or a kinship term is used to call somebody (vocatives), the word is usually shortened. For example:

<u>regular</u>		<u>vocative</u>	
stén:ha	'my mother'	istá:	'mother!'
rake'ní'ha	'my father'	ráke'ni	'father!'
rahksó'tha	'my grandfather'	rákhsó	'grandfather!'
akhsó'tha	'my grandmother'	ákhsó	'grandmother!'
Wá:ri	'Mary'	Wári	'Mary!'
Á:nen	'Ann'	Ánen	'Ann!'
ontiatí'oha	'my brother-in-law' (man speaking)	tiátio	'brother-in-law'
ontíar'í'ha	'my sister-in-law' (woman speaking)	tiári	'sister-in-law'
riochatén:'a	'my nephew'	wáten	used by older people to address younger people
		tien'	term of endearment used by parents to address their small children
koniateré:'a	'you are my grandchild'	kwátere'	'grandchild'

Notes to the Student (cont'd)

6. In M-12 you learned ionawa'starónnion 'there is mud on them'. The verbal suffix -nion signals that the action or the state expressed by the verb is distributed over time and space, e.g.:

iona'wá:tstare'	'there's mud on it'
ionawatstarónnion	'there is mud on them, there is more than one spot of mud on it'
<hr/>	
satenhní:non ne kaiare'shón:'a'	'sell the bags' (all together)'
satenhninónnion ne kaiare'shón:'a'	'sell the bags! (one after the other)'
wa'kenóhare'	'I washed'
wa'kenoharénion	'I washed clothes'
sáhseht ne kaia'tonnishón:'a'	'hide the dolls' (all together)'
sahsehtánion ne kaia'tonnishón:'a'	'hide the dolls' (here and there)'
tehanitson kwákhwa	'he jumps'
tehanitson'kwákhwanions	'he's jumping up and down'
enhá:raste'	'he'll draw, he'll take a picture or pictures'
enharastánion	'he'll take pictures (emphasis on plural)'

7. In M-15 and M-16 you learned some of the expressions connected with telling the time in Mohaw. Here are some more expressions that you will need:

To: niiohwistá:'e?	'What time is it?'
To: neniohwista'éhake'?	'What time will it be?'
To: shiiohwistá:'e?	'What time was it?'

Notes to the Student (cont'd)

Wisk niio'wistá:'e.	'Five o'clock.'
Wisk shatewashén:na.	'Half past five.'
Enká:r iotohétston ne wisk.	'A quarter past five.'

Using the materials of this lesson, tell us, in writing, about your summer plans. You can either write a conversation, as in C-1 and C-2, or a paragraph as in E-12.

Notes to the Student

1. Mohawk has different words for 'instead' and 'instead of', namely khé:ken 'instead' and ne ne iá:we 'instead of', 'rather than'. Khé:ken can also be shortened to khe:.

- a) Wahatawénhe' ken ne Ko:r? Is Paul going to swim?  
 Iah, enható:rate' khe: No, he's going to hunt instead.  
khé:ken
- b) Ko:r ken wahatawénhe'? Is it Paul that's going to swim?  
 Iah, Só:se khe: No, it's Joe who is going to  
khé:ken swim instead.
- c) Ko:r ken thowá:re'? Is it Paul that's going?  
 Iah, Sá:k khe: No, it is Jim that's going  
khé:ken instead.

Notice that khe:/khé:ken is placed directly after that word which is opposed to a word in the preceding sentence. For example, in a) 'to swim' and 'to hunt' are opposed and khe: is placed after 'to hunt'. In b), on the other hand, 'Paul' and 'John' are opposed and khe: shows up after 'John'.

Whenever you would use English 'instead of' you have to use ne ne iá:we in Mohawk, e.g.:

- d) O'wá:ron ken í:raks ne Is Paul eating the meat?  
Ko:r?  
 Iah, kaná:taro í:raks ne No, he's eating the bread instead  
ne iá:we o'wá:ron. of the meat.
- e) Roió'te' ken ne Ko:r? Is Paul working?  
 Iah, rató:rats ne ne No, he's hunting instead of  
iá:we ahoió'te'. working.
- f) Ko:r ken thowá:re'? Is it Paul that's going?  
 Iah, Sá:k thowá:re' No, it is Jim that's going  
ne ne iá:we Ko:r. instead of Paul.

Notes to the Student (cont'd)

If ne ne iá:we opposes two verbal structures as in e) above, the second verb is in the indefinite mode. This mode is marked by an a- prefix, e.g. a-hoió'ten' 'for him to work', 'he should work'. The indefinite mode also shows up in M-1 and M-10 of this lesson. The implication is that the speaker thinks that Paul should work, but he went hunting instead. You will learn more about the indefinite mode in future lessons, especially in Lesson 17.

2. In Lesson 12 you learned about the definite mode (aorist) which is expressed by the prefix wa'-. In this lesson you are learning about the "future mode" which says that the speaker is certain that a given event will take place. The future mode is expressed by the prefix en- which is placed before the personal pronoun and is marked by the punctual aspect suffix (see Notes to the Student, 4, Lesson 12).

<u>en-</u> ható:rate'	'he will hunt'
<u>en-</u> hanatá:ra'	'he will go visiting'
<u>en-</u> hatá:wen	'he will swim'
<u>en-</u> tháha'we'	'he will bring'
<u>t-</u> <u>en-</u> haiá:ia'ke'	'he will cross'
<u>i-</u> <u>én:</u> re'	'he will go'

en- usually occurs at the beginning of the word, but some prefixes can precede it as the last two examples show.

In tenhaiá:ia'ke' the duplicative prefix t- precedes en-, and in ién:re', the translocative i- occurs initially.

The future prefix en- cannot cooccur with the negative prefix te-. Instead, the prefix tha-/th- occurs as in the examples below. (for more information see L-17)

iah tha-ható:rate'	'he won't hunt'
iah tha-hanatá:ra'	'he won't go visiting'
iah tha-hatá:wen	'he won't swim'
iah <u>th-</u> iá:re'	'he won't go'

Notes to the Student (cont'd)

However, verbs in the future mode can be negated in the case of commands, where tóhsa 'don't' is used. The English translation for these sentences does not contain the future morpheme 'will'.

tóhsa <u>en-</u>	hsató:rate'	'don't hunt'
tóhsa <u>en-</u>	hsenató:ra'	'don't visit'
tóhsa <u>en-</u>	hsatá:wen	'don't swim'
tóhsa <u>i-én-</u>	'se'	'don't go'

3. In M-6 and in other sentences, you have come across the word ón'te' which, we said, cannot be directly translated into English. Ón'te' usually expresses doubt, it implies that the speaker is not sure whether the thing he or she is talking about is true. Below are a number of sentences that contain ón'te'. Sometimes ón'te' is also used by itself. Somebody says something and you answer ón'te', meaning 'I suppose so', 'could be'.

Kwah í:kehre' énthre' ón'te'. I think he'll come.

Iah té:kehre' í:se' ón'te' I doubt that it's your animal.  
satshe:nen.

Iah té:kehre' ién:ra' I doubt that he'll go.  
ón'te'.

Énthre' ón'te' ken? Do you think he'll come?

Ón'te' is also used in sentences that are translated into English with 'must be', e.g.:

Ponkwehserí:io' ón'te'. He must be a nice man.

Rató:rats ón'te'. He must be a hunter.

Tesahwishenhé:ion ón'te'. You must be tired.

Tehsanonwarawén:rie ón'te'. You must be crazy.

Rononwá'ktani' ón'te' ne Joe must be sick.  
Só:se.

Notes to the Student (cont'd)

4. In this lesson you learned to use the two inclusive 'we' forms, where (d,incl) stands for 'dual inclusive' and (p,incl) stands for 'plural inclusive'. The term 'inclusive' means that the person addressed is included in the statement. For instance, wéteneke 'we (d,incl) ate' means 'you and I ate', while wétewake 'we (p,incl) ate' means 'you and I and some other person or persons ate'. If somebody asks you a question with an inclusive 'we', you can answer with the same 'we' form, because you are included. For instance:

Question

Wéteneke' ken? 'Did we (d,incl) eat it?'

Answer

Hen, wéteneke'. 'Yes, we (d,incl) ate it.'

However, if somebody asks you a question with an exclusive 'we' form, you answer with a 'you' form, because you are not included. For instance:

Question

Wa'ákwake' ken? 'Did we (p,excl) eat it?'

Answer

Hen, wésewake'. 'Yes, you (p) ate it.'

We (d,incl)

- a) before consonant stems: teni-

e.g. teni-nákere 'we (d,incl) live'  
teni-kowá:nen 'we (d,incl) are big'

- b) before a- stems: ti-

e.g. ti-ató:rats 'we (d,incl) hunt'  
ti-atenhni:nons 'we (d,incl) are salesmen'

Notes to the Student (cont'd)c) before all other stems: ten-

e.g.	<u>ten-í:teron</u>	'we (d,incl) are staying'
	<u>ten-óhkwats</u>	'we (d,incl) dig'
	<u>ten-ón:nis</u>	'we (d,incl) make'
	<u>ten-entórha</u>	'we (d,incl) are lazy'
	<u>ten-é:saks</u>	'we (d,incl) look for'

We (p,incl)a) before consonants stems: tewa-

e.g.	<u>tewa-nákere</u>	'we (p,incl) live'
	<u>tewa-kowá:nen</u>	'we (p,incl) are big'

b) before i- stems: tew-, verb-initial -i- becomes -en-.

e.g.	<u>tew-én:teron</u>	'we (p,incl) are staying'
	<u>tew-én:tenhre'</u>	'we (p,incl) feel sorry for her'

c) before a-, e-, en- stems: tew-

e.g.	<u>tew-ató:rats</u>	'we (p,incl) hunt'
	<u>tew-atenhní:nons</u>	'we (p,incl) are salesmen'

d) before o-, on- stems: ti-

e.g.	<u>ti-ón:nis</u>	'we (p,incl) make'
	<u>ti-ohétsta</u>	'we (p,incl) pass it'

5. Mohawk has two words to express the English disjunction 'or', namely tóka' ni' and káton. Tóka' ni' is always used in statements, while káton is used in questions. Below are some examples:

- a) O'nénhare' tás'ha tóka' 'Bring grapes or cherries!  
ni' é:ri.
- b) Atiá:tawi' shní:non tóka' 'Buy a dress or a blouse!  
ni' oiá:kara'.

Notes to the Student (cont'd)

- c) Enwatió'ten' tóka' ni' enkatorátha'. 'I'll work or I'll go hunting'
- d) O'nénhare' tás'ha tóka' ni' é:ri tás'ha. 'Either bring grapes or bring cherries'
- e) O'nénhare' ken tás'hawe' káton é:ri? 'Did you bring grapes or cherries?'
- f) Atiá:tawi' ken wa'shni:- non káton oiá:kara'? 'Did you buy a dress or a blouse?'
- g) Enhsaió'ten' ken káton enhsatorátha'? 'Will you work or go hunting?'
- h) O'nénhare' ken enték'ha- we' káton é:ri enték'hawe'? 'Shall I bring grapes or shall I bring cherries?'

6. In M-1 of this lesson you learned expressions like tsi niwakénnes 'during the summer' (see also Vocabulary 3). The partitive prefix ni-, n- that occurs in these time expressions occurs in many verbal construction expressing a variety of ideas, like a certain number, place, time or manner. So far you have encountered ni-, n- in the following constructions:

- Ohniwahsohkó:ten? 'What colour is it?'
- Onekwén'tara' niwahsohkó:ten. 'It's red (colour).'
- Óhonte' nikanonhsó:ten 'The house is green.'
- To: nihá:ti thón:ne's? 'How many of them (m) are there?'
- Áhsen nihá:ti. 'Three of them.'
- To: nahskáriake? 'How much did you pay?'
- Wisk nikawístake'. 'Five dollars.'
- To: nikarí:wes tsi ionahténtien? 'How long are they (p,f) going to stay away?'
- Áhsen niwenhniserá:ke. 'Three days.'

Notes to the Student (cont'd)To: niowistá: 'e?

'What time is it?'

Wisk niowistá: 'e.

'It's five o'clock.'

Ka' nikahá:wi 'thówahse'?

'When are you (p,f) going?'

Tsi nióhseres.

'During the winter.'

Ohnihatíe:rha?

'What is he doing?'

Ratkonhsóhares.

'He is washing his face.'

The examples above show that 'how' questions always involve the particle to: and the prefix ni-, n-. The examples below show you how to form 'how' questions. Notice that all those answers that contain a number follow the patterns that you learned in Lesson 9, Note 1, about the enumeration of objects.

a) how big (things):to: ni + pron. + noun - increment

To: nika'seréhta?

'How big is the car?'

Wisk niwatahtsherá:ke.

'Five yards.'

To: niwatekhwahrá'tshera?

'How big is the table?'

Tewahsí:take.

'Two feet.'

b) how big (persons, animals):to: ni + pron. + a'

To: ní:ra'?

'How big is he?'

Kenk ní:ra'.

'He's just so little.'

To: nihón:na's?

'How big are they (p,m)?'

Iá:ia'k niwahsí:take.

'Six feet.'

Notes to the Student (cont'd)c) how many (things):to: ni + pron. + noun + increment + plural

To: nika'seréhtake? 'How many cars are there?'

Áhsen nika'seréhtake. 'There are three cars.'

To: niwa'thé:rake? 'How many baskets are there?'

Wisk niwa'thé:rake. 'There are five baskets.'

d) how many (persons, animals):

See also Lesson 11.

To: nihá:ti? 'How many of them (m) are there?'

To: nikón:ti? 'How many of them (f) are there?'

e) how heavy (things):to: ni + pron. + kste' ne - nounTo: niiókste' ne 'How heavy is the basket?'  
á:there'?Ákta ne wisk nikakón'tshe- 'Nearly five pounds.'  
rake.

To: niiókste' no'wá:ron? 'How heavy is the meat?'

Tekakon'tshera:ke khok. 'Only two pounds.'

f) how heavy (persons, animals):to: ni + pron. + ia'ta + kste'

To: nisaia'tákste'? 'How heavy are you?'

Énska tewen'niáwe'-nika- 'I weigh 100 pounds.'  
kon'tshera:ke niwatia'-  
tákste'.To: niioia'tákste' ne 'How heavy is the dog?'  
é:rhar?Oié:ri nikakon'tsera:ke 'He weighs 10 pounds.'  
niioia'tákste'.

Notes to the Student (cont'd)g) how old (things):to: ni + t + pron. + ien ne noun

To: nitió:ien ne á:there'? 'How old is the basket?'

Wisk niiohserá:ke nitió:ien. 'It's five years old.'

h) how old (persons, animals):to: n + a' + te + pron. + ohser + iiá:kon

To: na'tesohseriiá:kon? 'How old are you?'

Wisk na'tewakohseriiá:kon. 'I'm five years old.'

To: na'tehaohseriia'kón:ne'? 'How old was he?'

Wisk na'tehaohseriia'kón:ne'. 'He was five years old.'

When you ask somebody's age, you are actually asking how many winters he or she has crossed, i.e. the words for 'winter' óhsera and 'cross' ia'k are part of the question.

 A: Gee, it is expensive.  
 C: Are these your shoes?  
 B: Yes, they are my shoes.  
 C: Did they (d,m) make them  
 too?  
 B: No, they didn't make them.  
 A: Who made them?  
 B: I don't know.  
 I bought the shoes.  
 Do you like the colour?  
 A: Yes, I like red shoes.  
 C: I prefer brown ones.  
 B: Try them on!  
 A: No, my feet are bigger than  
 yours.  
 B: That's true.  
 C: Well, let's go home now.  
 We'll see you tomorrow.  
 B: What time will you (d) come?  
 A: Maybe around two o'clock.  
 B: I'll be waiting.  
 Good bye then.  
 C: Good bye.

C-3 Elizabeth, A, and her daughter, B, are sitting in the kitchen.

B: Satahónshatat! Ónkhak tá:ien'.

B: Listen! Somebody is coming.

A: Hen, tshe'kén:'a í:-kehre'. Ka:ts tien'.

A: Yes, I think it's your younger brother. Come here, my little one.

- A: Yes, both of them.
- B: And look at his pants.
- A: They are wet and torn.
- C: Well, the pants weren't expensive.
- A: Sure they were expensive. They cost 10 dollars.
- B: Really? Are they made of cotton?
- A: Yes. Leather is better, but it is too expensive.
- B: Yes, I know, but it is the best.
- C: (coming back from washing) I've finished.
- A: Good. Now be quiet and go to sleep.
- C: I'm hungry.
- A: Eat some bread then.

C-4 Mary meets her girlfriend Susan at the train station.

E-: Exercise, Expand, Extrapolate

## E-1

Give an answer to the questions below.

1. Tiohtiá:ke ken wá'en'? \_\_\_\_\_
2. Kanehsatá:ke ken wa'hón:ne'? \_\_\_\_\_
3. Tawítne ken wá:re'? \_\_\_\_\_
4. Kahnawá:ke ken wáhse'? \_\_\_\_\_
5. Anéhnne ken wá:ke'? \_\_\_\_\_

## E-2

The verb root -ien- 'to have' takes objective pronouns which are discussed in Notes to the Student, 1, p. 303.

The same is true for the verb root -ka:te- 'to have a lot of' which you will find in E-4 and E-5. Before doing this exercise, read Notes to the Student, 1 carefully. Then fill in the blanks.

1. Sá:ien' ken ne kaná:taro? A: Do you have bread?  
Hen, wátien'. B: Yes, I have.
2. Sá:ien' ken \_\_\_\_\_ ? A: Do you have an ax?  
Iah, iah tewátien' B: No, I don't have one.
3. \_\_\_\_\_ ne kahiatónhsera? A: Does he have paper?  
 B: Yes, he has.
4. \_\_\_\_\_ ? A: Do we (p,incl) have a basket?  
 B: Yes, we (p,incl) have.
5. noná:ke' kahonwé:ia? A: Do they (p,f) have a birch-bark canoe?  
 B: Yes, they (p,f) have.

6. ne shikaré't? A: Do you (d) have cigarettes?  
 B: No, we (d,excl) don't.
7. Sewaseréhtaien ken? A: Do you (p) have a car?  
 B: Yes, we (p,excl) have.
8. Iakotia'tawi'tsherá:ien' ? A: Does she have a dress?  
 B: No, she doesn't have a dress.
9. Sahshikare'tsherá:ien' ? A: Do you have a cigarette?  
teka'tshókwás. B: No, I don't smoke.

## E-3

The exercise below contains the same sentences as E-2, the only difference is that all the nouns have been incorporated. Give a translation of the questions and answers below. To make it a little more difficult, we changed the order of the sentences.

1. Rohiatonhserá:ien' ken? A: Does he have paper?  
Hen, rohiatonhserá:ien'. B: \_\_\_\_\_
2. Sana'tará:ien' ken? A: \_\_\_\_\_

tsherá:ien'.
4. Iakotia'tawitsherá:ien' ken? A: \_\_\_\_\_  
Hen, iakotia'tawitsherá:ien'. B: \_\_\_\_\_
5. Satoken'será:ien' ken? A: \_\_\_\_\_  
Iah, iah tewakatoken'será:ien'. B: \_\_\_\_\_

6. Rotihón:waién' ken noná:ke'? A: \_\_\_\_\_  
 Hen, rotihón:waién'. B: \_\_\_\_\_
7. Ionkwa'thé:raien' ken? A: \_\_\_\_\_  
 Hen, ionkwa'thé:raien'. B: \_\_\_\_\_
8. Sewa'seréhtaién' ken? A: \_\_\_\_\_  
 Hen, ionkwa'seréhtaién'. B: \_\_\_\_\_

## E-4

Before doing this exercise, read Notes to the Student, 1, p.303 about the objective pronouns.

1. Saká:ta' ken na'tiá:tawi? A: Do you have a lot of dresses?  
 B: Yes, I have a lot.
2. \_\_\_\_\_ A: Does he have a lot of blankets?  
 B: No, he doesn't have a lot.
3. \_\_\_\_\_ A: Does she have a lot of bread?  
 B: No, but she has a lot of meat.
4. \_\_\_\_\_ A: Do you have a lot of fish?  
 B: No, but I have a lot of meat.
5. \_\_\_\_\_ A: Do we (p,incl) have a lot of meat?  
 B: Yes, we (p,incl) have a lot.

## E-5

This exercise contains the same material as E-4, but this time the nouns are incorporated. Furthermore, the answers in 1. and 3. contain iah the', which can be translated by 'nothing', 'none at all'.

1. Iakona'taraká:te' ken? A: \_\_\_\_\_  
 Iah, iah the' teiakona'tará:- B: \_\_\_\_\_  
 ien.
2. Sa'tia'tawitsheraká:te ken? A: \_\_\_\_\_  
 Hen, waka'tia'tawi'tsheraká:- B: \_\_\_\_\_  
 te'.
3. Ionkwa'wahraká:te' ken? A: \_\_\_\_\_  
 Iah, iah the' teionkwa'wá:- B: \_\_\_\_\_

 Hen, rohsiraká:te'. B: \_\_\_\_\_
5. Sentsaká:te' ken? A: \_\_\_\_\_  
 Iah, nek tsi wake'wahraká:- B: \_\_\_\_\_  
 te' ki'.

## E-6

Before doing this exercise, read Notes to the Student, 1, p. 303. For information on noun incorporation involving animals, see Notes to the Student, 3, in Lesson 12, p.200. See also M-11 and M-12 of this lesson.

1. Potináhskwaien' ken nakohsá:- A: Do they (p,m) have horses?  
 tens. \_\_\_\_\_  
 Hen, rotinahskwaká:te'. B: Yes, they (p,m) have lots  
 of them.
2. \_\_\_\_\_ A: Does he have chickens?  
 \_\_\_\_\_ B: Yes, he has (animals).
3. \_\_\_\_\_ A: Do you have a cat?  
 \_\_\_\_\_ B: Yes, I have.

4. \_\_\_\_\_

B: Yes, she has lots of them.
6. \_\_\_\_\_  
A: Do they (d,m) have lots of roosters?  
B: Yes, they (d,m) have lots of them.

## E-7

In this exercise remember that even if in English you can say 'he has lots' as in 1. below, you have to say in Mohawk ronahskwaka:te' 'he has lots of animals'.

1. É:so' ken ronáhskwaien? A: Does he have many animals?  
Hen, ronahskwaká:te'. B: Yes. he has lots.
2. É:so' ken \_\_\_\_\_ ? A: Do you have many animals?

4. \_\_\_\_\_ A: Do they (p,f) have many dresses?  
B: Yes, they (p,f) have many.
5. \_\_\_\_\_ A: Do they (p,m) have many fish?  
B: No, they (p,m) have none at all.

E-8

Answer the questions below in the negative. In both E-8 and E-9 some of the verbs will take subjective pronouns and some will take objective ones. For instance, the verb for 'to be an Indian' takes subjective pronouns, the verbs for 'to be a Longhouse', 'to belong to the wolf clan', etc. take objective pronouns.

### Notes to the Student

1. Up to now we have concentrated on learning the set of personal pronouns which is generally called the subjective pronoun set, for example the k- in k-ato:rats 'I hunt', the s- in s-ato:rats 'you hunt', or the r- in r-ato:rats 'he hunts'. However, there exist two other sets of personal pronouns in Mohawk, often called the objective set and the transitive set. The objective forms resemble in many instances the subjective ones, but there are differences you have to be aware of. When to use the subjective pronouns and when the objective ones is often difficult to determine. The objective ones usually occur if the verb expresses a state. It can also express that the subject of the verb in question is considered to be the patient, and not the agent of the action or state involved. Some verbs, like 'to have', and 'to sleep' always use the objective pronouns, others will use it to express certain aspects. In this lesson, you find the objective pronoun in M-3, M-4, M-5, M-6, M-8, M-11 and M-12. Below a list of the objective pronouns is contrasted with a list of the subjective pronouns.

#### A: Objective Personal Pronouns

#### B: Subjective Personal Pronouns

wake-nón'ses	'I am a Longhouse	k-hní:nons	'I buy'
sa-nón'ses	'you are a "	s-hní:nons	'you buy'
ro-nón'ses	'he's a "	ra-hní:nons	'he buys'
iako-nón'ses	'she's/one is a "	ie-hní:nons	'she/one buys'
io-nón'ses	'she/it is a "	ka-hní:nons	'she/it buys'
ionkeni-nón'ses	'we(d,incl) are "	teni-hní:nons	'we(d,incl) buy'

ioti-nón'ses	'they(d,f) are "	keni-hní:nons	'they(d,f) buy'

Notes to the Student (cont'd)

If you compare the two sets above, you will notice that some of the objective pronouns are identical to the subjective ones. You will also notice that in the objective set some of the pronominal distinctions are neutralized, i.e. there are only two 'we' forms instead of four, and two 'they' forms.

You have learned that the forms of a pronoun may vary depending on the first sound of the verb root to which the pronoun is prefixed. These variations are also found in the objective pronouns, though to a lesser degree. Thus 'they (m)' is roti- before consonant stems, rot- before i-stems, and ron- before e-, en-, and on-stems, while 'they (f)' is ioti- before consonant stems, iot- before i-stems, and ion- before e-, en-, o-, and on- stems.

Among the verbs you have learned to far, the objective pronoun is used in:

<u>ro-ió'te'</u>	'he is working'
<u>ro-hténtion'</u>	'he left'
<u>ro-nón'ses</u>	'he's a Longhouse'
<u>ró:-ta's</u>	'he sleeps'
<u>ro'nesí:io</u>	'he is of the snipe clan'
<u>ro-kwáho</u>	'he is of the wolf clan'
<u>ro-skeré:wake</u>	'he is of the bear clan'
<u>ró:-ien</u>	'he has'
<u>ro-ká:te'</u>	'he has a lot'

Many of the Mohawk verbs that are translated into English with a predicate adjective constructions use the objective pronoun, e.g. below. See also Vocabulary section of this lesson.

Notes to the Student (cont'd)

<u>rotshennón</u> :ni	'he's glad'
<u>roia</u> 'tatshá:ni	'he's aggressive'
<u>roia</u> 'tákte	'he's heavy'
<u>ro</u> 'tshá:ni	'he's smart, industrious'
<u>ro</u> 'nikonrowá:nen	'he's clever'
<u>roia</u> 'takenhé:ion	'he's slow'

You will find that the objective pronoun shows up in unexpected places. Below are a few examples:

- a) The objective pronoun indicates the possessor in a verbal construction with an incorporated noun root, e.g.

<u>rononhsowá</u> :nen	'his house is big'
<u>wakenonhsowá</u> :nen	'my house is big'
<u>sanonhsowá</u> :nen	'your house is big'

- b) The objective pronoun is used if a noun with a possessive pronoun prefix is negated, e.g.

í:'i akwatiá:tawi'	'it's my dress'
iah i:' tewakatiá:tawi'	'it's not my dress'
raónha raotiá:tawi'	'it's his shirt'
iah raónha tehotiá:tawi'	'it's not his shirt'
i:' akwá:wen	'it's mine'
iah i:' tewaká:wen	'it's not mine'
raónha raó:wen	'it's his'
iah raónha tehó:wen	'it's not his'

- c) The objective pronoun occurs with the stative or perfective verb aspect, which is discussed in more detail in Lesson 18, Notes to the Student, 1.

Notes to the Student (cont'd)

rakhón:nis	'he cooks'
but	'he's a cook'
rokhón:ni	'he's cooking'
tehaiá:ia'ks	'he crosses'
but	
tehoiahiá:kon	'he has crossed'
raterí:ios	'he fights'
but	
roterí:io	'he's fighting'

2. In this and earlier lessons, you learned expressions like ohnisa'taró:ten? 'what's your clan?' and ohniwah-sohkó:ten? 'what colour is it?'. Both expressions contain ohni----- o:ten?\* 'what' or 'what kind of' which can be combined with many other nouns, e.g.

Ohnika'wahró:ten?	'What kind of meat is it?'
Ohnikanonhsó:ten?	'What kind of house is it?'
Ohna'kanahskó:ten?	'What kind of animal is it?'
Ohniwahió:ten?	'What kind of fruit is it?'
Ohniwatia'tawi'tseró:ken?	'What kind of dress is it?'
Ohniwahió:ten wahshní:non?	'What kind of fruit did you buy?'

If you don't want to ask a question, that is if you simply want to say 'this kind of', you drop the oh- prefix, e.g.

\* The morpheme oh: In this text, the morpheme oh has generally been considered as a prefix in expressions like the ones discussed above. However, there is evidence that oh is a free morpheme, for instance in the following sentence: Oh ni:se' nika'wahro:ten wahshní:non? 'What kind of meat did you buy?'

Notes to the Student (cont'd)

- Kenón:we's ki: nikawahró:ten. 'I like this kind of meat.'  
 Ranón:we's ki: nikanonhsó:ten. 'He likes this kind of house.'  
 Onekwén'tara niwahsohkó:ten. 'It's red'(speaking about things).  
 Onekwén'tara nikaia'tó:ton. 'It's red'(speaking about living things).

3. The suffix -neha (or -keha) may be added to a noun. It expresses the idea that something is done according to the ways of somebody or something. You have an example of it in M-9 above, where onkwehonwehnéha means "according to the ways of the Indians", "the Indian way", "like the Indians". For example in:

onkwehonwehnéha ronhrónkha 'he speaks the Indian way"  
 'he speaks Indian'

other examples of the neha/keha suffix are:

kahnawa'kéha' 'in the ways of Caughnawaga'  
 'of Caughnawaga'  
 'from Caughnawaga'  
 kanonno'kéha ki atíá:tawi' 'this is a New York dress'  
 'the kind worn in New York'  
 Tiatontari'konnéha thi áhta 'those are Quebec shoes'  
 'the king worn in Quebec City'  
 kanonno'kéha thi thio'kéha 'that is a New York train'  
 Wostonnéha thi ká:sere 'that is an American car'

4. If you want to say in Mohawk 'a person from, of', you add the suffix -ro:non' to the word for the town or the place, e.g.:

Tiohtia'kehró:non' 'people from/of Montreal'  
 Kanon'nokehró:non' 'people from/of New York'  
 kanatakonró:non' 'people from/of the town'  
 kaniatara'kehró:non' 'people from/of the river'  
 karhakonró:non' 'people from/of the forest'

Vocabulary:Play; Entertainment

The list below contains verbs that express activities of play and entertainment and nouns related to these activities. The Mohawk sentences are all introduced by 'ha' which can be translated into English by 'come on', as a sort of invitation. The verbs are imperatives (commands) and contain the 'we(p,incl)' pronoun tewa-. For more information on this kind of imperative verb forms see Note 7 of this lesson.

## A: The verbs:

ha' tetewanónniakhkw	'come on, let's dance'

E-: Exercise, Expand, Extrapolate

## E-1

Before doing this exercise, read Notes to the Student, 1, p. 332. Then change the verbs below from the future en-mode to the indefinite mode.

1. enhari'wanón:ton'	he'll ask
ahari'wanón:ton'	he should ask
2. enkató:rate'	I'll hunt
	I should hunt
3. enieien'thó:ko'	she'll harvest
	she should harvest
4. enkenón:wene'	I'll like it
	I should like it
5. enhaká:raton'	he'll tell a story
	he should tell a story
6. ónhkak eniakoka:ri'	it will bite someone
	it should bite someone
7. enhonterí:io'	they (p,m) will fight
	they (p,m) should fight
8. tenhari'wa'será:ko'	he'll answer
	he should answer
9. eniakwátshahte'	we (p,excl) will burn it
	we should burn it
10. enionkhikaratón:hahse'	she'll tell us about it
	she should tell us about it

## E-2

Before doing this exercise, read Notes to the Student, 1. Then complete the sentences with verb forms in the indefinite mode, picking any verb that fits. You can, for example, use some of the verbs listed in Note 1 or those of E-1. Do not forget to also complete the English translation and be careful to use the correct pronoun form.

Notes to the Student

1. In many of the M's of this lesson, you have learned verb forms in the indefinite mode, which in Mohawk are expressed by the prefix a-. The indefinite mode is usually translated into English by the conditional 'should' or by an infinitive verb as in 3. to 7. below. The indefinite mode expresses uncertainty and/or the speaker's wishes. Like the aorist wa'/wa- mode (see L-12, Note 4.) and the future en- mode (see L-14, Note 2.), the indefinite mode requires the punctual aspect suffix.

- |  |                                      |
|--|--------------------------------------|
| 1) <u>a</u> ható:rate'                   | 'he should hunt'                     |
| 2) <u>a</u> haién'tho                    | 'he should plant'                    |
| 3) í:kehre' <u>a</u> khní:non            | 'I want to buy it'                   |
| 4) wahathón:tate' nahoió'ten'            | 'he agreed to work'                  |
| 5) wahsakhóhóri<br>nahotiió'ten'         | 'he told them to work'               |
| 6) teiotohontsóhon<br>nahinatahré:nahse' | 'it's necessary for me to visit him' |
| 7) enhakwé:ni nahatá:wen'                | 'he's able to swim'                  |
| 8) iah thaónton <u>a</u> khní:non        | 'it's not possible that I buy it'    |
| 9) tho nihorihó:ten<br>nahanonhsahní:non | 'he's willing to buy the house'      |
| 10) wahiiónnien' nahó:tawe'              | 'I made him sleep'                   |

The indefinite morpheme a- undergoes the following changes: \*

- a) a- becomes aon- before the iterative prefix s- (see Note 6 of this lesson), e.g.:

- |                                     |                            |
|-------------------------------------|----------------------------|
| <u>aonsakahtén:ti</u>               | 'I should go home'         |
| í:kehre' raonha <u>aonsaható:ri</u> | 'I want him to drive back' |
| <u>aonsontio'tén'sera'</u>          | 'I should go back to work' |

\* Actually the morphophonemics involved are more complex. It appears that we have to assume the following underlying forms:

- |                                 |                       |
|---------------------------------|-----------------------|
| a- + s- + wa- + k- + ahten:ti   | → aonsakahtén:ti      |
| a- + t- + wa- + ra+ khonnia:na' | → aontahakhonniá:na'. |

Notes to the Student (cont'd)

- b) a- becomes aon- before the first person singular objective pronoun wak-, which is reduced to -k-, e.g.:

<u>aonkí:ta'</u> 'we'	'I should sleep'
iah thateiotohontsóhon <u>naontió'ten'</u>	'I don't have to work'
<u>aonkenahskwaién:take'</u>	'I should have an animal'

- c) a- becomes aon- before the cislocative prefix t-

<u>aontahakhonniá:na'</u>	'he should come to come'
<u>aontáhse'</u>	'you should come'
<u>aontahen'terón:take'</u>	'he should be at home'

When preceded by the indefinite prefix a-, the first and second person plural pronouns take on a longer form, e.g.:

<u>entewanatá:ra'</u>	'we (p,incl) will visit'
<u>aietewanatá:ra'</u>	'we (p,incl) should visit'
<u>enteninatá:ra'</u>	'we (d,incl) will visit'
<u>aieteninatá:ra'</u>	'we (d,incl) should visit'
<u>ensewanatá:ra'</u>	'you (p) will visit'
<u>aiesewanatá:ra'</u>	'you (p) should visit'
<u>enseninatá:ra'</u>	'you (d) will visit'
<u>aieseninatá:ra'</u>	'you (d) should visit'

2. In M-2 you learned sentences with enwá:ton, which in those sentences was translated as 'could'. A more exact translation of enwá:ton is 'it is possible', e.g.:

<u>enwá:ton ne tho iá:ke'</u>	'it's possible that I go there'
<u>enwá:ton ken nenskwá'tho?</u>	'is it possible that you come by?' 'could you come by?'
hen, <u>enwá:ton</u>	'yes, it's possible' 'yes, I could'

Notes to the Student (cont'd)

The negative of enwa:ton 'it's possible' is iah thaón:ton 'it's not possible', e.g.:

iah thaón:ton akatá:wen' 'it's not possible that I  
take a bath'

iah thaón:ton ahoi'ó'ten' 'it's not possible that he  
works'

Other expressions learned in this lesson are ó:nenk tsi 'have to' and teiotohontsóhon 'it's necessary'. Below are some more examples:

ó:nenk tsi

ó:nenk tsi enshahtén:ti 'he has to go home'

ó:nenk tsi enhoio'ténhsera' 'he has to go to work'

ó:nenk tsi wahinatahré:- 'I had to visit him'  
nahse'

teiotohontsóhon

teiotohontsóhon naonsakahténti' 'it's necessary that I go  
home'

teiotohontsóhon nahoi'ó'ten' 'it's necessary that he should  
work'

iah thateiotohontsóhon the' 'I don't have to buy any  
akewa'rahní:non meat'

Notice that ó:nenk tsi can precede verbs in different modes (e.g. future en-, momentary wa- etc.) while teiotohontsóhon requires that the following verb be in the indefinite mode (a-). Sometimes, for an especially emphatic effect, ó:nenk tsi and teiotohontsóhon can be combined in one sentence, e.g.:

ó:nenk tsi teiotohontsóhon 'I have to visit him'  
nahinatahré:nahse' 'it's absolutely necessary that  
I should visit him'

ó:nenk tsi teiotohontsóhon 'it's absolutely necessary that  
nahoi'ó'ten' he should work'

Notes to the Student (cont'd)

3. You have learned that 'not' is expressed in Mohawk by iah and the prefix te-. However, there are instances where 'not' is expressed by different means, namely by the prefix th- or by the particle tóhsa'.

a) the prefix th- is used to express negation if other verbal prefixes are present, e.g.:

(1) Before the duplicative prefix t-, the negative prefix is tha'-, which is a reduction of th- + wa'-.

tétiens	'I gamble'
iah <u>tha'</u> tétiens	'I don't gamble'
tehotohontso:ni	'he wants'
iah <u>tha'</u> tehotohontsó:ni	'he doesn't want'
tehowénrie'	'he's stirring'
iah <u>tha'</u> tehowénrie'	'he isn't stirring'

(2) Before the translocative prefix i- the negative prefix is th-:

ieható:rats	'he hunts over there'
iah <u>thie</u> ható:rats	'he doesn't hunt over there'
iah <u>thia</u> ható:rate'	'he won't hunt over there'
iekatá:wens	'I swim over there'
iah <u>thie</u> katá:wens	'I don't swim over there'
iehoió'te'	'he works over there'
iah <u>thie</u> hoió'te'	'he doesn't work over there'

(3) Verbs in the future mode cannot be negated in Mohawk because the future prefix en- is only used if something is definitely going to happen. Therefore, if one wants to say that something is not going to happen, one has to use the indefinite mode prefix a- plus the negative prefix th-, e.g.:

Notes to the Student (cont'd)

enható:rate'	'he'll hunt'
iah <u>thahat</u> ó:rate'	'he won't hunt'
iah <u>thaietewat</u> ó:rate'	'we (p,incl) won't hunt'
eniekhón:ni	'she'll cook'
iah <u>thai</u> ekhón:ni	'she won't cook'

The two prefixes that do not follow the above rule are the cislocative prefix t- and the iterative prefix s-. Both take the regular negative prefix te-, e.g.:

shahténties	'he goes home'
iah <u>teshaht</u> énties	'he doesn't go home'
thén:teron	'he's staying over there'
iah <u>tethén</u> :teron	'he's not staying over there'
thontó:rats	'they (p,m) are there hunting'
iah <u>tethont</u> ó:rats	'they (p,m) are there but not hunting'

- b) the particle tóhsa' is used with verbs in the imperative mode and with verbs in the indefinite mode, e.g.:

sató:rat!	'hunt!'
<u>tóhsa'</u> sató:rat!	'don't hunt!'
saió'ten!	'work!'
<u>tóhsa'</u> saió'ten!	'don't work!'
tho iétewe'!	'let's go there!'
<u>tóhsa'</u> tho iétewe'!	'let's not go there!'
aható:rate'	'he should hunt'
<u>tóhsa'</u> aható:rate'	'he shouldn't hunt'
ahoió'ten'	'he should work'
<u>tóhsa'</u> ahoiό'ten'	'he shouldn't work'
akató:wen'	'I should swim'
<u>tóhsa'</u> akató:wen'	'I shouldn't swim'

Notes to the Student (cont'd)

4. The notion of going somewhere or of coming someplace with the purpose of doing something is expressed in Mohawk by a suffix which we will call purposive. This suffix follows the verb root and the benefactive suffix (see Notes to the Student, Lesson 19). The purposive suffix can take the following shapes depending on the verb class and the environment: -h-, -r-, -n- or -hs-, -ser- or -hser-. The purposive suffix can be followed by other verbal suffixes, for instance the habitual suffix -(e)s-, the punctual suffix -a' or -e', and the stative suffix -on-. In the examples below the purposive suffix is underlined.

teio'ia'ks raterohró'khes	'he goes to watch movies'
roio'tenhson:ne'	'he had gone to work'
enhoio'tén' <u>sera'</u>	'he'll go to work'
roien'thóh <u>seron</u>	'he's gone to plant'
tahoio'tén' <u>sere'</u>	'he's coming to work'
thotora'thón'ne'	'he had come to hunt'
tahakhonniá:ne'	'he's coming to cook'
ranatá:res	'he goes visiting'
rahnenna'tahninón:re'	'he is here to buy potatoes'
	'he came to buy potatoes'
wa'ekhonniá:ne'	'she's on her way there to cook'
wahakaratón:ne'	'he's on his way there to tell stories'
enhi'ni'khon'sé:ra'	'I'll go there to sew for him'
wahi'ni'khon'sé:re'	'I'm on my way there to sew for him'
enke'ni'khón:na'	'I'll go there to sew'

The cislocative prefix t- occurs with the purposive suffix to express that the motion of the subject is towards the speaker as in 5., 6., 9. and 10. below. Motion away from the speaker is not expressed by a special prefix, since the translocative prefix i- cannot co-occur with the purposive suffix. The definite prefix wa'-/wa- (see Lesson 12),

Notes to the Student (cont'd)

when combined with the purposive, takes on the meaning of 'to be on one's way to do something' while wa'-/wa' without the purposive usually has the meaning of past tense. The examples below contrast the two forms. The purposive suffix is underlined.

wa'thrónhewe'	'he swept'
wa'thronhewá: <u>ne</u> '	'he's on his way there to sweep'
wahi'ni'khon:se'	'I sewed for him'
wahinikhon'sé: <u>re</u> '	'I'm on my way to sew for him'
	'I'm going there to sew for him'

To give an idea of the range of meanings that can be achieved by combining the verb and the purposive suffix with other affixes, some questions and the corresponding answers are given below.

1) Ohnihatierá: <u>ne</u> '?	'What is he going to do?'
	'What did he come to do?'
Ranatá:re'.	'He's here to visit.'
Rakhonniá: <u>ne</u> '.	'He's here to cook.'
Roio'tén'sere'.	'He's here to work.'
2) Ohnihatierá: <u>nene</u> '?	'What was he going to do here?'
Ranatá:renene'.	'He was going to visit (but he didn't).'
Rakhonniá: <u>nene</u> '.	'He was going to cook (but he didn't).'
Roie'tén'sere' <u>ne</u> '.	'He was going to work (but he didn't).'

Notes to the Student (cont'd)

- 3) Ohnahatierá:ne'? 'What is he going to do there?'  
 Wahanatá:re'. 'He's going there to visit.'  
 Wahakhonniá:ne'. 'He's going there to cook.'  
 Wahoio'ténsere'. 'He's going to work.'
- 4) Ohnahatierá:nene'? 'What was he going to do there?'

 Wahakhonniá:nene'. 'He was going to cook (but he didn't).'  
 Wahoio'ténsere'ne'. 'He was going to work (but he didn't).'
- 5) Ohnontahatierá:ne'? 'What is he coming to do?'  
 Tahanatá:re'. 'He's coming to visit.'  
 Tahakhonniá:ne'. 'He's coming to cook.'  
 Tahoio'tén'sere'. 'He's coming to work.'
- 6) Ohnontahatierá:nene'? 'What was he coming to do?'  
 Tahanatá:renene'. 'He was coming to visit (but he didn't).'  
 Tahakhonniá:nene'. 'He was coming to cook (but he didn't).'  
 Tahoio'tén'serene'. 'He was coming to work (but he didn't).'
- 7) Ohnihotierá:non? 'What has he gone there to do?'  
 Ronatá:ron. 'He has gone there to visit.'  
 Rokhonniá:non. 'He has gone there to cook.'  
 Roio'tén'seron. 'He has gone there to work.'

Notes to the Student (cont'd)

5. Like other languages, Mohawk has ways of expressing meanings like 'to know how to', 'to want something', 'to think something', 'to think about something', 'to be able to do something', etc. All of these constructions except b. 4 to 6 require the use of the indefinite mode in the subordinate sentences, which are in general translated into English by 'to' plus an infinitive verb form.

a) to want: - tohontso-

- |    |   |                                |
|----|---|--------------------------------|
| 1) | Tewakatohontsó:ni<br>kaná:takon iá:ke'.     | 'I want to go to town.'        |
| 2) | Kaná:taro' ken<br>tesatohontsó:ni?          | 'Is it bread that you want?'   |
| 3) | Iah thatehotohontsó:ni<br>aha'wahrahní:non. | 'He doesn't want to buy meat.' |

b) to want, to think: - ehr-

This verb can also be translated by 'want', but it can only occur in those places where you can replace it by 'think' in English, e.g. you can say for a. 1) above 'I'm thinking of going to town', but you cannot say for a. 2) 'Do you think bread?'

- |    |  |   |
|----|--|---|
| 1) | Í:kehre' kaná:takon<br>iá:ke'.         | 'I want to go to town.'<br>'I'm thinking of going to town.'                           |
| 2) | Íhsehre' ken ahse'-<br>wahrahní:non?   | 'Do you want to buy meat?'<br>'Are you thinking of buying meat?'                      |
| 3) | Iah te:ienhre' kaná:-<br>takon iá:ke'. | 'She doesn't want me to go to town.'<br>'She doesn't think that I should go to town.' |
| 4) | Kérhahkwe' ake'-<br>warahní:non.       | 'I wanted to buy the meat.'<br>'I was thinking of buying the meat.'                   |

Notes to the Student (cont'd)

If the verb -ehr- is used exclusively to express the meaning of English 'think', the following verb does not have to be in the indefinite mode as in the sentences above, and a word like on'te or toka 'maybe', 'could be' has to be added. Also, the form used for English 'I think' can be kwah i:kehre instead of i:kehre.

- |    |   |   |
|----|---|---|
| 5) | Kwah í:kehre' ronon-wáktani ón'te'.         | 'I think he's sick.'  |
| 6) | Íhsehre' ken tóka' rononwáktani ne Sa:k?    | 'Do you think that Jim is sick?'                                  |
| 7) | Í:ienhre' tóka' rohténtion'.                | 'She thinks he's gone away.'                                      |
| c) | <u>to agree to do something:</u>            | <u>-thon'tat-</u>   |
| 1) | Wa'kathón:tate' naiákwe'.                   | 'I agreed to go with them.'                                       |
| 2) | Wahathón:tate' ne iá:re'.                   | 'He agreed to go.'  |
| 3) | Iah tehothontá:ton tho iá:re'.              | 'He didn't agree to go there.'                                    |
| 4) | Ahsathón:tate' ken nahstió'tenhse'?         | 'Do you agree to work for me?'<br>'Would you please work for me?' |
| d) | <u>to be willing:</u>                       | <u>-rihoten-</u>  |
| 1) | Tho niwakerihó:ten ne tho iá:ke'.           | 'I'm willing to go there.'  |
| 2) | Tho nihorihóten' nahsonkwaiē:nawase'.       | 'He was willing to help us.'                                      |
| 3) | Tho ken nisarihó:ten naiétewe'?             | 'Are you willing to come along with us?'                          |
| 4) | Iah tho teiakorihó:-ten ne taienónniahkwe'. | 'She's not willing to dance.'                                     |

Notes to the Student (cont'd)e) to be able to, can:-kweni-

- 1) Enhakwé:ni' nahatá:wen. 'He can swim.'
- 2) Iah thahskwé:ni' ahsa'-therón:ni. 'You aren't able to make a basket.'
- 3) Enkkwé:ni' naonkhsá:ten. 'I can ride a horse.'
- 4) Wahakwé:ni' wahake'-nikonrhá:ton. 'He was able to fool me (to cheat me).'

- 2) Tsi ni:iot nakehrheke' iah se' toka' thaontare'. 'It seems to me that he might not come.'
- 3) Tsi ni:iot nahrehrheke' toka' wakeno:wen'. 'He seems to think that I'm a liar.'

Notes to the Student (cont'd)

6. In this lesson, you encountered in several places the so-called iterative prefix s-/ts- which expresses ideas that usually are translated into English by 'again', 'back', 're-' (re- like in return), e.g.:

- |  |                                  |
|--|----------------------------------|
| 1) <u>sk</u> ah <sup>h</sup> tentionhe'  | 'I'm going home'                 |
| 2) en <u>sh</u> ah <sup>h</sup> tén:ti   | 'he'll go home'                  |
| 3) <u>s</u> ah <sup>h</sup> iatóhare'    | 'I washed him again'             |
| 4) aon <u>s</u> ah <sup>h</sup> ihna'ne' | 'I should hire him again'        |
| 5) ha' <u>ts</u> itewatá:wen'            | 'let's swim again'               |
| 6) en <u>ts</u> akeninóhare'             | 'we (d,excl) will wash it again' |
| 7) en <u>ts</u> isewanóhare'             | 'you (p) will wash it again'     |

The iterative prefix precedes personal pronouns and the aorist wa'-/wa- which is reduced to a after the iterative prefix, as in 3) above. On the other hand, the iterative prefix follows the future and the indefinite mode prefixes as in 4) and 6) above. Remember that the indefinite mode prefix a- always becomes aon- before the iterative.

Examples 5) to 7) above show that the iterative prefix becomes ts-/tsi- in the first and second persons plural, that is in all 'you (d)' and 'you (p)' forms and in all 'we' forms.

7. In Lesson 3 you learned how to give commands in Mohawk. Verbs in the command form are relatively simple since they do not have any aspect ending. The same structure is also used for verb forms that are translated into English by 'let' plus an infinitive verb. This construction is often used with the free pronoun as in i: kekhón:ni 'let me do the cooking'. If the free pronoun is not used, the form reflects a stronger command, similar to the difference

Notes to the Student (cont'd)

reflected in the English translation: í:se' sekhón:ni, 'you cook', sekhón:ni 'cook!'.

í:se' sekhón:ni	'you cook'
i: kekhón:ni	'let me cook, let me do the cooking'
raónha rakhón:ni	'let him cook'
akaónha iekhón:ni	'let her/one cook'
aónha kakhón:ni	'let her/it cook'
i: tenikhón:ni	'let us (d,incl) cook'
i: iakenikhón:ni	'let us (d,excl) cook'
i: tewakhón:ni	'let us (p,incl) cook'
i: iakwakhón:ni	'let us (p,excl) cook'
í:se' senikhón:ni	'you (d) cook'
í:se' sewakhón:ni	'you (p) cook'
ronónha nikhón:ni	'let them (d,m) cook'
ronónha ratikhón:ni	'let them (p,m) cook'
onónha kenikhón:ni	'let them (d,f) cook'
onónha kontikhón:ni	'let them (p,f) cook'
í:se' saió'ten	'you work'
i: watió'ten	'let me work'
raónha roió'ten	'let him work'
akaónha iakoió'ten	'let her/one work'

If an unincorporated object is involved in an imperative structure, we get the following word orders:

Ne ki: kaná:tson í:satst.	'Use this pail.'
Ne ki: kaná:tson í:iontst.	'Let her use this pail.'
Ne ki: kaná:tson í:ratst.	'Let him use this pail.'

or

I: í:katst ki: kaná:tson.	'Let me use this pail.'
Raónha í:ratst ki: kaná:-tson.	'Let him use this pail.'

You find many more examples of verbs in the imperative form in the vocabulary section

Notes to the Student

1. In this and in some of the other lessons, you have encountered verbs that end in the suffix -on. This suffix is the stative or perfective aspect of Mohawk, and it expresses the idea that the subject is in the state or has been in the state described by the verb.\* This state can result from an action. Stative verb forms are usually translated into English by the perfective form, e.g. 'he has made a basket', though sometimes they can also be translated by the progressive form, e.g. 'he is making a basket'. Verb forms in the stative aspect are usually considered to be further in the past than verb forms in the definite mode with wa'-, e.g.:

rotiniá:k <u>on</u>	they are married
tehotská:h <u>on</u>	he is eating
ó:nen tehotská:h <u>on</u>	he has already eaten
roterén:note'	he's singing
róh <u>son</u>	he has finished making something
ro'therí <u>son</u>	he has finished making the basket
rohiá:t <u>on</u>	he has written
ronatahré:n <u>en</u>	he is visiting
roién't <u>hon</u>	he has planted

The stative aspect co-occurs often with the purposive suffix. These verbs are usually translated as e.g.: 'he has come to do something' or 'he has gone to do something', indicating that the action is not completed. (see also Note 4 in Lesson 17.)

\* For further information on the perfective, see Notes to the Student, 3, Lesson 19.

Notes to the Student (cont'd)

rohninón: <u>ron</u>	he has gone to buy
ronatá: <u>ron</u>	he has gone visiting
anonatá: <u>ron</u>	he should have gone to visit
enhonatá: <u>ron</u>	he'll have gone to visit
rokhonniá: <u>non</u>	he's gone there to cook
rotá: <u>whon</u>	he has gone there to sleep
thotorá' <u>thon</u>	he has come to hunt
thokhoniá: <u>non</u>	he has come to cook
rotia' <u>toharéhon</u>	he has gone to wash

Though -on- is the most common shape of the stative suffix, it can also take the shape of -en- or be completely absent, e.g.:

ro'therón: <u>ni</u> __	he's making a basket he has made a basket
rokhón: <u>ni</u> __	he is cooking he has cooked
rotá: <u>wen</u>	he has swum he has taken a bath
roio'tén' <u>en</u>	he has worked

You will have noticed that all of the above examples make use of the so-called objective pronoun, that is ro- instead of r(a)- in our examples. The objective pronouns were discussed in L-16, Note 1. It was mentioned there that the objective pronoun is used to express a state. The stative suffix -on, -en, always requires an objective pronoun. However, the opposite is not true: that is, not all verbs with an objective pronoun require the stative suffix.

If one wants to indicate that a state is completed, the past suffix -'ne'- (see Note 6 in this Lesson) is added to the stative suffix, e.g.:

Notes to the Student (cont'd)

waka'therón:ni	I have made a basket
waka'theronnihne'	I had made a basket
Aterón:to ieiakawé:non	she has gone to Toronto
Aterón:to ieiakawenón'ne'	she had gone to Toronto
rotá:whon	he has gone to sleep
rotawhón'ne'	he had gone to sleep

2. A very common feature of Mohawk is the use of reflexive constructions. The basic idea expressed by the reflexive is that the action or the state described by the verb is directed towards the subject of the sentence, e.g. in English 'I wash myself' as compared to 'I wash him'. In Mohawk, the reflexive is expressed by a verbal prefix which can take the following shapes: -atat-, -atate-, or -tat-.

wa'katate'nhó:ton	I locked myself in or out
wahontatia'tóhare'	they (p,m) washed themselves
wahontatié:nawa'se'	they (p,m) helped themselves
wahontatáhsehte'	they (p,m) killed themselves
ratatenón:we's	he likes himself
ratát'shons	he hates himself
satátken	you look into the mirror

There also exists a reduced reflexive which occurs frequently in Mohawk and which is not translated into English as a reflexive form. This semi-reflexive indicates that the action or state described by the verb is somehow directed towards the subject of the verb. The forms the semi-reflexive can take are: -ata-, -ate-, -aten-, or -at-, e.g.:

Notes to the Student (cont'd)

wa'katewennahtón'on	I'm hoarse I lost my voice
wakaterién:tare'	I know (that)
wa'thathsíniake'	he broke his leg
rota'karí:te'	he's healthy, he's well
wakatewirarákwen	I have adopted a child
wa'katerá:ko'	I took it (and kept it)
katenhní:nons	I sell it
raterennó'tha	he's a singer
watehnhotónkwas	the door opens
wa'tewátia'ke'	it broke

Sometimes the semi-reflexive morpheme -at- or -t- is used to express a semi passive as in the examples below.

Notice the difference in meaning between the forms with a full reflexive and those with a reduced reflexive, which are translated into English by 'got'.

wahatatkare:wahte'	he hurt himself
wahatkaré:wahte'	he got hurt
wahontatsheronniánion'	they (p,m) dressed themselves
wahontsheronniánion'	they (p,m) got dressed
wa'katatia'tóhare'	I washed myself
wa'katia'tóhare'	I got washed

The reciprocal, expressed in English by 'each other' is in Mohawk closely related to the reflexive. The only difference is that a reciprocal verb contains the duplicative prefix t- in addition to the full reflexive form. This duplicative prefix signals that two or more parties are involved. Compare the sentences below:

Notes to the Student (cont'd)

wahontatié:nawa'se'	they (p,m) helped themselves
wa'thontatié:nawa'se'	they (p,m) helped each other
wahontatenekón:reke'	they (p,m) hurt themselves with the hammer
wa'thontatenekón:reke'	they (p,m) hurt each other with the hammer
entsitewatátken	we (p,incl) will see ourselves again, we'll look again into the mirror
entsitewatátken	we will see each other again

3. You have learned in L-11, that the suffix -okon:'a is used to express the idea that several persons or animals are involved, e.g.:

kheién:'a	my child
kheien' <u>okón:'a</u>	my children
é:rhar	dog
erhar <u>okón:'a</u>	dogs

To express the plurality of inanimate nouns, a slightly different suffix is used, namely -shón:'a, e.g.:

ake:ra'	plate, dish, cup
ake'rah <u>shón:'a</u>	plates
kaia'tón:ni	doll
kaia'tonni' <u>shón:'a</u>	dolls
atiá:tawi'	garment
atia'tawi' <u>shón:'a</u>	garments
orí:wa'	affair
orihwa' <u>shón:'a</u>	affairs

Notes to the Student (cont'd)

However, these pluralized forms are not used as frequently as the corresponding English forms. For instance, if the verb contains the distributive suffix -nion, the noun can be in the singular, e.g.:

Sahsehtánion ne kaia'tón:ni'! Hide the dolls (here and there)!

or

Sahsehtánion ne kaia'tonni'-shón:'a! Hide the dolls (here and there)!

Also, if a number or a particle like é:so' 'many' precedes the noun, Mohawk uses a different way to pluralize (see also Lesson 9), e.g.:

skanónhsa	one house
tekanónhsake	two houses
áhsen nikanónhsake	three houses
é:so' kanónhsake	many houses

4. The verb root -t- carries the meaning of fast, continuous or repeated motion, e.g.:

rátie's	he is flying around all over
rátie'skwe'	he was flying around all over
teká:tens ken' kátie'	the airplane is flying by
tésten	go by plane!

This verb can also be combined with other verbs to emphasize that a state is prolonged or repeated over a certain period of time or a certain space. Combined with other verbs it can take the following shapes: -hatie'-, -tatie'-, -atie'- or -tie'-. Notice in the examples below that if -hatie' etc. is combined with a true verb like visit, hide, or sweep the objective pronoun form is used. For further information on this progressive construction, see also Lesson 19, Note 8.

Notes to the Student (cont'd)

wakenatahré:nen	I'm visiting
wakenatahronhátie's	I'm visiting several places
wakenatahronhátie'skwe'	I was visiting several places
<u>enwakenatahronhátie</u> :sheke'	I will be visiting several places
kaia'tiónni'	she's lying down, her body is lying down
kaia'tionnítie's	she's lying down repeatedly
kaia'tionnítie'	she's lying down while she is moving (e.g. in an ambulance)
kaniá:tare'	there is a body of water
kaniataratátie'	river, it goes on and on
kahiónha	creek
kahionhatátie'	creek, emphasizing continuous motion
wakerihwaio'tátie'	I'm planning something I'm working on an idea
rorihwaio'tátie's	he's planning something on and off
rohsehtonhátie's	he keeps hiding it
teiakaonhewenhátie'	she's in the process of sweeping

5. The aspect suffix -hak-, -hek-, -ek- or -k- expresses the idea that an action or a state will be or should be continued.

enhatorátsheke'	he'll be a hunter
ahakhonníhsheke'	he should be a cook
ahotá:hsheke'	he should be asleep
enhanatahré:hsheke	he'll keep visiting the same place

Notes to the Student (cont'd)

enhaterennót' <u>hake</u> '	he'll be a singer
enhotenhré:' <u>onske</u> '	he'll be a widower

The continuative suffix also occurs with verbs that indicate a state in the future mode or the indefinite mode, e.g.:

ronnonkwe'tí:io's	they (p,m) are good-looking
enhonnonkwe'tiió: <u>sheke</u> '	they'll be good-looking
enronkwe'tiió' <u>hake</u> '	he'll be good-looking
kaiarowá:nens ne thi	those are big bags
akaiarowanén: <u>sheke</u> ' ne thi	those should be big bags
rotsennón:ni	he's happy
ahotsennonní <u>hake</u> '	he should be happy

The continuative also shows up with the imperative, e.g.:

tseñthó' <u>shek</u> !	be a farmer! keep planting!
satorathé: <u>shek</u> !	be a hunter! keep going hunting!
sekhonní' <u>shek</u> !	be a cook! keep cooking!

The -k- suffix also shows up in the plural forms of inanimate nouns (see also Lesson 9).

áhsire'	blanket
tewahsirá: <u>ke</u>	two blankets
áhsen niwahsí: <u>rake</u>	three blankets
é:so' wahsí: <u>rake</u>	many blankets
atiá:tawi'	dress
tewatia'tawi'tsherá: <u>ke</u>	two dresses
áhsen niwatia'tawi'tsherá: <u>ke</u>	three dresses
é:so' watia'tawi'tsherá: <u>ke</u>	many dresses

Notes to the Student (cont'd)

6. You have learned (see Lesson 12, Note 4) that in Mohawk the idea that an action took place in the past, is expressed by the aorist or definite mode wa'-/wa- together with the punctual aspect. Verbs in this form express that an action definitely took place, and that it took place once. These verb forms are usually translated into English by the simple past, e.g.:

wa'khní:non	I bought (it)
wahaién'tho'	he planted

However, Mohawk has several other ways of indicating that an action or a state took place in the past or is completed.

1) the suffix -kwe'/'ne'

This suffix indicates that an action or a state is completed. Whether a verb will take -kwe' or 'ne' as past suffix appears to depend on the environment. For instance, -kwe' always appears after an s, while 'ne' always appears after the stative suffix -on. When -kwe' follows the habitual suffix -s-, the verb is translated into English with 'used to'.

ratshókwas	he smokes, he's a smoker
ratshókwask <u>we'</u>	he was a smoker, he used to smoke
roió'tens	he works, he's a worker
roió'tensk <u>we'</u>	he was a worker, he used to work
roió'te'	he is working
roió'teh <u>we'</u>	he was working
ronónhsote'	he has a house
rononhsó:tah <u>we'</u>	he had a house

Notes to the Student (cont'd)

kaiarí:io's *	they are nice bags
kaiarí:io's <u>kwe'</u>	they were nice bags
kaiarí:io'	it's a nice bag
kaiariió <u>hne'</u>	it was a nice bag
rotorá'thon	he has gone hunting
rotora'thón' <u>ne'</u>	he had gone hunting
rotiniá:kon	they are married
rotinia'kón' <u>ne'</u>	they were married
wahatorá'the'	he's going to hunt
wahatorá'the' <u>ne'</u>	he was going to hunt (but he didn't)

2) the particle shos 'used to'

This particle expresses an idea which is very similar to that of a verb with the habitual aspect and the past suffix -kwe', e.g.:

rató:rats <u>kwe'</u>	he was a hunter
rató:rats <u>shos</u>	he used to hunt
raién'thos <u>kwe'</u>	he was a farmer
raién'thos <u>shos</u>	he used to farm
ra'wá:raks <u>kwe'</u>	he was a meat eater
ra'wá:raks <u>shos</u>	he used to eat meat

- \* The plural suffix -s found with adjectival verbs is identical with the habitual aspect suffix (see L-6, Note 3, L-19, Note 8), but instead of expressing plurality or repetition of an action, it expresses that the quality in question is assigned to several objects, e.g.:

iohahaná:wen	'the road is wet'
iohahaná:wens	'the roads are wet'
teiohtahkwá'tson	'the shoe is dirty'
teiohtahkwá'tsons	'the shoes are dirty'

Notes to the Student (cont'd)

However, shos behaves differently from 'kwe' in a number of instances:

- a) if the verb is negated, -kwe' remains a suffix, while shos moves before the verbal structure, e.g.:

iah tekená:tarak <u>skwe'</u>	I never ate bread
iah <u>shos</u> tekená:taraks	I never used to eat bread
iah tehaká:rat <u>onskwe'</u>	he never told stories
iah <u>shos</u> ne tehaká:rat <u>ons</u>	he never used to tell stories

- b) if the verb is preceded by a particle like tiótkon 'always', only shos can occur:

tiótkon <u>shos</u> ratshókwás	he always used to smoke
tiótkon <u>shos</u> raká:rat <u>ons</u>	he always used to tell stories

The particle shos can also occur with the stative aspect, e.g.:

tiótkon <u>shos</u> roká:rat <u>on</u>	he was always telling stories
tiótkon <u>shos</u> roterén:note'	he was always singing

7. English has a number of verbal prefixes like dis- and un-, that reverse the original meaning of the verb, e.g. 'undo', 'disconnect', etc. In Mohawk this idea is expressed by two suffixes, namely -hsi and -ko-/-kw-.

se'rhó:rok!	cover it!
se'rhórók <u>hsi</u> !	uncover it!
ro'rhórók <u>hsion</u>	he has taken the cover off
ra'rhórók <u>hsions</u>	he's the one who takes the covers off

Notes to the Student (cont'd)

senón:tek!	close it! (with a lid)
senontékhsi!	open it!
ranontékhsions	he is uncovering it
ronontékhsion	he has uncovered it
ranontekhsión:nene'	he was going to take the cover off
se'wahrakwé:tar	cut the meat!
se'wahrakwe'tarón:ko'	slice the meat!
waha'wahrakwe'tarón:ko'	he sliced the meat
se'nhó:ton	close(it)! (a door, a window, something with a hinge, also a store)
senhotón:ko'	open(it)!
ra'nhotónkwas	he's opening it, doorman
ro'nhotónkwen	he has opened(it)
ro'nhotonkwén:ne'	he had opened
séta!	put it in!
stáhko'	take it out!
enhatáhko'	he'll take it out
rotáhkwen	he has taken it out
tsén:tho'	plant!
tsen'thó:ko'	harvest!
raien'thókwas	he is harvesting
roien'thókwen	he has harvested

The reversive suffix is also used to express the end or interruption of an action, e.g.:

sáhso'!	dye it!
sahsó:ko'	stop dying!
	take it out of the dye!

Notes to the Student (cont'd)

wa'kenóhare'	I washed
wa'kenoharéh <u>si</u> '	I just finished washing
rokhón'ni	he has cooked
rokhon'niá <u>hsion</u>	he has already done the cooking
rotá:wen	he has taken a bath
rota'wén' <u>sion</u>	he has already taken a bath

8. So far you have learned two of the pronoun sets that occur in Mohawk, the subjective and the objective set. In addition to these two sets Mohawk makes use of a so-called transitive set that mentions both the subject and the object of the verb if the object is animate, i.e. either human or an animal. For example, if you say riiente:ri thi raksa:'a 'I know that boy', you are actually saying 'I-him-know that boy'. Some of the forms are neutralized, for example ronwaiente:ri means 'they know him'. The distinction between dual, plural, feminine and masculine does not exist for 'they' in the transitive pronoun set. But in spite of these neutralizations, the list of transitive pronouns is very long. It is included here to serve as reference. The pronouns may vary slightly depending on the initial sound of the verb root. These variations are not included for reasons of space. For further examples of transitive pronouns, see M-1, M-4, M-6 and M-10 of this lesson.

All of the pronouns that begin with tsh-, e.g. tshisewa-nón:we's 'he likes you (p)' can also be found with initial he- or 'e-, e.g. hetshisewa-nón:we's or 'etshisewa-nón:we's.

LESSON 19

C-: Converse, Communicate

C-1

A kitchen just before mealtime. The family is gathering. There is the mother, A, her three children, B, C, and D and her husband, F.

B: Nahó:ten tewákhe'?

B: What are we (p,incl) having to eat?

Notes to the Student

1. In this and earlier lessons, you have encountered the instrumental suffix -th-, -t- which expresses the meaning 'used for', 'with', 'into', or 'out of', e.g.: tsi iekhonnaí:tha 'kitchen', 'the place used for cooking' or onon'ware:tha 'soap', 'it is used for washing'. This suffix takes the following shapes:

- a) -th- before a final -a, e.g.:

<u>iekhonnaí:tha</u>	one uses it for cooking
<u>tsi ionnonwé'tstha'</u>	bedroom, it is used for sleeping
<u>ieksokewáhta'</u>	dishtowel, it is used for wiping the dishes with
<u>iakotá:stha'</u>	something used for sleeping, a nightgown, an anaesthetic, a sleeper on a train
<u>ó:iente' iontkarí:tha</u>	she plays with the wood
<u>ká:nhes ronniá:tha</u>	he makes it with silk he makes it into silk

- b) -t- everywhere else, e.g.:

<u>kaia'tón:ni enionká:ri'te'</u>	she'll play with the doll
<u>ká:nhes són:nia't!</u>	make it out of silk!

The instrumental suffix also occurs in the verb 'to use something' or 'to use for something', 'to use to do something', e.g.:

<u>Nahó:ten én:satste' tsi</u> <u>enhsó'kwate'?</u>	What will you use to do the digging?
<u>Atokwahkó:wa én:katste'.</u>	I'll use a big spoon.
<u>Nahó:ten iontstá:ne' ki:</u> <u>onia'tará:'a?</u>	What is she going to use this cotton for?
<u>Atiá:táwi iakonna'tá:ne'.</u>	She's going to make a dress with it.

Notes to the Student (cont'd)

Nahó:ten ráts <u>th</u> a ki: ó:iente'?	What does he do with this wood?
Atekhwá:ra' ronniá: <u>th</u> a.	He makes tables out of it.
Oh nika'wahró:ten enkenonta- rónnia' <u>te</u> '?	Which meat shall I use to make soup with?
Kítkit i:sat <u>st</u> .	Use chicken.

The instrumental suffix expresses two meanings. Consider the two translations that are possible for question 1.

- |                                  |  |
|----------------------------------|--|
| 1. Nahó:ten en:rat <u>st</u> e'? | 1a: What will he do with it?<br>What will he use it for? |
|                                  | 1b: What will he do it with?<br>What will he use for it? |

1a. questions the use something will be put to, it can be answered by:

- |  |  |
|--|--|
| 2a. Atekhwá:ra ronnia' <u>tá</u> :ne'. | He's going to make a table<br>out of it. |
|--|--|

1b. questions what instrument will be used and it can be answered by:

- |                                  |                    |
|----------------------------------|--------------------|
| 2b. A:share'én:rat <u>st</u> e'. | He'll use a knife. |
|----------------------------------|--------------------|

The above-discussed instrumental suffix -th-, -t- is often followed by another suffix that takes the forms -hkhw- or -hkw-.

- c) -hkhw- before final -a and at the end of a word:

satkahrí:takh <u>hw</u> !	use it to play with!
ienohare' <u>tá</u> kh <u>hw</u> a'	detergent, water, etc. one uses it to wash with
teie'wahrawe'estákh <u>hw</u> a'	fork, one uses it to pierce the meat with
iontkaritákh <u>hw</u> a'	toy, one uses it to play with
iekhonniatákh <u>hw</u> a'	cooking utensils, one uses it

Notes to the Student (cont'd)

d) -hkw- everywhere else, e g.:

enhsatkahrí:tahkwe'	you'll use it to play with
ne: wa'keksoharé:tahkwe' ki:	I used this cloth to wash
onia'tará:'a	the dishes with

The exact meaning of the suffix -hkhw-, -hkw- is difficult to establish and it is possible that changes have taken place recently. Today it expresses that the object used is not normally used for the action in question, for instance a spoon used for digging, a dishtowel used as a potholder, or a pot used to make bread. The -hkhw- suffix also occurs with the verb 'to use'.

Nahó:ten enkatstáhkwe' tsi	What shall I use to make
enkena'tarón:ni?	the bread in?

Ne kí:ken kaná:tson	Use this pot!
sátstahkhw!	

Nahó:ten seksohare'tákhwa?	What do you use to wash the
	dishes with?

Ieksokewáthta' katstákhwa.	I use the dishtowel for it.
----------------------------	-----------------------------

Below are some examples that illustrate the difference between the suffix -t-, -th- and the combination of the two suffixes -t-, -th- and -hkhw-.

Ne ki: í:sats!	Use this one!
----------------	---------------

Ne ki: satstákhw!	Use this for it! (not the
	thing usually used for this
	function)

Nahó:ten én:katste'	What shall I use to make
nakena'taron:ni?	the bread?

Iah tewakéksaien'.	I don't have a dish.
--------------------	----------------------

Nahó:ten káti' enkatstáhkwe'?	What shall I use then?
-------------------------------	------------------------

Ne ki: kaná:tson satstákhw!	Use this pot!
-----------------------------	---------------

Notes to the Student (cont'd)

Nahó:ten sáts <u>tha</u> ki: ó:iente'?	What do you use this wood for?
Atekwá:ra konniá: <u>tha</u> .	I use it for making a table.
Katkahri ' <u>tákhwa</u> .	I use it to play with.

2. The particle tsi occurs very frequently in Mohawk, either by itself or in combination with other particles. Below, some of the more common meanings of tsi are discussed.

a) tsi 'that', 'for', 'to', connects two sentences, that is it connects a subordinate clause with a main clause, e.g.:

Wakaterién:tare' <u>tsi</u> kaná:takon iehawé:non.	I know that he has gone to town.
Wahatié:nawase' <u>tsi</u> wa'keksóhare'.	He helped me to wash the dishes.
Roterién:tare' <u>tsi</u> iethó:re'.	He knows that it is cold.
Ó:nenk <u>tsi</u> enshahtén:ti.	He has to go home. It's necessary that he'll go home.
Enhihsnié:nen' <u>tsi</u> rokhón:ni.	I'll help him to cook.
Onón:ta' wá:katste' <u>tsi</u> wa'kenóhare'.	I used milk to wash it.
Á:share' wá:katste' <u>tsi</u> wa'tkená 'khon.	I used a knife for scraping it.

b) tsi 'during'. In order to express this meaning, the stem takes on the partitive prefix ni- and a suffix -es, which may be the habitual aspect suffix.

<u>tsi</u> niwahsón:tes	during the night
<u>tsi</u> niwenhníseres	during the day

Notes to the Student (cont'd)

- c) tsi nikarí:wes 'during the time', 'while', 'as long as'.  
This expression is related to the forms in b) above.
- Énhseke' tsi nikarí:wes saió'te'. You'll eat it while you work.
- Rakhón:ni' tsi nikarí:wes ken' rén:te'. He cooks while he's staying here.
- Tsi ni' tses rohwi'staien iah tha'taonta:re'. As long as he has money, he won't come back.
- Enki'terón:take' tsi nikarí:wes teiotohontsóhon. I'll stay as long as it is necessary.
- d) ne tsi 'because'.
- Ne arihón:ni' iah thatewakats- I'm not eating because I'm  
ká:hon ne tsi iah tekatonkariaks. not hungry.  
The reason I'm not eating  
is that I'm not hungry.
- Riienawá:se' ne tsi rinón:we's. I help him because I like  
him.
- e) nek tsi 'but'.
- Tehotohontsoníhne' aontá:re' He wanted to come but he  
nek tsi iah tehonáktó:tahkwe'. had no time.
- Iah tewaké:ka's nek tsi I don't like it but I'll  
én:keke' ki'. eat it.
- f) tsi 'so' emphasizes the following adjectival verb.
- Tsi kanó:ron. It is so expensive.
- Tsi rokstén:'a. He is so old.
- É:so' tsi kowá:nen. It's very big.
- É:so' tsi iekhwaweiénhen. She really knows how to cook.  
She's a very good cook.

Notes to the Student (cont'd)

- g) tsi 'the place where', 'the place that'  
tsi non:  
tsi nón:we'

tsi 'the place that' is used before verbal structures with the she/it pronoun, e.g.:

<u>tsi</u> iontawenstákhwa	bathroom, the place that is used for bathing
<u>tsi</u> ionnonwé'tstha	bedroom, the place that is used for sleeping
<u>tsi</u> kanonhsí:io	living room, the place of the house which is nice

tsi non: 'the place where', 'where'  
tsi nón:we'

Ionón:te's <u>tsi nón:we'</u> :nén:teron.	It's a big hill where he lives
Enkonna'tón:hahse' <u>tsi non:</u> thoió'te'.	I'll show you where he works.
Wakaterién:tare' <u>tsi non:</u> ieiionnonwé'tstha.	I know the place where she goes to sleep.

Sometimes the relative 'where' is expressed by ka' non:, e.g.:

Enhiriwanón:tonhse' ka' non: I'll ask him where Jim lives.  
thén:teron ne Sa:k.

Ka' non: seems to occur with verbs like 'ask', or 'tell' i.e. if there is an implied question. Tsi non: refers more specifically to 'the place where' and has some demonstrative power. Compare the sentences below.

Enketshén:ri <u>ka' non:</u> thén:- teron.	I'll find the place where he lives.
Wa'ketshén:ri <u>tsi non:</u> thén:- teron.	I found the place where he lives.

Notes to the Student (cont'd)

Sateriën:tare' ken ka' non: thén:teron? Do you know where he lives?  
thén:teron?

Tienté:ri tsi non: thén:teron. I know where he lives.

Wahakró:ri ka' non: thén:- teron ne Sa:k. He told me where Jim lives.

Wahakró:ri tsi non: thén:- teron ne Sa:k. He told me at the place where Jim lives.

- h) tsi 'when'. In order to express this meaning, tsi has to be followed by a verb that has the partitive prefix n- and the future prefix en-. For further information on 'when' sentences, see Note 6. in this lesson.

Tsi nenhaté:sere', ó:ia' When he'll come, I'll buy  
enhiahtahkwahní:non'se' him other shoes.

Tsi nén:thre' enhiié:- When he'll come, I'll help  
nawase' him.

- i) tsi náhe 'since', 'ever since'.

Ó:nen énska wa'kahwistá:eke' It has been an hour since  
tsi náhe rohténtion. he left.

To: nikarí:wes ó:nen tsi How long has it been since  
náhe tkonkénhe' I saw you?

Tsi náhe shihienté:ri, Ever since I've known him,  
shihó:ten. he has been poor.

- j) tsi niió:re' 'till', 'as far as', 'before'.

Iah thaonsakahtén:ti tsi I won't leave till three  
niió:re' áhsen niiohwistá:'e. o'clock.

Enhstiatíta ken tsi niió:re' Will you give me a ride as  
Tioht: á:ke? far as Montreal?

Enhsatekhwísa' ne sa'tsikhé:- You'll finish your candy  
ta' tsi niió:re' iénhsewe'. before you'll get there.

Notes to the Student (cont'd)

ohén:ton tsi niió:re' 'before'

Enhatewienste' ohén:ton tsi He'll study before he sleeps  
niió:re' enhó:tawe'.

Teniontská:non' ohén:ton tsi She'll eat before she leaves.  
niió:re' enionhtén:ti'

k) tsi ni- + pronoun + -a', 'the size of it', 'as big as'.

tsi ní:wa' it is as big as (for objects)

To: ní:wa' natekhwá:ra? How big is the table?

Tsi ní:wa' ne satekhwá:ra. As big as your table.

tsi niá:ka' she/it is as big as (for animate things)

tsi ní:ra' he's as big as

tsi nihón:na's they (p,m) are as big as

l) tsi ní:kon 'as many as', 'whenever'.

To: ní:kon sá:ien'? How many (objects) do you have?

Tsi ní:se' ní:kon sá:ien'. As many as you have.

Tsi ní:kon enhí:ken  
tiótkon ro'nikonhrá:ns. Whenever I see him, he's always sad.

Tsi ní:kon ién:ke', tiótkon rohténtien. Whenever I go there, he's always gone away.

Tsi ní:kon erwakenonhwákten, Everytime I get sick, (that's  
kheh ní:kon tho ién:ke'. how many times), I go there.

m) tsi ní:iot 'rather than', 'the same as',  
tsi ni: 'the way that', 'than'

Ne akerá:ko aki'terón:take' I'd rather stay home than go  
tsi ní:iot natiá:ken'ne' out.

Sha'tewatia'tawitsheró:ten He bought the same shirt as  
wahahní:non tsi ni:' ní:iot. I did.

Notes to the Student (cont'd)

Iah nonwén:ton the' thahsha-  
koié:na' tsi ní:iot tsi  
rató:rats. He'll never catch anything  
the way he hunts.

Iah tho tha'tewaka'nikón:-  
rhare' tsi ní:iot nakaénha. I don't worry the way she  
does.

Iah tewakon'éskwani tsi ni:  
tsi ionterennó'tha. I don't like the way she  
sings.

n) tsik 'only if'.

Tho: ken wáhse' nenió:-  
karahwe'? Are you going there tonight?

Tsik í:se' ó:ni' tho:  
ién:hse'. Only if you go there too,

Tsik iontenhninón:tha  
entéhsawe'. Only if you bring it from  
the store.

Tsik niwahsón:tes. Only during the night.

3. Sentences that express cause and effect can take various shapes in Mohawk. Usually the two sentences are connected by ne arihón:ni' 'that is why', 'that is the reason why', e.g.:

Kaná:takon wá:re', ne arihón:-  
ni' iosnó:re' wahahtén:ti. He's going to town, that's  
why he left early.

Iah teshohwístaien ne arihón:-  
ni' rén:teron. He doesn't have any more money,  
that's why he's staying home.

Sentences like the two above can also be turned around, e.g.:

Ne arihón:ni' iosnó:re'  
wahahtén:ti ne tsi kaná:-  
takon wá:re'. The reason why he left early  
is that he is going to town.  
He left early because he's  
going to town.

It is also possible to omit ne arihón:ni', e.g.:

Iosnó:re' wahahtén:ti ne tsi  
kaná:takon wá:re'. He left early because he's  
going to town.

Notes to the Student (cont'd)

Oh niiontié:ren tsi  
thienawá:se'?

Why do you help him?

Ne tsi rinón:we's.

Because I like him.

In many instances ne arihón:ni' can be replaced by ne aorí:wa' 'that's the reason why'.

Ne aorí:wa' riienawá:se'  
ne tsi rinón:we's.

The reason I'm helping him  
is that I like him.

Ne aorí:wa' contains ó:riwa' 'affair, matter, fault'.

Thus we can get the following sentences:

Iah i: tewakerí:wa', í:se'  
sarí:wa'.

It's not my fault, it's  
your fault.

Raónha raorí:wa' tsi  
eniakwen'terón:take'.

It's his fault that we're  
going to stay home.

Iah akaónha teiakorí:wa' tsi  
iah tekanatará:ien.

It's not her fault that  
there is no bread.

Í:se' ken sarí:wa' tsi  
taieiá:ten'ne'?

Is it your fault that she  
fell off?

4. The fact that somebody benefits from or is the recipient of an action is generally expressed in English by the prepositions 'to' or 'for', e.g. 'I work for him', 'I gave it to him'. Sometimes, the relationship is not marked by a preposition, e.g. in 'I help him'. In Mohawk, such relations are expressed by verbal suffixes. \* These suffixes precede the aspect suffixes and the purposive. Thus we can get the following forms (the benefactive is underlined).

---

\* There is evidence that some of the so-called suffixes are actually verb roots. For instance, the benefactive suffix -ni- occurs as a verb root in the paradigm for 'lend', e.g. tákeni, 'lend it to me', wahákeni, 'he lent it to me'. See also the discussion of the progressive -hatie in Lesson 18.

Notes to the Student (cont'd)

enhi'ni'khon'sé:ra'	I'll go there to sew for him
wahinikhon'sé:re'	I'm on my way to sew for him
wahi'ni'khon'sé:ra'	I went there to sew for him
rini'khon'sé:re's	I go there regularly to sew for him
enhikwatakwení:ra'	I'll go there to fix it for him
wahikwatakwenísé:re'	I'm on my way to fix it for him
rikwatakweníhrónhne'	I went there to fix it for him
rikwatakwení:re's	I go there regularly to fix it for him
tskwatakwení:ra!	go there to fix it for him!

Which of the benefactive suffix occurs depends on the verb and the aspect involved. Four major classes were distinguished

Class 1: The benefactive suffix that occurs with this class is -s-, -hs-, e.g.:

enwatió'ten'	I'll work
enhiíó'tenhse'	I'll work for him
riio'tenhse'	I work for him
thió'tenhs	work for him!
ó:nen riio'ténhse'	I've already worked for him
enkenóhare'	I'll wash
enhinóhare'se'	I'll wash for him
rinoharé:se'	I'm washing for him, I wash for him
tshenóhare's	wash for him!
ó:nen rinoharé:se'	I've already washed for him

Other verbs belonging to this class are:

tenhírihtá:se'	I'll break it for him
enínawá'se'	I'll help him
enhién'thohse'	I'll plant for him

Notes to the Student (cont'd)

tenhi <sup>h</sup> entohwiha' <u>se</u> '	I'll split the wood for him
enhi'ni'khon' <u>se</u> '	I'll sew for him
enhihni:non' <u>se</u> '	I'll buy for him
enhiiatenhi:non' <u>se</u> '	I'll sell for him
enhiiatkehrónhah <u>se</u> '	I'll sell to him

Class 2: The two benefactive suffixes that occur with t' is class are -s- and -ni-. -s- occurs with the punctual aspect, i.e. the definite, the indefinite and the future mode, and with the imperative. The suffix -ni- occurs with the stative and the serial aspect.

enkewennahnó:ton'	I'll read
enhiwennahnó'thah <u>se</u> '	I'll read for him
tshewennahnó'tha' <u>s</u>	read for him!
riwennahno'tá: <u>ni</u>	I'm reading for him
riwennahno'tá: <u>nis</u>	I read for him regularly

enkkwatá:ko'	I'll fix it
enhi <sup>h</sup> kwatákwah <u>se</u> '	I'll fix it for him
tskatákwah <u>s</u>	fix it for him!
rikwatakwén: <u>ni</u>	I'm fixing it for him
rikwatakwén: <u>nis</u>	I fix it for him regularly

Class 2 appears to be the largest class. Below are some other verbs that belong to it.

enhihiá:tonh <u>se</u> '	I'll write for him
rihiatón: <u>nis</u>	I write for him
enhi <sup>h</sup> karatón'hah <u>se</u> '	I'll relate to him
	I'll tell him a story
rikaratón: <u>nis</u>	I tell him stories
enhi <sup>h</sup> aterennó'thah <u>se</u> '	I'll sing for him
riiaterennotá: <u>nis</u>	I sing for him

Notes to the Student (cont'd)

enshakori 'warón:tonhse'	he'll ask her
shakori 'wanontón:ni	he's asking her
enhithárhahse'	I'll talk to him
rihthará:ni	I'm talking to him
enhina 'tón:hahse'	I'll show him
rina 'tón:ni	I'm showing him
enhitsenhónnien'se'	I'll make for him
ritsenhonnién:nis	I make for him regularly
enhiiatóriahse'	I'll drive for him
riiatorién:ni	I drive for him regularly
enhiiateweien'tón:hahse'	I'll put it away for him
riiateweien'tón:ni	I'm putting it away for him
enhinéhskwahse'	I'll steal it for him
rinéhskwén:ni	I'm stealing it for him
tenhiiatonserá:ien'se'	I'll play cards for him
tehihiatonseraién:ni	I'm playing cards for him

Class 3: This class marks the benefactive by the two suffixes -en- and -ni-. -en-\* occurs with the punctual aspect and the imperative, -ni- with the stative and the habitual aspect, e.g.:

wahskó:wanahte'	You made it too big
wahseko 'wanáhten'	You made it too big for her
sheko 'wanáhten	make it too big for her!
shekowanáhtén:nis	You make it too big for her

\* Notice that the -en- suffix also occurs in the habitual and stative aspects preceding the -ni- suffix. It appears that some of the forms are the result of morphophonemics.

Notes to the Student (cont'd)

entékhawé'	I'll bring it
ienhíhawíhten'	I'll bring it for him
ó:nen íehíhawíhtén: <u>ni</u>	I already brought it for him

Other verbs belonging to class 3:

enshakohtahkónnién'	he'll make shoes for her
shakohtahkonnién: <u>nis</u>	he makes shoes for her
ensheiahstóhten'	you'll make it too small for her
sheiahstohtén: <u>nis</u>	you make it too small for her
enhiríhón: <u>nien'</u>	I'll teach him
riríhónnién: <u>nis</u>	I teach him regularly

Class 4: A small group of verbs marks the benefactive with the suffixes -w- and -s-. -w- occurs with the stative and the habitual aspect, -s- with the punctual aspect and the imperative.

enhinatahré: <u>nahse'</u>	I'll visit him
rinatahrená: <u>wi</u>	I've visited him
tshenatahré: <u>na's</u>	visit him!
enkenatá: <u>ra'</u>	I'll visit
o:nen wakenatahré: <u>nen</u>	I've already visited
i: enthákerah <u>se'</u>	he'll blame it on me
i: thakerá: <u>wi'</u>	he's blaming me

Some English verbs can occur with the preposition 'for' as well as the preposition 'to', e.g.: 'I'll sell it to him or 'I'll sell it for him'. In Mohawk these two sentences are not distinguished, i.e. the Mohawk sentence below has two meanings:

Notes to the Student (cont'd)

enkoniatenhni:non'se'            I'll sell it to/for you

In some instances, however, another affix will disambiguate a sentence. In the example below, the translocative prefix i- implies a direction, a motion towards the recipient.

enhihiá:tonhse'	I'll write for him
ienhihiá:tonhse'	I'll write to him
tshiá:ton's	write for him!
ia'tshiá:ton's	write to him!

The English preposition 'from' is not expressed in Mohawk by a special affix. Instead, the use of the transitive pronoun implies this meaning, e.g.:

enkenénhsko	I'll steal it
enhinén'sko	I'll steal it from him
enhinénhskwahse'	I'll steal it for him
enkhni:non'	I'll buy it
enkonhni:non'	I'll buy it from you
enkonhni:non'se'	I'll buy it for you

5. In Lesson 18, Note 3, we discussed the nominal plural suffix -shon:'a. Variations of this suffix can also occur with verbs and locatives expressing the general meanings of distribution of an action and of plurality. The suffix only occurs with verbs in the punctual aspect or in the imperative form.

a) the suffix -shon/-hon/-on \* occurs with verbs. Its meaning is that an action is distributed over space, e.g.:

\* It appears that the above-discussed suffix can be broken down further and that the -on- part represents the stative aspect suffix.

Notes to the Student (cont'd)

ién:re'	he'll go
enhréshon	he'll walk around
enhatákhe'	he'll be running
enhatákhéshon	he'll run around
enkenatá:ra'	I'll visit
enkenatahréshon	I'll visit several places
senatahréshon	visit all over! do some visiting!
wahsenatáhréshon	you visited all over
enhaté:sere'	he'll crawl
rateseréshon	let him crawl all over
enhateseréshon	he'll crawl all over
wahateseréshon	he crawled all over
tenharáhtate'	he'll run
tenharahtáthon	he'll run around
seró:rok	gather it! collect it!
seróhrókhon	gather it in separate piles!
tsén'tho	plant!
tser'thóhseron	plant all over! plant them! keep planting!

- b) the suffix -shon occurs with locatives to indicate that several locations or several parts of the same location are involved.

atekhwahráhne ratákhes	he's running around on the table
atekhwahrahnéshon ratákhes	he's running around on the tables
kahentá:ke ratákhes	he's running on the grass
kahenta'késhon ratákhes	he's running all over on the grass

Notes to the Student (cont'd)

karhá:kon	in the bush
karhakón' <u>shon</u>	from bush to bush, in the bushes
kaseréhtakon	in the car
kaserehtakón' <u>shon</u>	in the cars

- c) the suffix -shon occurs with body parts after the locative suffix -ne/-ke (see Lesson 13) to indicate plurality.

skonhsá:ke	(on) your face
senikonhsá:ke	(on) your (d) face
sewakonhsakéh <u>shon</u>	(on) your (p) face
seshnonhsá:ke	(on) your hand
seshnonhsakéh <u>shon</u> *	(on) your (p) hands
sewahsnonhsakéh <u>shon</u>	(on) your (p) hands

6. To express that an action took place or that a state existed simultaneously with another action or state, Mohawk uses the verbal prefix sh- which can often be translated into English by the conjunction 'when', e.g.:

Kátke ní:ro'?	When did he arrive?
<u>Shi</u> wakekhón:ni ní:ro'.	He arrived when I was cooking.

---

\* Like in many other languages, plurality does not have to be marked in Mohawk if the context is unambiguous. For instance, we get two forms for 'on your (p) hands', one with the 'you' singular pronoun, se-, one with the 'you' plural pronoun sewa-. This is possible because the ending -shon already expresses plurality.

Notes to the Student (cont'd)

Ohnihsatiérhahkwe' <u>shá</u> :- rawe'?	What were you doing when he arrived?
Wakekhonníhne' <u>shá</u> :rawe'.	I was cooking when he arrived.
Iorahkó:tahkwe' ken <u>shahsah</u> - tén:ti?	Was it sunny when you went away?
Iah, ioronhiorón:ne' <u>sha</u> 'kah- tén:ti.	No, it was cloudy when I went away.
Kátke nihsateweiénston?	When did you study?
<u>Shihó</u> :ta's niwakateweiénston.	When he was sleeping, I studied.
Kátke nihiaienawá:se' ne Saró?	When did Charles help you?
<u>Shiwa</u> 'kenonwáktani'.	When I was sick.
Raweién:te' ken nahaté:- sere' ne Tier?	Does Peter know how to crawl?
Hen, raté:sere'skwe' <u>sha</u> 'khe- natahré:nahse'.	Yes, he was crawling when I visited them.

The sh- prefix can occur several times in a sentence, e.g.:

To: náhe te'thienterha:'on?	How long have you known him?
<u>Shihawirá</u> : 'a <u>shihii</u> enté:ri.	I've known him ever since he was a baby.
Tiótkon ken <u>shihó</u> :ten?	Has he always been poor?
Hen, tsi náhe <u>shihii</u> enté:ri, <u>shihó</u> :ten.	Yes, ever since I've known him, he's been poor.
Shé:kon ken <u>shii</u> oráhkote <u>shahsah</u> tén:ti?	Was it still sunny when you went away?
Hen, shé:kon <u>shii</u> orahkó:te'.	Yes, it was still sunny.

Notes to the Student (cont'd)

Sh- often merges with the following prefix, namely:

a:	sh + ni	becomes	shi-
b:	sh + wa'	becomes	sha'-
c:	sh + wa	becomes	sha-
d:	sh + wa' + wa	becomes	shon-

Sh- can only be used with the past tense. In the future, the conjunction 'when' is expressed by tsi and the partitive prefix n-, e.g.:

Kátke é:thre'?	When will he come?
<u>Tsi</u> <u>nerwatio'ten</u> é:thre'.	When I'll work, he'll come.
Kátke eniakwakhón:ni?	When will we (p,excl) cook?
<u>Tsi</u> <u>nén:rawe'</u> .	When he'll arrive.

7. In the preceding note, we discussed the prefix sh- which indicates that something happened at the same time, which in English is usually expressed by 'when'. The same prefix is also used to express sameness among objects or people, usually translated into English by 'the same as', e.g.:

<u>sha'té:ioht</u>	they(d) are the same
<u>sha'teiohtón:ne'</u>	they(d) were the same
<u>sha'tenióhton</u>	they(d) will be the same
<u>sha'tewahsohkó:ten</u>	they(d) are the same colour
<u>sha'tewahsohko'ténhne</u>	they(d) were the same colour
<u>sha'tenwahsohko'ténhake'</u>	they(d) will be the same colour
<u>sha'tewahsohkó:tens</u>	they(p) are the same colour
<u>sha'teiókste'</u>	they(d) are the same weight
<u>sha'tethotí:ien.</u>	they(p) are of the same age
ne: <u>sha'tewa'sharó:ten</u>	it's the same kind of knife

Notes to the Student (cont'd)

In the above examples two or more objects or people are compared with each other, which is reflected by the dualic prefix te-. This prefix is used when two or more elements are involved. The composition of constructions with sh- is the following:

- a) sh + wa' + te + (mode) + pronoun + (noun) + verb + asp + (plural).

Elements in brackets are optional.

If you want to express that you are talking about one and the same object as in the sentence 'I washed the same blanket again', you do not use the dualic prefix because only one object is involved, e.g.:

ne: <u>sha</u> 'kaná:tša'	it is the same pot
ne: <u>sha</u> 'kaseréhta'	it is the same car
ne: <u>shon</u> 'shá:ra'	it is the same knife
ne: <u>shon</u> 'hsí:ra'	it is the same blanket

Sókhare' ne: <u>shon</u> 'hsí:ra'	I washed the same blanket
sakenóhare'.	again.

Ne: <u>sha</u> 'kaseréhton'	We (d,excl) got on the same
wa'etiatíta'.	vehicle.

The above expressions can be broken down in the following way:

- b) sh + wa' + pronoun + noun.

If you want to express that two or more objects or persons are different from each other, you use a construction that is very similar to the one used in a) above, e.g.:

Notes to the Student (cont'd)

ó:ia' na'té:ioht	they (d) are different
ó:ia' na'tenióhton	they (d) will be different
ó:ia' na'teiohtón:ne'	they (d) were different
ó:ia' na'teiohtánnion	they (p) are different
ó:ia' na'té:ioht ki: ahsí:re'	these blankets are (d) different
ó:ia' na'tewa'theró:ten	they are different kinds of baskets
ó:ia' na'tewahsharó:ten	the knives are (d) of a different kind
ó:ia' na'tewahsharó:tens	the knives are (p) of a different kind

The composition of constructions with 'different' are:

- c) ó:ia' n + wa' + te + (mode) + pronoun  
+ (noun) + verb + aspect + (plural)

The following morphophonemic changes take place:

sh + wa'	becomes	sha'-
sh + wa' + wa	becomes	shon-
n + wa'	becomes	na'-

8. The discussion below is an attempt to give a more complete picture of the aspectual structure of Mohawk. Only the more general morphophonemic processes have been listed. At the end a number of verb paradigms are listed which illustrate some of the points made below.

1- the habitual aspect (see also Lesson 6)

The basic meaning of this aspect marker is that of plurality.

Notes to the Student (cont'd)

a) repetition of the same action over a period of time,  
an action is done regularly, e.g.:

- |                      |                                       |
|----------------------|---------------------------------------|
| 1. rató:r <u>ats</u> | he hunts regularly,<br>he is a hunter |
| 2. roió't <u>ens</u> | he works regularly                    |
| 3. raká:w <u>es</u>  | he paddles                            |

b) distribution of the same action over space, e.g.:

- |                         |                                     |
|-------------------------|-------------------------------------|
| 1. í:re'                | he is walking, he is there          |
| í:re' <u>s</u>          | he is walking around                |
| 2. ratákhe'             | he is running now                   |
| ratákhe' <u>s</u>       | he is running around                |
| 3. rátie'               | he is flying by in one swoop        |
| rátie' <u>s</u>         | he is flying around                 |
| 4. rorohronhátie'       | he is gathering while<br>walking by |
| rorohronhátie' <u>s</u> | he is gathering all over            |

c) repetition of the same action corresponding to  
progressive forms in English, e.g.:

- |                             |  |
|-----------------------------|--|
| 1. ratá:w <u>ens</u>        | he swims regularly,<br>he is swimming      |
| 2. ra'nhotónkw <u>as</u>    | he opens it, he is opening<br>it           |
| 3. tehrontahní:r <u>ats</u> | he packs it down, he is<br>packing it down |
| 4. rá:i <u>ens</u>          | he puts it down, he is<br>putting it down  |
| 5. tehronhé:w <u>as</u>     | he sweeps, he is sweeping                  |

Notes to the Student (cont'd)

d) distribution of characteristic over several objects.  
This usage of the habitual aspect occurs with  
adjectival verbs, e.g.:

- |    |                     |                       |
|----|---------------------|-----------------------|
| 1. | kanonhsí:io' thi    | that is a nice house  |
|    | kanonhsí:io's thi   | those are nice houses |
| 2. | wa'therowá:nen ki:  | this is a big basket  |
|    | wa'therowá:nens ki: | these are big baskets |

The habitual aspect is generally represented by an -s.  
If the verb has the instrumental suffix, the habitual  
ending is -a, e.g.:

- |    |                            |                    |
|----|----------------------------|--------------------|
| 1. | ratatonhkariá:kth <u>a</u> | he starves himself |
| 2. | rátsth <u>a</u>            | he uses it         |
| 3. | tehanonniákh <u>wa</u>     | he dances          |
| 4. | ratstákh <u>wa</u>         | he uses it for     |

If the verb has the reversive suffix -hsi- (see Lesson 18  
an -on is inserted before the habitual suffix, e.g.:

- |    |                |                  |
|----|----------------|------------------|
| 1. | sóhthsi        | pull it out!     |
|    |                | take it off!     |
|    | róhthsions     | he pulls it out  |
| 2. | senontékhsi    | lift the lid!    |
|    | ranontékhsions | he lifts the lid |

2- the punctual aspect (see also Lesson 12, 14 and 17)

The punctual aspect indicates that the action took place,  
will take place or is taking place at a particular point  
in time.

a) future; action will take place, e.g.:

Notes to the Student (cont'd)

- |                  |                     |
|------------------|---------------------|
| 1. enható:rate'  | he will hunt        |
| 2. enhoió'ten'   | he will work        |
| 3. én:raste'     | he will use it      |
| 4. enhatshén:ri' | he will find it     |
| 5. enhatorá'tha' | he will go and hunt |

## b) indefinite; action should take place, e.g.:

- |                 |                       |
|-----------------|-----------------------|
| 1. aható:rate'  | he should hunt        |
| 2. ahoió'ten'   | he should work        |
| 3. á:ratste'    | he should use it      |
| 4. ahatshén:ri' | he should find it     |
| 5. ahotorá'tha' | he should go and hunt |

## c) definite; action has just taken place, e.g.:

- |                  |                    |
|------------------|--------------------|
| 1. waható:rate'  | he hunted          |
| 2. wahoió'ten'   | he worked          |
| 3. wá:ratste'    | he used it         |
| 4. wahatshén:ri' | he found it        |
| 5. wahatorá'tha' | he went and hunted |

## d) progressive; action is taking place right now, e.g.:

- |                   |                    |
|-------------------|--------------------|
| 1. roió'te'       | he is working      |
| 2. í:rate'        | he is standing     |
| 3. rón:ni'        | he is making it    |
| 4. raweién:te'    | he is learning     |
| 5. ratorá'the'    | he is here to hunt |
| 6. ráhawe'        | he is holding it   |
| 7. roió'ténhsere' | he is here to work |

The morpheme that represents the punctual aspect suffix is the '. Changes will occur in certain environments, e.g.: after a consonant the punctual suffix is usually -e'. After the purposive in the future, indefinite,

Notes to the Student (cont'd)

and definite, (a)5, b)5, and c)5 above ) the punctual suffix is -a'.

3- the perfective or 'stative aspect (see also Lesson 18)

## a) an action is perfected

- |                             |                        |
|-----------------------------|------------------------|
| 1. r <sup>ó</sup> tston     | he has used it         |
| 2. rinoronhkhwá:' <u>on</u> | I have loved him       |
| 3. ratá:wen                 | he has swum            |
| 4. raón:ni                  | he has made it         |
| 5. ro'ní'khon               | he has sewn it         |
| 6. shakotken'sé: <u>ron</u> | he has gone to see her |
| 7. rokarewáhton             | he has gotten hurt     |
| 8. ronóhare                 | he has washed          |

## b) an action is in progress, or perfected, e g.:

- |                    |   |
|--------------------|---|
| 1. tehowén:rie     | he has stirred it,<br>he is stirring it |
| 2. roká:we         | he has paddled,<br>he is paddling       |
| 3. rote'shennón:ni | he has aimed,<br>he is aiming           |
| 4. tehotská:hon    | he has eaten,<br>he is eating           |
| 5. roterí:io       | he has fought,<br>he is fighting        |
| 6. rohnekí:ren     | he has drunk,<br>he is drinking         |

The perfective suffix undergoes a number of morpho-phonemic changes, of which the most common ones are listed below.

Notes to the Student (cont'd)

- I. -on is deleted after an unstressed i, en, or e vowel, e.g. a)3, a)4, b)1, b)2, and b)5.\*
- II- An a followed by an -on will merge to en, e.g. b)6.
- III- An unstressed o or on preceding the suffix -on will drop, e.g. 5a. and 4b. above and also:
- |    |                       |                |
|----|-----------------------|----------------|
| 1. | tohohsén'th <u>on</u> | he has cried   |
|    | tesahsén'tho          | cry!           |
| 2. | roién'th <u>on</u>    | he has planted |
|    | tsén'tho              | plant!         |
- IV- ok followed by -on is deleted, e.g.:
- |    |                |                      |
|----|----------------|----------------------|
| 1. | roró:ron       | he has gathered it   |
|    | seró:rok       | gather it!           |
| 2. | rotkonwaró:ron | he has put on a mask |
|    | satkonwaró:rok | put on a mask!       |

4- the progressive

As was pointed out in the discussion of the habitual, punctual and perfective aspects, these forms can sometimes take on progressive meaning. A large class of verbs merges the meaning of the habitual or regular with the progressive, see 1 c) while a smaller class merges the perfective with the progressive, see 3b.

\* This rule is very general but there are exceptions to it which will have to be further investigated.

Notes to the Student (cont'd)b) in the imperative mode

- |                           |                      |
|---------------------------|----------------------|
| 1. roién:tak              | let him have it      |
| 2. teiotikerón:tek        | let it be square     |
| 3. satateweiennenta'ónhak | be ready             |
| 4. roká:tek               | let him behave a lot |
| 5. ratorátshek            | let him be a hunter  |

General morphophonemic rules for the continuative are:

- I- -k- becomes -(h)ek- after the habitual suffix -s-.
- II- -k- becomes -hak- following a stressed syllable.
- III- -k- remains -k- everywhere else.

6- General morphophonemic rules for aspect suffixes:

a) Final n and w are deleted before the habitual suffix -s and the perfective suffix -on, e.g.:

- |               |                                 |
|---------------|---------------------------------|
| 1. raná:ie'n  | let him become proud            |
| enhaná:ie'ne' | he became proud                 |
| <u>but</u>    |                                 |
| ronaié:'on    | he has become proud             |
| 2. sé:ka'w    | like the taste of it            |
| enhawé:ka'we' | he'll like the taste of it      |
| <u>but</u>    |                                 |
| rawé:ka's     | he likes the taste of it        |
| raweká:'on    | he has liked the taste<br>of it |

\* It is possible that the occurrence of final n and w is not due to morphophonemic alternations but signals a difference in meaning. For instance, for 1. above there exists another form raná:ie', 'he is proud', in which the final n does not occur. The same alternation exists for several other forms, e.g. rokwáhtshe'n, 'let him get rich', and rokwáhtshe', 'he is rich'.

Notes to the Student (cont'd)

- 3. será:ta'n                    step on it
- wahará:ta'ne'                he stepped on it
- but
- rará:ta's                      he steps on it
- roratá:'on                     he has stepped on it

b) The reversive ending -ko undergoes the following morphophonemic changes:

- I- -ko- becomes -kwa- before the habitual suffix -s.
- II- -ko- plus the perfective suffix -on merge to -kwen.
- III- -ko- remains -ko- everywhere else.

- 1. ranénskwas                    he steals, he is stealing
- senénsko                        steal
- enhanénsko'                    he will steal
- ronénskwen                    he has stolen
- 2. ratoriahnerónkwas            he moves, he is moving
- satoriahnerón:ko              move
- enhatoriahnerón:ko'          he will move
- rotoriahnerónkwen            he has moved

LESSON 20 (REVIEW)

1. Waten:niote'.

The following scenes could have been taking place during a Mohawk wedding some fifty or more years ago. A wedding then took three days. Cooking and other preparations began on Saturday. Sunday evening was reserved for a meal and afterwards everybody played party games. Then, on Monday morning before breakfast, the Church ceremony took place. Afterwards, the guests had to be picked up and then there was a breakfast of steak and sausages. During the whole day there were always two parties going on, one at the bride's and one at the groom's place. At noon, the bride's parents would go over to the groom's place to ask the groom's parents and some close relatives to join them for the meal of roast pork and potatoes. At dinner, the groom's parents would reciprocate. After and between meals people danced, usually to fiddle and organ music.

On Tuesday, the gifts were hung on large poles that were carried by two men on their shoulders. They walked with the gifts through the village to the place where the young couple was staying, usually at one of their parents'. The gift bearers were surrounded by people, some of them dressed up in all kinds of funny combinations, others wearing masks. In the evening, if people still felt like dancing, they would go to the place where the young couple was staying. They would bring all kinds of pots and pans which they used to make a big noise. This would usually lead to another dance which could last the whole night.

Scene 1: We are at the bride's house sometime before the wedding. The following people are present: the bride's mother Eréna. the bride's father Arék, the bride's godmother Teré:s, and the bride's grandmother Warriá: . They are discussing details of the upcoming wedding.

Scene 1:

Eréna : Atskwi Teré:s, ónhka káti' wa'ontati'terón'-ne' ne Só:san?

Helen : Well Teresa. who is going to be the maid of honor for Susan?

Teré:s : Khé:re' káti' ken tóka' Oróte. I:' ni' né:'e khehsenná:wi. Ó:nen kheri'wanontón:ni tánon' iakorihwanonwé:'on.

Teresa: I guess it will be Dorothy. She's my god-child, too. I have already asked her and she has agreed.

Wariíá: : Shikáhson ken nakotiá:tawi'?

Myra : Is her dress ready-made?

Teré:s : Iah, iontia'tawi'tshe-rón:nis iakóhson. Te-io'nhésáhstará'the ionniá:ton.

Teresa: No. the dressmaker made it. It's made out of satin.

Eréna : Oh nikaierontó:ton nakotiá:tawi'?

Helen : How is her dress made?

Teré:s : Kaiatahserón:ni. Ok ne Sosá:n akotiá:tawi'?

Teresa: It's princess-style. How about Susan's dress?

Eréna : Thó:ha ki' ne shá:ka. Nek tsi tewa'arón:ton nen' né:'e. Tánon' ne akota'arorókthá', ne: ni:'i wakata'arorón:ne' shonkéniake.

Helen : It's almost the same, except that it has some lace. And her veil, it's the one I wore when I got married.

Alec who has so far listened patiently, interrupts the women.

Arék : Ó:nen káti' ken akwé:kon iethihonkará:wi?

Alec : Have we invited everybody now?

Eréna : Hen, shiiaontatckénhton ni'khehonkará:wi.

Helen : Yes, I invited them last Sunday.

Wariíá: : Wa'tshón:ka ken ne tsarasé:'a Saró:?

Myra : Did you invite your cousin Charles?

Scene 1 (cont'd)

- Eréna : Hen, ne: shenhnísera rihonkará:wi.      Helen : Yes, I invited him the same day.

- Sa:k : Wakatateweiennen'tá:on ki' ní:'i.
- Wére : Ha' ki' wáhi'.
- Louise: Are you almost ready?
- Bill : No, I can't find my shoes.
- Louise: Look under the bed.
- Bill : Yes, I found them now. I wonder what kind of advice we (d, incl) should give them?
- Louise: The most important thing is that they (d) should love one another.
- Bill : Yes, I agree. And I also should make Jim think about not being wasteful.
- Louise: Yes, he likes to spend money.
- Bill : Talking about money, did you buy any dress yet?
- Louise: Yes, and I also bought your tie. It's blue with white polka dots.
- Bill : You know I don't like polka dots.
- Louise: Well, you go and exchange it.
- Bill : I guess so. Where is Jim? It's time to go now.
- Jim : I'm ready.
- Bill : Let's go then.

Scene 3: It's Saturday before the wedding  
 This is the day when the food is  
 prepared. We are in the big kitchen  
 of the bride's home. A huge woodstove  
 is going, it's hot, and everybody is  
 bustling around.

Scene 3:

- Ro:s : Ne: tahnonnaiaí:ron tsi io'taríhon.      Rose : My goodness it's hot.
- Eréna : Hen, tesahnonhón:ti tekatsiserá:ton ostón:- ha aontontáweiate' nó:wera'. Teré:s, ó:nen ken iesana'tará-ten ne tka'wá:ra?      Helen : Yes, open the window to let some air in. Teresa, did you put the meatpies in yet?
- Teré:s : Hen. Tkanon'ónsera' ki' nón:wa' skatena'-tarón:ni'.      Teresa: Yes. I'm making pumpkin pies now.
- Eréna : Tesatohontsó:ni ken ónhkak aiesahsnié:-nen'?      Helen : Do you want anybody to give you a hand?
- Teré:s : Thikawenní:io. Tóka' nón:wa Ro:s aierawistó'tsi sewahió:wane'. Sewahió:wane' tewá:-ia ó:ni' katena'taron-niá:ne'.      Teresa: O.K. then. Perhaps Rose could peel the apples. I'm making apple pies too.
- Ro:s : Niá:re' ki' íksa ki: keksóhares.      Rose : Wait till I finish these dishes.
- Wariiá: : Ka' non: niká:ien ne kwéskwes onón:tsi? Í:kehre' ó:nen aontakatahsawen akatkátston nonen:sto.      Myra : Where is the pig's head? I want to start making cornsoup now.
- Eréna : Kaná:tsakon ítewa. Ohnawerá:kon tiona'-tsén:ton'. I: enk-kóha'.      Helen : It's in the pot. The pot is hanging in the well. I'll get it.

Helen leaves to get the pig's head.

Scene 3 (cont'd)

Teré:s : Iekaié:ri ken tsi

The music starts playing, and everybody joins in the dancing.

Scene 7: It's Tuesday afternoon on the street. Wenní:k, Ro:s and Oróte are watching the men carry the gifts on long poles to the bride's house, where the young couple will live till they can build their own house. Others are masquerading, dressed up in funny clothes. They dance around the gift bearers.

5. Verb List

The following list includes some of the verbs that exist in Mohawk. More verbs can be found in Michelson's 'A Thousand Words of Mohawk'. Michelson usually lists a verb in its habitual form. The suffixes in brackets are the punctual and the stative/perfective. For instance, on p.22 kenuta:ra's (-ne', -u) means that this verb has the following three forms (using the spelling of the teaching grammar):

- |                     |                    |
|---------------------|--------------------|
| 1. kenonta:ra's     | I go uphill        |
| 2. enkenonta:ra'ne' | I'll go uphill     |
| 3. wakenontahra:'on | I have gone uphill |

Unfortunately the present verb list only contains a fraction of the verbs that occur in Mohawk. For a more complete overview considerably more time and effort would have to be spent on this section. In the list below, only the imperative form either in the second person singular or the third person 'let' form\* is provided. The imperative form is usually the one that is closest to the stem. Given the major morphophonemic rules provided at the end of Lesson 19 in the discussion of aspects, the student should be able to create most of the forms himself. In some instances additional forms will be provided to help the student. Below is an example on how to derive other forms from the imperative form:

- |  |              |
|--|--------------|
| Sate'shennón:ni!   | Aim!         |
| a: add habitual suffix <u>-s-</u> :                      |              |
| sate'shennón:nis   | you aim      |
| b: add future <u>en-</u> and punctual suffix <u>-'</u> : |              |
| ehsate'shennón:ni'                                       | you will aim |

\* For the adjectival verbs the present tense form is listed, since it is the basis for all the other tenses.

c: for the perfective form, the -on suffix should be added. However, because it follows an unstressed i, -on is deleted:

MOHAWK SCRABBLE

Te'ionte'nikonrakenniehtákhwa.

Scrabble is a word game that has been used with European languages for many years. It is especially useful in teaching spelling. With Mohawk, however, we have designed the game to teach much more than just spelling, this being relatively simple. We have modified the rules of the game to allow you to make more extensive use of the word-building processes (the morphology) which are very productive in Mohawk. In other words, the game will reward the player who is adept at combining words and morphemes (meaningful parts of words) into new words by making the required adjustments (morphophonemics.) For example, a player may form the word takó:s 'cat' on the scrabble board. The next player may modify that word by changing the long o: to a short o followed by a ', and then add ko:wa forming tako'skó:wa 'tiger'. The player who makes this change will score on the full word tako'skó:wa. Another example will make this point even clearer. The word rén:teron means 'he lives'. By adding the locative prefix t- and by changing the initial r to an h, a new word thén:teron 'he's over there', 'he's home', can be formed. The player forming this new word would of course score high since he would be counting points for every letter in the word.

The selection and valuation of letters for playing Mohawk scrabble also needs mentioning. A frequency count was made of the letters that were found in a paragraph of approximately one hundred and fifty words.

Those letters with a low frequency of occurrence were given high values; those with a high frequency of occurrence were given low values. The values are as follows:

A <sub>1</sub>	I <sub>1</sub>	T <sub>2</sub>	E <sub>2</sub>	K <sub>3</sub>	S <sub>3</sub>	W <sub>4</sub>
H <sub>4</sub>	' <sub>4</sub>	R <sub>5</sub>	EN <sub>5</sub>	ON <sub>6</sub>	O <sub>6</sub>	A: <sub>7</sub>
ON: <sub>7</sub>	I: <sub>8</sub>	E: <sub>8</sub>	O: <sub>8</sub>	EN: <sub>10</sub>		

There are 104 pieces (one hundred and two letters and two blanks) which break down as follows:

Nine:	A, I
Eight:	K, T, E
Six:	S, W, H
Five:	R, EN, ON, O
Four:	A:, ON:, '
Three:	I:, E:, O:
Two:	BLANKS
One:	EN:

Since we could not supply a scrabble board along with this text, we give you the possibility of making one. You will find this to be a very simple task involving no more than assembly work. In addition, since there was no word for "Scrabble" in Mohawk, we gave the English word a Mohawk pronunciation, skrabe. Games, in which you match wits or puzzles, are called te'ionte'nikonrakenniehtákhwa.

Assembly:

- (1) Cut out the two pages which make up the scrabble board and tape them together where the arrows indicate "join".
- (2) Tape or glue the pages on a piece of cardboard the size of the game. This will give it rigidity.
- (3) Cut out the page containing the scrabble letters and glue this to a thin piece of cardboard
- (4) Cut out each letter and place it in a small box.

You are now ready to play Mohawk Scrabble.

RULES:

Any number of players (or teams) can play scrabble. Not more than four is ideal. The game consists of forming new words and/or interlocking words. Each letter has a value giving each word a total value. The winner is the one who gets the highest score by using his letters in combinations that give him the highest value. The game continues until all players run out of letters or cannot form any new words.

To Begin:

Turn all the letters face down and draw for first play. The player with the letter closest to the beginning of the alphabet will play first. Each player then draws seven letters with which to play.

Mohawk Scrabble (Cont'd)To Play:

1. The first player forms a word consisting of two or more letters and places it on the board so that one letter is on the center square. Words can only be placed on the board so that they read from left to right or from up to down. The player then records his score and draws as many letters as he has played.
2. The next players then, each in turn, add new letters to those already played to form new words. All letters must form complete words, cross-word fashion, and if they touch letters in adjacent rows, they must form complete words with all such letters.
3. New words may be formed by:
  - a) Placing a word at right angles to and using letters in a word already on the board. For example:

```

      T
    T A K O : S
      N
    O N
  
```

takó:s     'cat'  
 tánon     'and'

- b) Adding one or more letters to a word already on the board. However, when the adding of letters to another word in part changes the other word, then the player may exchange the letters that change with his own letters and add on the new letters. For example, if a person wanted to add t- to rén:teron 'he lives', he would exchange the

Mohawk Scrabble (Cont'd)

r for an h and then add the t- to make thén:teron  
'he is at home'.

He would then procede to draw one new letter to maintain his stock of seven.

- c). Placing a complete word parallel to a word already played so that adjoining letters also form complete words. For example:

```

O K
I: N O N

```

All of the following are words:

```

ok      'and'
ki:     'this'
í:non   'for'

```

4. The two blanks may be used to represent any letter. A blank already played may not be exchanged for the letter it represents.
5. Any player may use his turn to replace any or all of his seven letters at any time he so desires.
6. The play must continue until all the letters have been drawn and one of the players has used up all of his letters, or until all possible plays have been made.

To Score:

Total the value of each word a player has formed by recording his score after each turn. The player with the highest score wins.

Mohawk Scrabble (Cont'd)THE BOARD:

Squares on the board vary in value. "2" on the board stands for "two times"; "3" stands for "three times". "W" stands for "word"; "L" stands for "letter". "2W" therefore means "two times the word score"; "2L" similarly means "two times the letter score".

It will be easier to recognize the different values of the squares on the board if you colour-code the squares. You may wish to do this as follows:

3W	colour bright red
2W	colour strong yellow
3L	colour blue
2L	colour green

The following three pages contain your Mohawk scrabble game. Assemble it as soon as possible and begin playing. You will be amazed at how much you will learn about Mohawk. Ha' te'tewate'nikonrakén:ni!
